**STOPPING THE TRAFFIC**

Nick and Nancy used to often wonder why Daddy so seldom said anything about the traffic in the city. Whenever they had been to the city they were always at first afraid of all the noise and the quantities of cars and automobiles and trucks that moved so quickly along the streets.

After they had been there awhile they realized that everything was so beautifully managed by the big policemen that there was nothing to be frightened at.

But they always thought that seeing so much traffic was wonderful. "Everything goes just like clock-work in the city, doesn't it, Daddy?" asked Nancy one morning.

"Yes," said Daddy, "it certainly does, as a rule."

"But I must tell you of a funny thing that happened one evening in a very busy part of the city."

"A cat discovered there was a piece of glass broken in the window of a butcher shop."

"Now you can just imagine how cleverly and neatly and quickly the cat got through that window!"

"There was one light burning in the shop, although, of course, the shop was closed for the night."

"And then didn't the cat have a feast?"

"Never before had she known the

**Everything She Wanted to Eat**

Joy of having everything she wanted to eat at one time with no stopping.

"Some people saw what a good time the cat was having and stopped to watch her."

"And then more and more people stopped, they were so amused."

"It was just like seeing a funny play to see the cat pick out the choicest morsels of meat and play with them and then eat them."

"The crowd of people grew more and more. The street became so crowded that no one could pass by."

"Soon it was so thick with people that the cars and automobiles could not pass."

"After the cat had eaten as much as she wanted of all of the butcher's large supply of good things, a watchman suddenly appeared on the scene."

"With the help of a great many men the watchman finally succeeded in getting the crowd to move, and then he got into the shop."

"But the cat simply leaped out of the window again and disappeared into a side alley, where probably she lived, as a rule, on bits she could pick up."

"Such a looking butcher shop as it was now, for even if the cat had not quite eaten everything, she had tried everything, and she had eaten a surprising amount even for a hungry cat."

"Well," said one person who had been watching the cat, "I think that the cat is the cleverest one I have ever seen."

"Not only does she want to eat, but she knows just when to escape in time after a splendid meal, and what is more wonderful than everything else, she stopped the traffic of cars and automobiles and trucks and people who might have been in a hurry to get somewhere."

**In Other Words**

A schoolgirl paraphrased the line "To bicker down the valley," from Tennyson's poem, "The Brook," as follows: "To have an undignified quarrel in a low place among the hills."

Another girl, given the line from "Lochinvar," "He stayed no for brake," paraphrased it: "He never stopped for a mechanical contrivance to reduce speed by means of friction."

**A Give Away**

Margaret is only seven years old, but sometimes quite naughty. On one occasion her mother, hoping to be particularly impressive, said "Don't you know that if you keep on doing naughty things, your children will be naughty, too?"

Margaret dimpled and cried triumphantly, "Oh, mother, now you've given yourself away."
