This Home Emphasizes the Economy of Brick

Cost figures are always of equal interest with the design when one is considering final choice of the house he expects to build. In this instance it is possible to supply these, for this exceptional little home, of English influence though perhaps not strictly an English type, was built but recently in the outskirts of Boston at the astonishingly low cost of \$10,323.

It will be noted that although this is a brick home there is a greater lumber cost than brick, and carpentry labor exceeds the cost of laying the brick. These facts will surprise some folk.
