Timber Growing Scarce. The increased timber of the world is inadequate to the requirements of modern civilization, says the United States Department of Agriculture. We now draw one-third of our paper requirements from Canada. There is an embargo on the export of pulp wood from the crown lands of Canada, and this is likely to be extended to all forest lands in the Dominion, completely shutting off the supply of raw material for the paper industry of the United States. This illustrates the hazard of becoming dependent upon foreign supplies of timber, it is pointed out.

Would Reduce Tax. HARRISBURG. A reduction from 10 to 5 per cent of the collateral inheritance tax in Pennsylvania on the export of pulp wood from the crown lands of Canada, and this is likely to be extended to all forest lands in the Dominion, completely shutting off the supply of raw material for the paper industry of the United States.
