IMPROVE TELEPHONE LINE

The heavy snows of last week put a great many of the lines of the Northern Cambria Farmers' Telephone Co. out of commission and repairs are being made as rapidly as possible. Within the last year this company has replaced many of its old lines with new No. 6 copper wire, using about 70 miles in all. All of the new wire without the storm and whose replacements are necessary the company is using new wire of the same weight, making this the best equipped farmers' line in the state.
