SPEEDING IN THE BOROUGH

Automobile speeding has become quite a pastime among some of the Patton Auto owners. This pastime takes place in the Borough, and is indulged in, so far as we can notice, only by our own citizens. Strangers are inclined to be cautious while in town and respect speed limits.

It is not uncommon to see someone tearing up Matcoe avenue and swing around the Palmer house corner onto Fifth avenue at a speed that would cause disaster were they to meet someone on the corner.

Machines have locked horns on Patton's corners heretofore, and each time it could usually be blamed on either one or both of the drivers being at fault insofar as any speed ordinance might be concerned.

The trouble these days is that there are no many cars on the roads that a careful man is always in danger on account of the indiscretions of another.

Racing on Patton Borough streets at least, should be stopped.

THE NEED OF A NIGHT POLICEMAN.

Some time ago the borough of Patton abolished a night policeman. The robbery the other night is an exemplification of the result of this move. A local hardware store was broken into by means of smashing a heavy plate glass window. Not a single soul in town can be found who heard or saw anything about the store. Evidence about the store points out that the burglars took their good old time within the store in picking out the merchandise they most desired. A night policeman, on active duty in the central portion of Patton could have but been attracted to the scene of the robbery.

A town the size of Patton should by all means have police protection at night. The score or more of stores in our business section as things are at present are left open to any one who desires to use a "Jimmy" at night. The town, after midnight is deserted, and if a discovery of crime should be discovered by an outsider there is no one in authority to take charge of any alarm that can be given.

The residential sections of the town need protection at night as well as the business sections. A crime wave is evident throughout the nation, and we have evidence that it has reached Patton. We believe that it is up to Borough Council to provide ample protection to the taxpayers of Patton. So why not the appointment of a night policeman immediately?

When they found he had cut his throat and wrists with a razor he had taken with him but he was still able to walk.

He had partially stopped the flow of blood from the wounds by flapping mud in the wounds or by very likely would have died.

He was taken to town and treated by Dr. Blair and later taken to the Spangler hospital.

Several months ago he sold a copy home at a sacrifice, quit his work in the mines and moved to Rockford Ill. in hopes that his wife's health would be benefited.

He spent considerable money and when his wife's health failed to improve in the western climate they returned to Patton.

Worry over selling his home for such a small sum, and the condition of his wife, preyed on the man's mind.
