Testing Your Telephone Equipment—

THE secret of telephone service reliability is preventative maintenance, as it's called, or "correcting troubles before they occur."

The past ten years have marked the height of accomplishment in this respect.

There are still "trouble shooters" who are kept busy repairing the damages of the wind, sleet, lightning, floods, falling limbs and like disturbance. But there's a much larger force testing against trouble that would become serious if not nipped in the bud.

Complicated and delicate as your telephone instrument is, it stands up well under reasonable usage. The circuits and the switchboards, the cables and the open wires are what require sharpest watch.

There are daily tests and nightly tests; tests for rust, hidden dirt and moisture; tests for excessive wear, friction, and for electrolysis, bad adjustment and "temperament" in switchboards, open lines and cable plant.

It consumes the time of many people, and sometimes costs more than it would to let things slide and correct them when the break comes. But it spells service reliability.

Helping Home Development

Through Dividends to Our Customers

For Your information, dividends paid to preference shareholders of our Company for the year 1924, amounted to \$383,463.39.

Since the inauguration of our policy of customer ownership in 1920, these dividends have totalled \$1,088,496.90.

In 1924 quarterly dividend checks were mailed to over 6,000 individual shareholders.

The folks who receive our dividends have more money to save or spend here at home. That's a good thing for everybody, and it is bound to help local prosperity.
