

NOW DOES ALL HER WORK

Has No Backache, No Bad Feelings Because Lydia E. Pinkham's Vegetable Compound Drove Her Illness Away

Milwaukee, Wisconsin. "I was in a badly run-down condition and I would get weak spells and terrible headaches. I felt so badly last year that I could not do any housecleaning. The minute I would lift or stoop it seemed as if I was going to fall to pieces. I told a doctor and that did not help me. I took four bottles then and in the fall of the year I took three. I had been treated by a doctor but he gave me an iron tonic and that did not help me. It seemed that the tonic did not have it in what the Vegetable Compound did. That gave me the strength and ambition I needed and I have started to clean house. This year before I started to clean house I got four bottles of the Vegetable Compound and am taking it right along. I tell my friends about it and how much good it does me. They can notice it because I have gained in weight. I weigh 118 now and do all my work myself again." - Mrs. EMIL O. BRANDENBURGER, 661 57th Street, Milwaukee, Wisconsin.

Ireland Has New Plight The Royal Zoological Society of Ireland has been gazetted the names of some of the animals in the Dublin zoo and has named the catfish Lusa Gall and the golden carp from China the Lusapor, but could find no Irish words for the alligator.

You never can know how much a Dr. Peppery's Headache Remedy will do for you until you have tried it. 212 Pearl St., N. Y. City.

If you start on a journey and forget to take an umbrella with you it's a good sign of rain.

Good fishermen know when and where to draw the line.

Take Healing Sulphur baths at home For rheumatism, gout, eczema or hives, nothing is more beneficial than sulphur baths. You can enjoy the benefits of healing sulphur baths right in your own home, and at small cost by using

Hancock Sulphur Compound nature's own blood purifying and skin healing remedy—Sulphur—scientifically prepared to make the use most efficacious. Use it in the bath. Also use it internally and as a lotion on affected parts.

60c and \$1.20 the bottle at your druggist's. If he cannot supply you, send his name and the price in stamps and we will send you a bottle direct.

HANCOCK SULPHUR COMPOUND Baltimore, Maryland Hancock Sulphur Compound (Glycerin) - 60c and \$1.20 per bottle with the Express - 80c

LEONARD EAR OIL for DEAFNESS and HEAD NOISES. All Druggists. AD. LEONARD, INC. TO BEAT, NEW YORK.

He Owes His 40 Years of Constant Good Health to Beecham's Pills. "I am 40 years old and commenced to be troubled with constipation, headache and other ailments about 1890. I tried many other remedies having failed, I have not had a sick day in all the 40 years." F. Louis Loeffler, Rochester, N. Y.

Beecham's Pills For FREE SAMPLE—write B. F. Allen Co., 417 Canal Street, New York. Buy from your druggist in 25c and 50c boxes. For constipation, biliousness, sick headache and other digestive ailments take

ASTHMA DR. J. D. KELLOGG'S ASTHMA REMEDY for the prompt relief of Asthma and Hay Fever. Ask your druggist for it. 25 cents and one dollar. Write for FREE SAMPLE. Dr. J. D. Kellogg & Co., Buffalo, N. Y.

Use Cuticura Soap And Ointment To Heal Sore Hands

King Tommy

By GEORGE A. BIRMINGHAM

Copyright by Bobbs-Merrill Co., W. N. D. Service

CHAPTER X—Continued

"For entering Tommy with a false passport," said Von Steinfeldt, "you shall in person forthwith be enclosed."

CHAPTER XI

It was at half past ten that Casimir entered the Adlon hotel the morning after the party at the Masovites. He did not find Tommy, who by that time had gone off to the police office. He did find Janet Church, whom he talked over to himself to arrange for her visit to Latvia.

"Do try not to be quite so cocksure that you're always right," said Tommy. "As a matter of fact, my passport isn't false, as you call it, any single particular. My face is oval, my nose is of normal shape, and my mouth is more or less round when open, which is just what the passport says. If you don't believe me and can't bear to look me in the face, which I can understand, you don't care to do after sticking me with your marks in the way you did—just take a glance at the photo on the passport."

"Certainly," he said. "Everything will be settled about your journey. There will be no difficulty at all. I shall get you a passport."

"Of what height are you?" he asked. "Five foot, ten and a half inches," said Tommy. "Forehead broad, eyes blue, nose normal, face oval. Mouth round when opened. It's all there."

"I don't see how you can get me a passport," said Janet. "The consul here, and the passport officer, and the people at the embassy refuse to allow me to have one. If I travel at all, it must be without a passport. That's what I expect you to manage for me."

"You shall have an excellent passport," said Casimir. "A British passport which no one will question."

"You can't get me that," said Janet. "It's impossible."

"That's a fool Count Casimir has this time himself a mistake made."

"I'm not a fool," said Casimir. "I'm a man of the world. I know a passport when I see one. You made the same mistake yourself. I don't even now profess to understand what it is. But you made your own mistake."

"You can't take much credit for that," said Tommy. "You'd have discovered it long ago, in fact, you'd never have made it if you'd listened to me and believed what I said."

"I'm not a fool," said Casimir. "I'm a man of the world. I know a passport when I see one. You made the same mistake yourself. I don't even now profess to understand what it is. But you made your own mistake."

"Do you mean to tell me," he said, "that you have the nerve to think of marrying her yourself?"

"No," said Casimir. "I shall steal it."

Pretty Tableau Presented for Women's Council

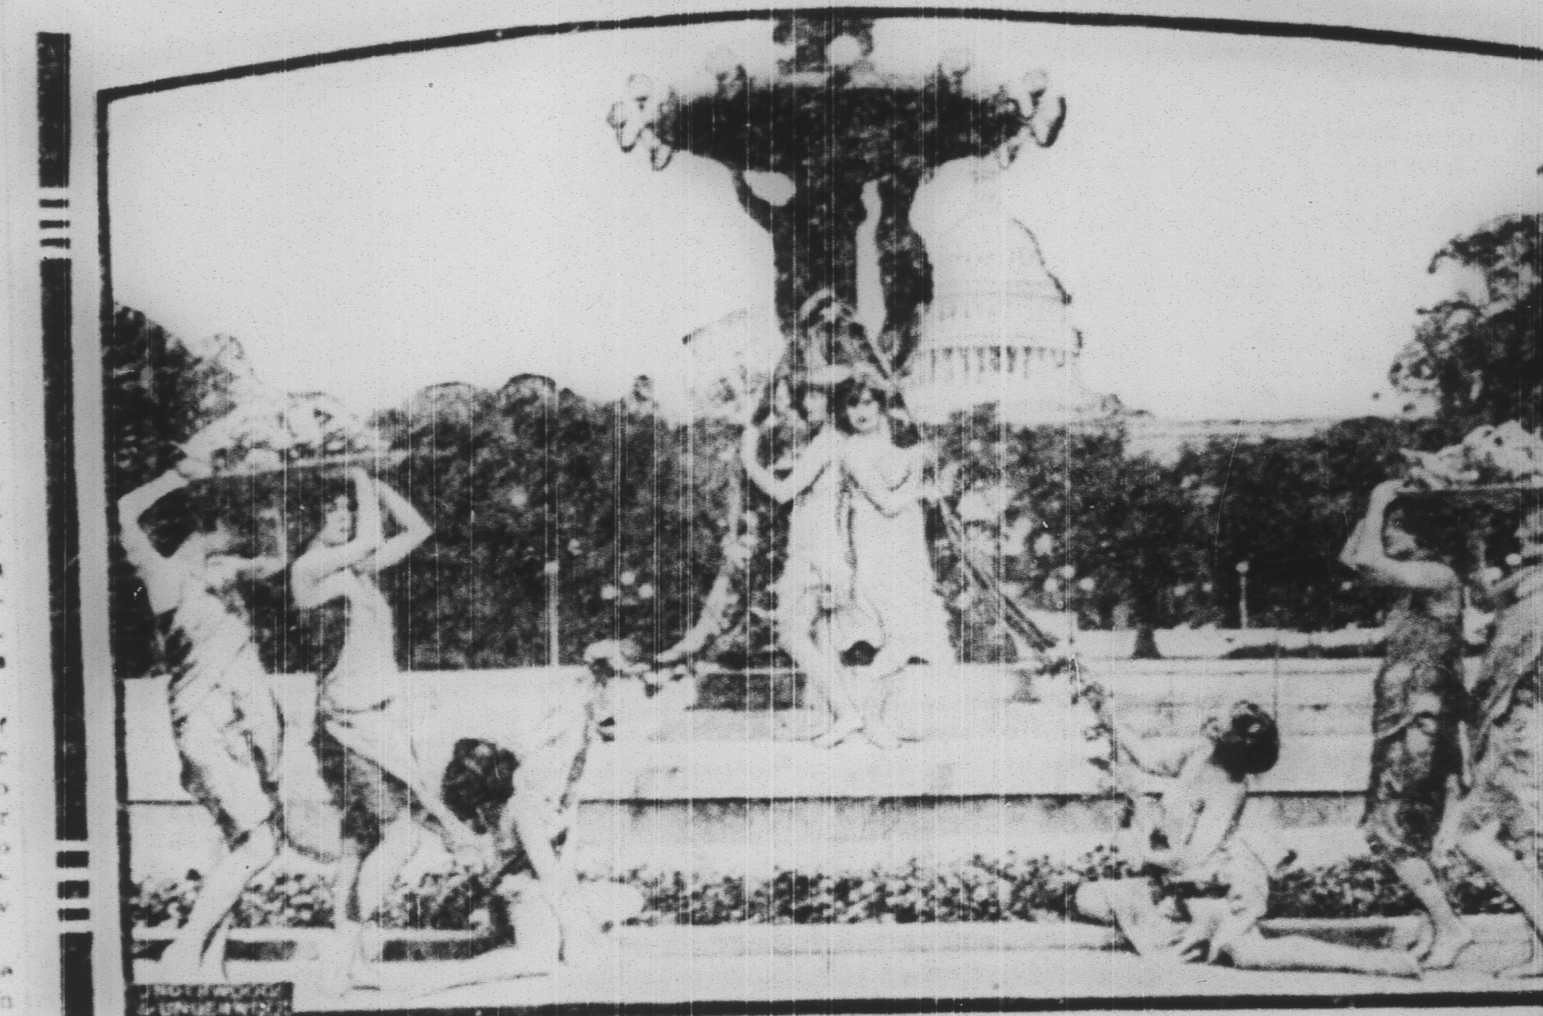

Tableau of "Peace and Plenty" from the program of "War and Peace" given in Washington in honor of the International Council of Women. The tableau was presented by the McKintley dancers in the National Botanic Gardens.

Physical Defects Cause of Mishaps

San Pedro, Cal.—Flight psychologists, practiced to prevent aerial accidents, rather than mend broken bones or patch up luckless pilots and observers after a crash, if they survive, have increased the efficiency of United States naval aviators to a large degree, statistics about the U. S. S. Aroostook, naval aircraft tender, indicate.

Medical officers aboard the tender declare that 90 per cent of aerial accidents during the World War were due to physical and psychological defects of the flying personnel. Acting upon this percentage compiled from fatalities, the medical staff of the Aroostook has established a careful examination, scientific in every detail, over 100 pilots and observers who take off in heavy bombers or light scout planes from the long, flat deck of the tender.

The flight surgeons observe the flyers each time before a flight is begun. "I can tell by talking with a pilot in the morning," declared Dr. Robert G. Davis, senior flight surgeon, "whether he is able to go aloft that day. If his psychological condition seems shaky he has to stay aboard."

"We will not permit a man to fly who has domestic difficulties, or if his family objects to his going aloft. At the critical moment a pilot's mind may wander to what his wife said at breakfast and he ends in a fatal crash."

When an engine is assigned to the Aroostook for flight duty, he first must be in 100 per cent physical condition, then he is subjected to a most searching psychological examination, Doctor Davis explained. Visual balance, visual muscle balance and tests of depth perception from the basis of the applicant's examination trial before he is awarded wings.

Then there is the low pressure chamber to climax the examination. The applicant is placed in the chamber and subjected to atmospheric changes.

Old Tombs Are Found in Greece

Princeton, N. J.—Important archaeological discoveries have just been made according to word received here by Prof. Edward Capps of Princeton university. Professor Capps is chairman of the managing committee of the American School of Classical Studies in Athens, under whose auspices the excavations are being made. Twelve chamber tombs of various periods have been found, containing a vast amount of material as they had never been plundered.

The Argive Heraeum is situated on the top of a hill, midway between Argos and Mycenae. It was a temple to Hera and was at one time one of the most important structures in Greece and the foremost temple of Hera in the Peloponnese.

Left Money for Project. Dr. Charles Waldstein did some excavating on the site in 1892 and then abandoned it. One of his assistants, Prof. Joseph Clark Hooplin of Boston, came to the conclusion that important discoveries were possibly there. He believed that an investigation might disclose the remains of a prehistoric settlement and also that there were more Mycenaean chamber tombs besides the two discovered by Doctor Waldstein. Last year he made plans to return, but died in January before he could carry them out. He left a fund, however, to be used by the American school in carrying out his cherished project.

The work so far has completely justified the beliefs, and there is no doubt that an important settlement existed on the site in prehistoric times. Trial trenches have been sunk in the terrace above the old temple and have revealed house walls and pottery from all three periods of the Bronze age.

On the eastern branch of the Argolians ridge the excavations resulted in the discovery of 12 chamber tombs in three groups fairly close together. The tombs are in general of two types, one with a short broad doorway or entrance passage, and a comparatively small chamber, the other with a long, tapering doorway and a large chamber.

Three Tombs Excavated. These tombs of the first type have just been completely excavated. They date from the late third Helladic period, about 1400-1300 B. C. The tombs yielded great masses of the late third Helladic period and also gems, beads and a very fine bronze dagger inlaid with gold, with a design of flying birds.

The remaining tombs are now being excavated, and one tomb of the second type of impressive dimensions has been found. It has a doorway 12 meters long and 2 meters wide, and the chamber measures roughly 3.8 by 4.8 meters. This and the remaining tombs are furnishing material for the archaeologists, who will probably complete their work in June. The excavations are being made under the supervision of Dr. Carl W. Blegen, assistant director of the American School of Classical Studies at Athens.

Tries New Way. Denver—John Wenitz tried to lead his life by swallowing safety razor blades here. The blades cut his mouth and throat, but would not go down. Doctors expect him to recover.

In its extensive coal mining operations Pennsylvania uses practically half of the country's total production of permianite explosives.

Says New "Death Ray" Paralyzes for Hours

Washington.—A new kind of "death ray," astounding in its destructive capacity and previously devised, rumored or realized, was reported to the Commerce department as the asserted accomplishment of a German inventor.

William T. Daugherty, trade-commissioner at Berlin forwarded a summary of a publication describing the invention, which is called "Thermostat," with the claim that its mysterious waves are capable of paralyzing life for six hours over a distance of forty miles and to an altitude of more than 40,000 feet.

Explanation of methods of operation and of the source of the energy used was lacking.

War department experts point out that the highest storage capacity of an airplane as yet is about 30,000 feet, so that the new device, if it works, would effectively clear the air in any battle.

Whale Trapped on Texas Coast

This big whale strayed past the shoals from deep water at Sabine Pass, Texas, and was unable to return to the Gulf of Mexico and freedom when low tide came. Members of the Sabine Pilots' association turned whalers for the day and caught him. For a time he was kept "in beach" and exhibited to thousands, but when he snapped three-inch lines like pack thread he was killed.
