Bondy and Salovich were found guilty December 21 and were each sentenced last Wednesday to serve a year and a day at the Federal Penitentiary at Atlanta. SPECIAL TRIPS AID MUCH IN STUDY OF CHILDREN. School journeys to museums, historic shrines; public buildings; industries and the field, are becoming common practices in Pennsylvania. These places are being widely used as laboratories, in which teachers and pupils do much of their school work.

This practice has been greatly stimulated through the publication of the Department of Public Instruction of a school journal bulletin. Children are finding their school assignments far more interesting through participation in civic en-

terprises; studying nature in the field; seeing functions and relationships first hand; dealing with history through projects and visits to spots in which history was made; or through the use of instruction in the schools of Pennsylvania is being increasingly organized around life situations with the result that school and life are being more closely related, officials of the department believe.
