Musical Recital in the Future

Joseph Phillips and Fleming Sisters Trio; Something Patton Folks Should Hear

Is it possible for a singer to sing a duet with himself? Can a living voice and the same voice RE-CREATE a tone quality that they cannot be distinguished, one from the other? Has science achieved a triumph that marks the dawn of a new day in the art of music?

These are some of the questions—questions in which every person of culture must be deeply interested—who will be answered at the recital to be given at the M. E. Church, Thursday evening, December 7, in the parlors of this church, at which Joseph Phillips, the singing American Baritone, and the singing Fleming Sisters Trio will appear, have been received by many prominent musicians of this city, and indeed in the coming affairs seems to be in musical circles. The appearance of these celebrated artists, of course, would be sufficient to arouse the enthusiasm of music lovers here, but the fact that they will lend their talents to the laudable work of raising conclusion of the RE-CREATION of music, and sound has been added, adds immeasurable interest to the occasion.

In the coming recital, these artists will sing and play in comparison with the RE-CREATION of music by New Edison, and the audience to judge whether or not the living performance can be made to live forever. The artists will try to pick the two golden tones of one moment and which one has been made immortal. Can it be done? Cards of admittance can be secured from M. J. Commons & Sons, if you wish to have this question answered.

Cafeteria at M. E. Church. The ladies of the M. E. church will serve a cafeteria in the basement of the church on Thursday evening, December 7, at which the general public is invited. A suit in trespass to recover damages in the sum of \$60,000 for the death of his son, Ernest Bradley, aged 25 years, was filed at Ebersburg in the County Court of Patton, against Fred Sylvester, of Gallatin. Everybody-at-Church Day

Sunday, November 26th., 1922 At The Patton M. E. Church

The Ushers Association of the Methodist Episcopal Church of Patton recognize the need of a God's Day in Patton, and to that end, are planning an EVERYBODY AT CHURCH DAY SERVICE, Sunday, November 26th. Very fine musical programs are being prepared, and Rev. Graham will preach morning and evening upon subjects of timely interest to the community.

It is desired that everybody in Patton shall go to some church service on November 26th. You may be a member of some other church than the Methodist church, or you may not be a member of any church; it is planned that everybody shall go to some church service, Sunday, November 26th. If not to the church of your own denomination and choice. The Ushers invite you to their special services in the Methodist Episcopal church upon that day.

Some one suggested that Patton had its Decoration Day, its Labor Day, its Holidays and Dollar Days, but without it's GODS DAY. The question has been asked of this community; Why not its GODS DAY? Why not its EVERYBODY AT CHURCH DAY, SUNDAY, NOVEMBER 26th, 1922?

MANAGEMENT IS RESPONSIBLE

The management of the Reilly No. 1 mine, Spangler, was found responsible for the disaster November 6. The jury returned a verdict at 3:55 yesterday morning charging them that with the knowledge of the company, there was an insufficient number of fireboxes employed, that open lights were being used in the presence of dangerous gas, and that the ventilation in the mine was inadequate.

At 10:55 Tuesday night, Coroner, M. W. Swabb gave the case into the hands of the jury and instructed them to retire and bring in their findings of the cause and responsibility for the explosion.

The inquest was opened by Coroner Swabb Tuesday morning at 10:30 District Attorney D. P. Warner and members of the commission of mine inspectors that carried on an investigation of the disaster taking an active part in the proceedings.

The testimony of the inspectors was the last evidence to go before the jury. The inspectors gave it as their opinion that the explosion was due to poor ventilation which was avoidable and which should have caused the use of lock safety lamps in the mine. They recommended that safety lamps be used hereafter, that all electric equipment should be used and that a sufficient number of fireboxes be employed to inspect the mine thoroughly. The inspectors testified that one firebox was not sufficient to insure the safety of the men employed in the Reilly colliery.

Very damaging evidence was put into the record at the night session, direct charges being made that mine officials browbeat employees into keeping quiet about conditions and the intimidation made that a firebox three years ago was discharged, because he had too much to say on the record about the presence of dangerous gases in the colliery.
