teen years old, and now is 88. Young gentlemen will observe that Mr. Rockefeller took the first job seriously and worked hard at it, although no office boy would condescend to accept twice as much now.

Cancer when discovered early can usucally be cured by an operation, most people wait to take their condition to a doctir when surgery is no longer availing.

While the cause of cancer is yet unknown, its cure is well established. Why is it then, that so many people die of it? Here is the answer: twice as much now.

twice as much now.

Those that smile when told that Mr. Rockefeller still has the first dollar he ever earned should remember should also remember rthat he also has the first HUNDRED MILLION dollars he eve rearned—which is no laughing matter—and the second, third and fourth hundred million.

die of it? Here is the answer:

Everyone must seek reliable information upon the earliest signs of any and all conditions which are, or might lead to, cancer. Foolish modesty must not deter. As the matter now stands the maority of those having cancer will be indifferent to their symptoms; indeed they may not suspect that any thing serious is wrong with them. The cancer, therefore, digs in—and remedial measures are rendered impotent. Cancer may well be styled the 'gum show slayer' as it stalks and captures

hundred million dollars. It pays, apparantly, to take your job, big or little, seriously.

EVENTUALLY AN AIR DEPARTMENT.

Sooner or later, of course, the United States will have three distinct arms for national defense, an Air department taking

the trend of the times is entirely misleading, the Air Department will rank of first import-

Old ideas die slowly. Power gives up its throne ungraciously. It has always ben thus. Great minds have usually been perse-cuted and punished for daring it will save your life. to try to change the order of things—even for distinct advancement of mankind.

Mitchell of the U. S. Army Air Division dared some two or three years ago to tell us what we needed in the air to keep abreast other nations. He advocated an Air Department under its own head and detached from Army and Navy—to the extent that those departments have always been separated. It was not long until he found himself back in pirvate life.

The American Legion in its Paris Convention, ust closed, has gone on record for an Air De
To hunters this fall it hunters in that section have their way. They are preparing, with the aid of several in-fluential men, to petition the state to extend the season on bears and let hunters kill as many as they can.

In Sullivan county, the farmers say the bears are becoming so numerous that they are a serious menace to the farming industry. They are declared to have killed about thirty sheep in the last three weeks and caused much fright among the flocks that the output of wool will be greatly lessened. Twenty two farmers are said to have reported losses. The bears are also said to bother owners by knocking over be hives, tramping down gardens and stealing food, etc.

gone on record for an Air Department—as a new and separ-from the homes. ate unit of our defense. Of course, it will not come soon because Washington does not operate that way. But eventually—

Does the reader of these lines know of a man better qualified to head the department than Patton Pa., for October 1, 1927. William E. Mitchell? The nation owes it to him.

ORDINANCE NO. 170.

ORDINANCE NO. 170.

An Ordinance of the Borough of Patton providing for the ornamental illumination or lighting of certain sections of MaGee, and Fifth avenues in the Borough of Patton by the boulevard system of lighting, and providing for the collection of the cost of the installation of such system from the property owners fronting said streets by the foot front rule.

SECTION 1. Whereas a majority of the property owners abutting on MaGee avenue from the P. R. R. crossing at the passenger station, west to an alley at the Presbyterian church; and from the north side of Bridge across Little Chest Creek have betitioned the Eurgess and Town Council to provide a system of lighting, requesting that the cost of the installation of such system of lighting be collected from the property owners fronting upon said streets by the foot front rule, and for the adoresaid, publisher of the Patton Courier, and that the owners first the following is to the best of his knowledge and belief a true statement of the ownership, management, etc. of the afternamental illumination, or lighting of the property owners abutting on MaGee avenue from the property owners fronting upon said streets by the boulevard system of lighting be collected from the property owners fronting upon said streets by the foot front rule, and that the cost of the maintenance of such system of lighting be collected from the property owners fronting upon said streets by the foot front rule, and for the downer is Thos. Modern protection against light-ning is included in the recent White House alteration. All around the balustrade above the White House roof, sharp, short, copper points stand at close intervals, connected by a copper cable, the whole system being connected with the earth, also by copper conductors, buried deep enough in the ground to reach perpetual moisture. Such lightning rods give real

protection. Insurance companies recognize that in lower rates for factories thus protected. Old fashioned, badly installed, cheap lightning rod construction is worthless or even dangerous.

Mrs. Smith had a baby in a Cleveland hospital. She and her husband said it was a boy, when they gave her a girl baby to nurse. The father says: "They can keep that girl, so far as I am concerned, unless they prove it is mine." Something of a prejudice against girl babies in that, perhaps.
