Presenting The New Buick Four

The new Bluick Four is a distinctively Buick creation in every feature of design and construction. It embodies those principles of construction that have characterized Buick automobiles for more than twenty years.

The engine is of the famed Buick Valvein-Head type. The bore is 3% the stroke, 4%. Wheel base, 109, turning radius, 36

A Marvel carburetor with the new automatic heat control insures proper vapor ization of the common low grade of commercial gasoline.

Multiple disc clutch, the transmission and universal joint are of standard Buick construction - the universal joint

ng type, with semi-elliptical type springs front and rear. The frame is a deep channel section, strongly re-inforced with four cross members. High pressure Alemite system provides

being lubricated from the transmission.

The rear axle is the three-quarter float-

lubrication. Delco equipment with Exide battery insures efficient starting, lighting and ignition.

All models have non-glare headlight lenses -all are complete with tire carrier and extra rim. Closed models are equipped with adjustable windshield visors, windshield cleaner, dome light, ventilating windshield, adjustable windows, and sunshade in rear window.

Cord Tires Standard Equipment on all Models See Us for Specifications and Delivery Dales
