ANOTHER ARTICLE ON THE FOREST FIRE ORGANIZATION LABORS

You have read or have heard it said that Pennsylvania has the finest forest fire organization of any state in the union. So, perhaps, you may be interested in knowing what it consists and how it functions.

The directing head of the organization is the chief forest fire warden who is also in charge of the Bureau of Forest Protection. He has his headquarters in the State Capitol at Harrisburg. Then the state has been divided into twenty-four forest fire wards. This is the district forester who is also the district fire warden.

The headquarters of the Gallitain District, composed of Cambria, Indiana and portions of Blair and Clearfield counties, is at Johnstown. The district fire warden is the field representative of the chief forest fire warden and is responsible for the adequate protection of the woodlands of the district.

There are two hundred and fifty local forest fire wardens, each located at an advantageous position for the prompt extinction of all fires that occur in his neighborhood. To assist the wardens of this district in their work the department has built five look out stations located in some of

the higher points in the district and so distributed as to overlook all the larger bodies of forest land. These towers are equipped with telephones, maps, and binoculars to enable the observer to detect, locate and report fire promptly. The observer is on duty only during the fire seasons of the spring and fall.

The towers are located as follows: near Johnstown, in Lower Yelder township, Cambria county; near Chickwee school in Jackson township, Cambria County; near St. Lawrence, in Chest township, Cambria county; near Glen Campbell, in Banks township, Indiana county; and on Brush Mountain, near Altoona, in Frankstown township, Blair county.

In addition, several towers in adjoining districts overlook portions of the Gallitain and report many fires not seen by the district towers.

As they were located on points commanding the most effective views of forest land, many of the more accessible ones have become famous for the magnificent views to be had from them and are visited by thousands of people each year.

Then since there is usually a large amount of work to be done during the fire seasons which comprise a short period of the year, the main districts are divided into several smaller ones and a warden is appointed inspector to assist the district forester and the wardens in the proper supervision in the work in each. The inspector moves from fire to fire to render such assistance as he can, help investigate the causes of the fires, reports on findings, and assists the wardens in building out their reports and bills.

The foregoing is a brief outline of the protection organization. In addition, much valuable assistance is rendered by organizations such as the Boy Scouts and Sportsman's Association, and by the individual members thereof. Then, too, some of the larger land owners maintain their own protective organizations and most of the water companies are active in keeping fire off their water ditches.

But by far the larger part of the work is performed by the local forest fire wardens. The position Pennsylvania occupies in the forestry movement is largely due to their activities. Not only do they see to it that any fires which occur are extir-

minated, but they prevent many a fire by warning people to be careful, by explaining the seriousness of the present depleted condition of our forest lands, and by general educational activities.

In next week's edition we will discuss their duties and powers and the difficulties which they encounter in serving the people of their communities in this all important public work.

SUMMER ICE BREAKING

The grocer's new delivery boy was extremely reticent. In fact, the cook thought him lawful.

"Wasn't you tell me your last name, John?"

"No ma'am, just call me John."

"Well, may I know what your last name is?"

"No ma'am, you'd better not."

"I insist upon calling you by your last name."

"All right, then. Call me Darling."

Progressive Grocer.

Still Going Strong

Mr. Altbach was a very poor speaker and after his oratory had run on for over an hour some of his audience began to leave. As one man slipped out of the door, another asked happily:

"Has he finished?"

"Yes," said the first speaker grimly. "Long ago; but he won't stop." Good Hardware.

HUNTING PEBBLES

Uncle Henry had taken his little nephew, Willie to a nearby resort, and during one of the strolls on the beach had told the youngster that if he could find two pebbles exactly alike he would be given a dollar. Eagerly Willie began to search. In an hour he came to his uncle and said:

"Well, uncle, I've found one of them!"—Everholts.

Well Qualified

Manager. You want a position as a yardline packer, eh?

Applicant. Yes, sir.

Manager. Had any experience?

Applicant. Yes, sir. Two years as a street car conductor.—Progressive Grocer.
