Fortune Telling

By THOMAS APKLE CLARK
Dean of Mass. University of Illinois

There is a window sign that I passed in my race every time I walked down the long street in Proctorstown during the month of my vacation.

I know very well that the whole thing was a fake and that the two words on the sign were merely a psychological effect. There was no need of looking in to obtain an appointment; one could have had his future told by the sign itself before his feet were on the sidewalk.

The sign interested me, however. I wondered what the reader would say if I would go in. I had curiosity, but I still had a trace of judgment left, so I looked and passed on.

It is strange how much we like to be told what we are and especially what we are going to be. The newly arrived guest at the Inn who sits across from me at table told me at luncheon today that I had a psychic hand, and then she looked wise and made a few other personal remarks.

"World's Biggest" Pie Has Ton of Apples

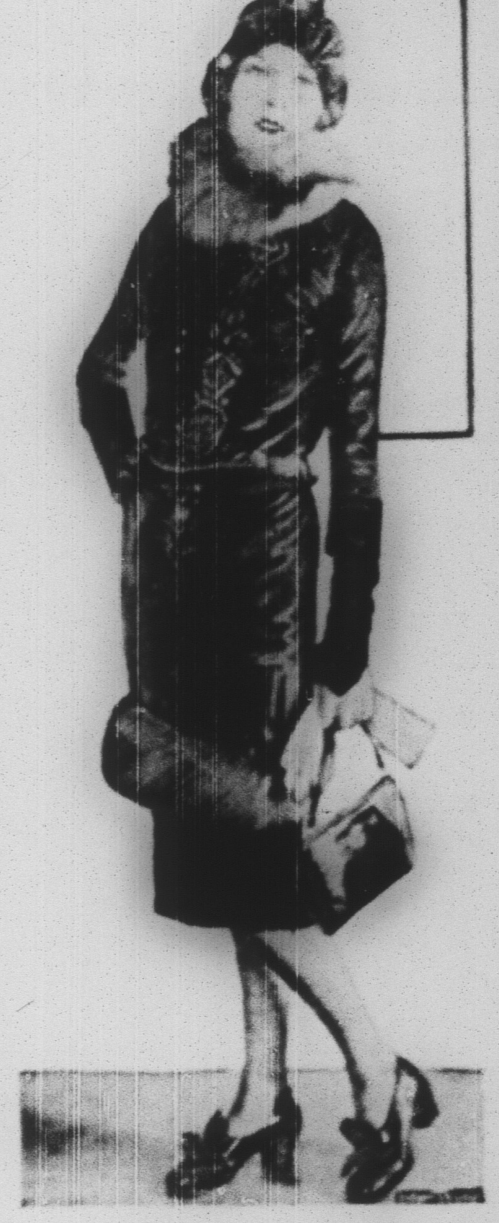

Yakima, Wash.—Heralded as the "world's biggest," an apple pie weighing more than a ton and requiring a specially constructed oven and a derrick for handling, was baked in Yakima recently.

Four bakers, welding rolling pins 15 feet long, rolled the dough for the crust. Fires were started a day ahead in the huge oven to assure the proper heat. Apples weighing 2,100 pounds were processed in a cannery.

The pie was of the open-faced variety, with strips of crust crisscrossing over the vast surface.

The baking of the pie, was preliminary to celebration of Apple week. Two thousand school children, each of whom had been promised a bite of the pie, milled around the large outdoor oven while it was baking.

PRETTY FROCK IN GREEN AND VELVET

Stone Lillies Found

Stockton, Calif.—Stone lilies dating back to the lower Devonian age of 150,000,000 years ago, are among the fossil specimens brought to the College of the Pacific by Prof. J. H. Jones, head of the geology department, from fossil quarries in Iowa, where he passed the summer.

A fossil fish tooth, 125,000,000 years old, buried in a bit of coralline limestone, which had been kicked about for 15 years in a barnyard as "just a rock," is one of the most valuable specimens on display at the college.

SICK WOMAN SOON RECOVERS

By Taking Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. The way I was, I was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."

Mrs. BERTHA MACHAN, 1124 N. Penn. Ave., Lansing, Mich.

"I had been sickly ever since I was fifteen years old. After taking Lydia E. Pinkham's Vegetable Compound, I got so I could do all my housework and I am in good health."—Mrs. MAURIE K. WILLIAMS, Ketchikan, Alaska.

From Michigan to Alaska from Maine to Oregon and from Connecticut to California letters are continually being written by grateful women recommending Lydia E. Pinkham's Vegetable Compound.

The Compound is made from roots and herbs and for more than fifty years has been helping to restore run-down, overworked women to health.

Are you on the Sunlit Road to Better Health?

Plane's Lure Was Strong

Mrs. H. P. Smith of Los Angeles, Calif., tracing the report that her two-year-old daughter, Betty, had been playing truant from school, discovered that Betty had become a ward of the state. Betty played truant in order to keep the loop with her summer at California field camp. In fact, she had been playing truant for several weeks.

Mrs. Smith found that the airplane in question was one of several small planes that Betty had taken the day before.

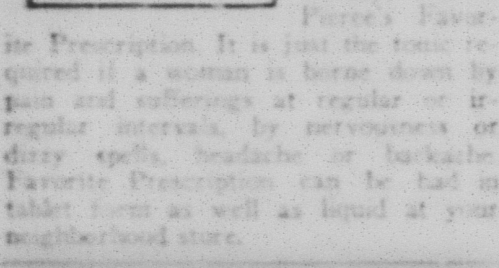

Headaches from Slight Cold

Headache, dizziness, and other symptoms from the flu can be cured by using the Cold Cream for signature of Dr. W. C. Brown on the box.

A Benefactor

A physician who reaches out to benefit humanity leaves a record behind him that is worth more than gold.

Dr. W. C. Brown, his study, his knowledge of the human mind, his knowledge of the human body, his knowledge of the human soul, his knowledge of the human heart, his knowledge of the human hand, his knowledge of the human foot, his knowledge of the human eye, his knowledge of the human ear, his knowledge of the human nose, his knowledge of the human mouth, his knowledge of the human throat, his knowledge of the human stomach, his knowledge of the human intestines, his knowledge of the human rectum, his knowledge of the human bladder, his knowledge of the human prostate, his knowledge of the human testicles, his knowledge of the human penis, his knowledge of the human vagina, his knowledge of the human uterus, his knowledge of the human ovaries, his knowledge of the human fallopian tubes, his knowledge of the human cervix, his knowledge of the human hymen, his knowledge of the human clitoris, his knowledge of the human labia, his knowledge of the human perineum, his knowledge of the human anus, his knowledge of the human rectum, his knowledge of the human sigmoid colon, his knowledge of the human cecum, his knowledge of the human appendix, his knowledge of the human stomach, his knowledge of the human duodenum, his knowledge of the human jejunum, his knowledge of the human ileum, his knowledge of the human cecum, his knowledge of the human sigmoid colon, his knowledge of the human rectum, his knowledge of the human anus.

Indians Losing Tradition

Washington.—If the languages, beliefs, traditions and customs of the Alaskan Indians are not to go the way of those of so many other native American tribes and be forever lost to human history, ethnologists will have to work double time in the next few years. This is the warning brought back from an expedition to the Yukon by Herbert W. Krieger, ethnologist of the National Academy under the Smithsonian Institution.

Mr. Krieger found that the younger Indians have become thoroughly Americanized. For them the past is now a mere ceremonial event of great importance for the preservation of their culture and identity. The hunting of good fish is merely an opportunity for a good time. They have forgotten their own songs and their tribal folk lore. Only the old people remember these things and if they are to be preserved these old people must be interviewed before they die.

Traces Eskimo Sites
Mr. Krieger's expedition was carried out with aid from the Joseph Henry fund of the National Academy.

They are done in old ivory and are examples of an art unlike anything else known from Alaska. The modern Eskimos dig them up from old graves and reuse the ivory for commercial purposes, thus destroying many important specimens.

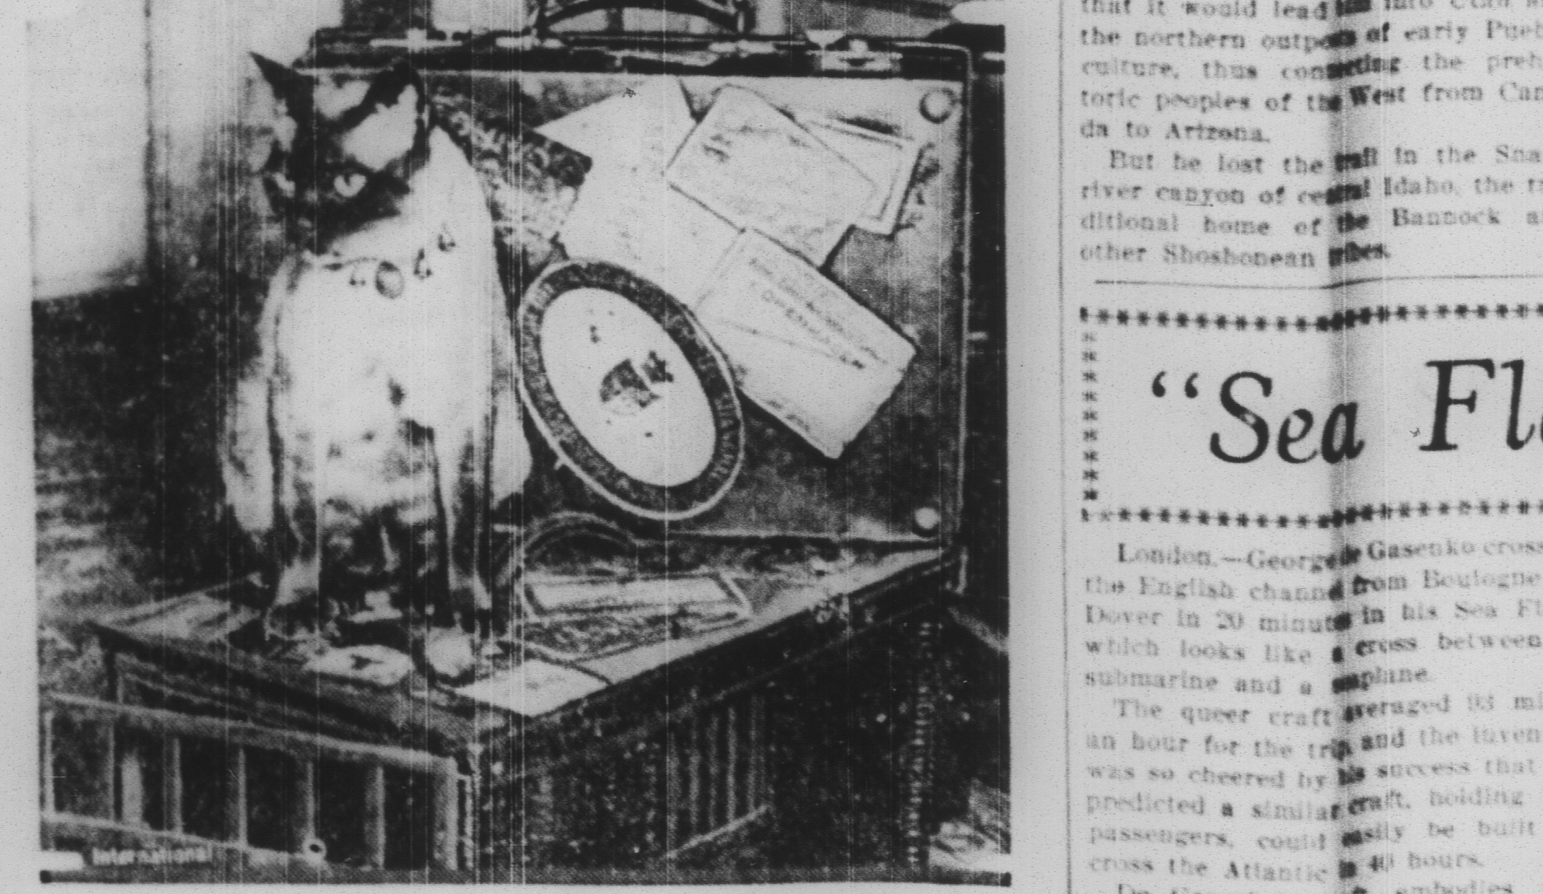

Evidence that a uniform stone culture prevailed at one time from the Yukon down to southeastern Alaska was uncovered by Mr. Krieger. He found certain stone implements, chiefly a type of ax, common to the entire area.

The places visited by Mr. Krieger on the lower Yukon represent the region points between the Eskimo and Indian cultures. Although the interior is now entirely Indian territory, Mr. Krieger found pottery, masks and other objects which imply Eskimo culture. The Indians there have many traditions of having with the Eskimos.

Follows Trail to Idaho
On his way back from Alaska Mr. Krieger continued his explorations for the bureau of American ethnology along the Columbia river. Last year he succeeded in tracing a single prehistoric culture characterized by subterranean circular houses and cremation burials from British Columbia through Washington to Oregon. This year he followed traces of the same culture down the Snake river to Idaho, hoping that it would lead him into Utah and the northern outpost of early Pueblo culture, thus connecting the prehistoric peoples of the West from Canada to Arizona.

But he lost the trail in the Snake river canyon of central Idaho, the traditional home of the Bannock and other Shoshonean tribes.

Royal Cat Making World Tour

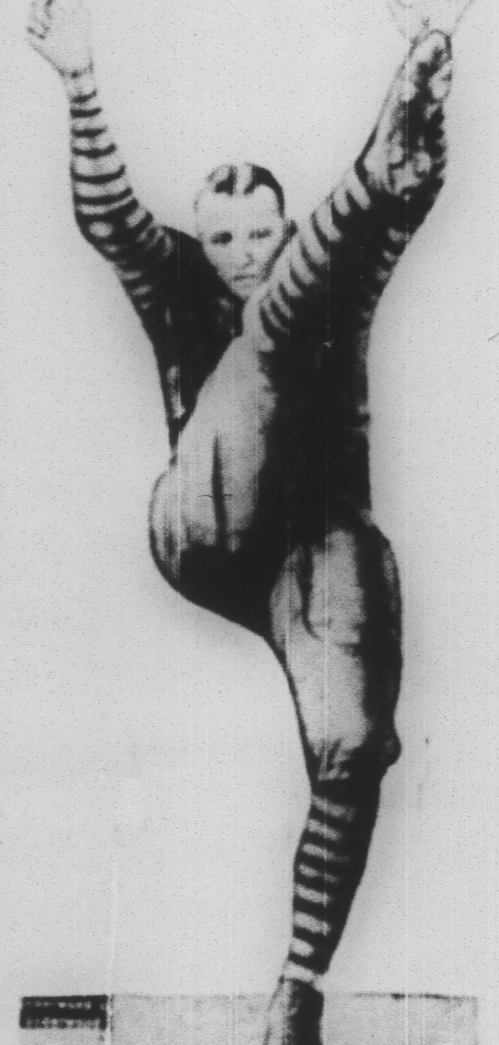

Here in St. Louis, once owned by the king of St. Louis, he appeared on his arrival in New York. The royal meow just returned from Europe following a visit which included many airplane flights. He planned to look over New York and perhaps tour the country.

Stone Lillies Found

Stockton, Calif.—Stone lilies dating back to the lower Devonian age of 150,000,000 years ago, are among the fossil specimens brought to the College of the Pacific by Prof. J. H. Jones, head of the geology department, from fossil quarries in Iowa, where he passed the summer.

HIS RECORD MARRED

The photograph shows Ralph W. Welch, clever Texan playing with Purdue. Welch was an outstanding star in the Harvard-Purdue game, when Harvard was defeated, 19 to 6. However, in the Chicago-Purdue game Welch's fumble cost his team the game, 7 to 6.

New Method Cleans Rusty Water Pipes

New York.—Rust-choked iron water pipes in a 15-story New York office building have been cleared by a new acid solvent, and the vast expense of replacing the whole structure avoided. The process, worked out by F. N. Speller, E. L. Chappell and H. P. Russell of the Massachusetts Institute of Technology, is expected by engineers to become a very important factor in building management.

It has long been known that a solution of hydrochloric acid in hot water will dissolve rust, but the drawback has been that it will also dissolve iron and steel, so that it has never been considered practicable for use on a large scale. The three Massachusetts engineers, however, added an organic "inhibitor" which has the effect of preventing the acid from corroding the metal while still permitting it to attack the rust.

In order to carry out their operations with the least possible inconvenience to the tenants they divided the plumbing of the building into sections, attacking these one by one on Saturday afternoons, so that the sections could get in its work and be flushed out of the pipes before the resumption of business on Monday morning.

True to Form

Bayonet, N. J.—Fred and Stanley Rush, twins and painters, are in a hospital each with a fracture of the left ankle. They fell together 25 feet from a scaffolding.

One of Life's Hardest Moments

"Sea Flea" Speedy

London.—George Gasenko crossed the English channel from Boulogne to Dover in 20 minutes in his Sea Flea, which looks like a cross between a submarine and a airplane.

The queer craft averaged 33 miles an hour for the trip and the inventor was so cheered by its success that he predicted a similar craft, holding 100 passengers, could easily be built to cross the Atlantic in 40 hours.

Dr. Gasenko's craft embodies the principles of water bugs. It draws only three inches of water, although 35 feet long and 15 feet high. The hull is of mahogany two-thirds of an inch thick. With a load of fuel it weighs only 2,000 pounds.

With two small wings and an air plane propeller, the Sea Flea at low speeds skims the surface of the water, but when it approaches its maximum it almost lifts it into the air, and like a flying fish flits from the crest of one wave to the crest of another, maintaining a perfect balance, fighting against seaweeds.

In May, 1923, after several short but successful tests, Dr. Gasenko set out from Marseilles for a trip across the Mediterranean and along the African coast, but the propeller was splintered by a heavy sea and the inventor was obliged to put in at Saintes-Maries, near Arles.

Dr. Gasenko is a native of the Ukraine, but was trained in Germany.

NOTICE! To Livestock Owners

If You Own Any Horses, Cattle, Poultry or Hogs, by All Means Read This!

safeguard your stock against the costly ravages of quack medicine. Nature has provided wonderful health-giving roots and herbs which have proved infallible in thousands of cases. These are combined in a time-tested, reliable remedy, PORTER'S PAIN KING—the standby of hundreds of farmers in this community. They recommend it highly for sores, colds and distemper in horses and for soreness of the udder, caked teats, and blood in cows. Every day chickens are becoming sicker, mopey, and hence there is an increasing use of Porter's Pain King by careful poultry raisers everywhere. It is a positive relief for gonorrhea, ring and parasitic growths. Sick hens are not slow layers.

Use Porter's Pain King at the slightest sign of trouble. Just follow the directions with each bottle. It may save you several hundred dollars. Your dealer guarantees satisfaction or money back. Made and guaranteed by The Geo. H. Rundle Co., Lima, Ohio, since 1871.

WHEN CHILDREN FRET

It isn't right for the little tots to fret and they wouldn't if they felt right. Constipation, headache, worms, fever, irritability, loss of appetite, and a host of other troubles will make a child fret. They need the pleasant remedy, PORTER'S SWEET POWDERS. They regulate the bowels, break up colds, relieve constipation, loosen phlegm, soothe the throat, and clear the skin.

Use Porter's Sweet Powders for over 30 years. All drug stores and Mother's Own Store, 100 West 42nd St., New York City, N. Y., have them. Address THE MOTHER GRAY CO., La Ray, N. Y.
