

COLLEGE **FRIENDSHIP**

By THOMAS ARKLE CLARK Deap of Men, University of

૿૽૱૱૱૱૱૱૱૱૱ઌઌઌઌઌઌઌઌઌઌઌઌઌઌ HE fraternity was celebrating the fortieth anniversary of its founding and they had come back, these three old boys, to take part in the celebration. One was a banker and one was a lawyer and the third was a physician, high up in scientific accomplishment. I was simply an onlooker, a grand officer of the organiastion. I would be introduced at the hanquet with the old familiar phrase, We are very fortunate to have with us this evening," etc., but I really who counted. Past sixty they were and charter members, and friends through more than forty years.

There are no friendships, it seems to me, quite like college friendships. Boys come together at a most impres-sionable time of life. They are away from home probably for the first time, very often they know no one, and posship they are desperately homesick. There is the community of interest imstely, a bond of sympathy, a mutoal understanding and a mutual helpss. It was thus these three had

They came into the chapter house. gray baired, the slenderness of youth gone, as was the spriteliness of youth. The active men-boys, I might better ony as befitted their age. They expected dignity and a certain reserve, but the old men greeted each other as in the old days.

"Hello, Ed."

"Well, you old buzzard, Lige." "And here's our little Willie boy!" They sat with their arms around each other; they told old tales of halfforgotten escapades, of tricks they had played upon each other, of the clever ways in which they had kept the wolf from the door, for none of them had an easy life in college. Each man had succeeded in his own way, but it was not of this that they talked; it was of the old days, of the old friends, the old tasks, and as they talked they seemed to grow closer together. They were inseparable. They wandered over the old college grounds; they sought out the places where they had lived, they strolled down the old walks as they had done when their sweethearts were with them forty years before. They said nothing serious; they gave no wire advice to the young fellows. There was no regretting misused hours while in college. They were simply grating all the joy and happiness out of the reunion that it was possible to

Their speeches at the banquet were all hamorous speeches, only at the last ensument there was a little ceremony, ctor was presented with a eweled pin in recognition of so service he had rendered to the chapter, and some very tender words were said The judge pinned the emblen on, and there were tears in his eyes. and there were tears in everyone's they smiled and wiped the tears out

"Aren't we fools?" they said to each

****** Warns Against Buying

Seed Corn Carelessly Washington.-Unless the buyer knows that the seller is weliable and can supply the kizd of seed he offers, extreme care should be exercised in purchasing seed corn, the Department of Agriculture warns.

"Unfortunately," it says, "there are likely to be many individnals who will offer to sell crossed seed at a high price when the seed is little more productive, if any, than ordinary seed corn.

The supply of superior crossed seed, the department advises, is

comparatively small. *

Washington. - Discarded American | Greeks from all parts of the peninsula, | up into the city, give Saloniki a modern appearance. Here and in the commercial district there are shops, coffee houses and a few fine old residences. The westerner at once notices a lack of parks and other open spaces, but a peep through an open door to a courtyard in a narrow side street reveals that most of Saloniki's beauty is hidden behind high walls.

> "In the dirty streets barefoot women plod the rough cobble with loads of wood tied to their backs that one might hesitate packing on a donkey. Smiling, ragged water boys and girls in tatters carry their heavy jugs. Milkmen, too poor to own carts, are weighted down by two five-gallon cans resting upon their backs until their bodies are at right angles with

Use American Street Cars.

"Successive fires and pilferings have destroyed historic landmarks One of its oldest existing antiquities is Varder street, which cuts across the city. It was a part of the old Roman highway from the Adriatic to the Bosporus, which earlier still was the Royal way of the Macedonia kings. Where the Roman legions, the phalanxes of Alexander and the immortals of Xerxes trod its surface, an American street car rumbles, driven by a modern Greek or Spaniard. In its course it runs under an old Roman

"Some of the Saloniki churches survived the fury of the Middle ages and are the finest remains of the past. "The Greeks have suffered by re-maining in Salonikl under foreign regime, but one source of inspiration to them has been the sight of Mount | Aaron has been fitting himself for reg Olympus towering among the hills to ular duty in the infield in case there the southwest."

Their principal diet was shellfish and the shells they threw out piled up into heaps thirty feet high and hundreds of feet long. The Smithsonian institution's re-

ument the refuse of the food they ate.

cent expedition under Henry B. Collins, Jr., determined the point about which there had been some uncertainty, that these shell heaps were really kitchen middens and not artificial structures with some other signifi cance. The proof is that all the shell heaps investigated were stratified with ashes, small animal bones and other refuse from the kitchen.

The language of the Calusa, except for a few isolated words and place names, is lost, little or nothing is known of their beliefs, customs or material culture. Some mounds of soft beach material and loose sand do exist, some of which were foundations for houses, and others burial mounds. Mr. Collins excavated several of these. His most important find was of twenty-five well preserved skeletons in a single mound.

Most of the bodies had been folded with the knees to the chin and burial was very close together. The skeleons were excellently preserved. The burials probably took place before the coming of the white man, since only one bone was found with any evidence of disease and the artifacts associated with the burials were purely of native origin. The only objects in the way of mortuary offerings were pieces of broken pottery placed around the heads, an arrangemen not known among other Indians. The nound contained no other artifacts.

SIGNS WITH INDIANS

Cleveland will have a place for Aaron Ward this year even though that place is on the bench. He's a valuable kind of player to have around, opines Manager Peckinpaugh, and Peck teamed with him last year on the White Sox and should know.

Wheat Without Soil

relief in Beirut, Syria, where 105 cases San Francisco.-Growth of a superwheat that reached maturity in 13 of smallpox and 22 deaths have just been reported by cable. Miss Steiger weeks with neither soil nor sunlight was in charge of medical work among was announced here by the University 150,000 Greek refugees in Samsoun on of California. Wheat, under field conthe Black sea during the Christian ditions, often requires five months to evacuations from Turkey when epi-demics of smallpox, scarlet fever, mature.

The announcement follows completion of lengthy research in a laboratory on the university campus by Prof. A. R. Davis of the division of agriculture chemistry and Prof. D. R. Roagiand of the division of plant nutrition. The experiment is recognized by

these scientists as of the widest pos-

The wheat was grown, it was revealed, in a greenhouse laboratory, where artificial light was furnished by means of 12 argon-filled lamps of 300 candlepower each and where jars of water containing the chemical elements necessary for plant growth replaced the soil which ordinarily con-

The quality of the wheat at maturity, the professors declare, was much higher than that raised under field conditions and could be classi fied as being of a "supernature." The fact that the wheat was grown

to maturity in 13 weeks, a previously unheard-of achievement, demonstrates according to the investigators, that

the length of the light period is important to growing plants.

The lights applied to the wheat plants were turned on for 16 hours a day, and this kept them growing rapidly. With the doubling of the light exposure the plant development was multiplied by four, the professors revealed, and when the light was applied for a full 24-hour day the growth was "astounding."

Previous experimenters in these pioneer field were troubled by the infrared, or heat, rays from the lamps and used a water screen to solve the problem. But this was an unsuccess ful solution, and Professor Davis found the correct one. He circulated air through the glass chamber by means of an electric fan.

It was established that the sun rays which contribute to plant growth were | failed to amass a fortune.

present in the electric light rays, even to the longer ultra-violet rays.

MEAT SCRAPS OR MILK IN RATION

Home-grown feeds should be used much as possible in the ration of the farm flock, but grain feeds should be balanced with milk or meat scraps or both, says George Ghostley, poultry specialist of the agricultural extension service of the University of Minne sota. Ground feed called mash, as well as grain, is necessary. The following will give good results, he says: Grain-Cracked yellow corn, two parts; wheat, one part, and heavy oats a half part.
Mash—One hundred parts each of

bran, middlings, ground yellow corn, ground oats, and meat scrap, three parts each of salt and charcoal. Milk is an extremely valuable food for poultry-more valuable even than for hogs. Feed skim milk or butter-milk if possible. Reduce the meat scrap one-half if there is milk before the birds all the time. If they have milk only to drink the meat scrap can

be scrapped entirely, particularly if

per cent more bonemeal is added to the mash.

One pint of cod liver oil to each hundred pounds of mash, mixed first with charcoal and then with the other ingredients, makes a valuable addition to the ration. The mash should be before the hens in hoppers or feeders all the time. More grain than mash should be fed during the cold weather with the reverse the case in summer Feed lightly of grain in the morning Warm water, oyster shell, grit and

green or succulent feed such as alfalfa clover leaves, mangels, carrots, cabbage, cull potatoes, rutabagas or sprouted oats should be furnished. Changes should be made gradually.

White Hollands From

Original Wild Turkey White Hollands are thought to have originated from sports of the original wild turkeys, and perpetuated by selection and breeding. In fact, some information leads to the belief that the White Hollands were perfected in Europe, where range was restricted and nomadic habits most desirable, and then later returned to America by some of the early Dutch settlers. This may be largely based on the docile, domestic temperament, characteristic of White Hollands, which would indicate the restricted areas of Europe of that day, rather than America. Too, White Hollands are said to have been fairly well-known in England early in you'll like the course the Nineteenth century, and it may be due to their foreign invasion so to correspondence. speak, that they were later to become vell known in the land of their nativity, than were some of the other standard varieties which were perfected in America.

Keep Poults Hungry for

First 48 Hours Anyhow Turkey poults should not be fed anything the first 48 hours after hatching. If they have free range, they will pick up some seeds and insects which will vary the amount and kind of feed that may be needed after 48 hours. It is best always to keep them just hungry enough so they will be hunting feed and getting the exercise that is required for best growth and livability. Hard-boiled eggs chopped fine and mixed with cornbread crumbs have been found generally satisfactory the first week, after which whole wheat and hulled oats are good. Keep them out of wet grass until they are well along. Three litters of eggs per year are generally about all that will be satisfactory to hatch, because late-hatched poults are likely to be less thrifty.

Kill Harmful Mites

by day, but come out and suck their pound baby, for instance, needs twenfill of blood when the birds are roost- ty-four ounces of fluid. Later on the cleaned thoroughly. Trash, nesting of body weight. The amount of fluid material, etc., should be taken out and absorbed by a breast-fed baby is best burned. Then go over the whole house determined by weighing him before thoroughly with crude petrofeum or and after feeding for the whole day; carbolineum, using either a spray pump and it is easily calculated for the botor brush to supply the material. Pe- tle-fed one. Then make up any detroleum is cheaper but the carbolineum ficiency with water. gets into the cracks better and lasts

Geese for Breeding

breeding purposes, provided the older stipation, sour stomach, loss of sleep, bird is in good health. Young geese will often lay during their first year, but the eggs are usually infertile and the number produced is seldom as high as would be produced by an older female. Females of the Canadian breeds do not lay, as a rule, until lates baby's bowels, makes him sleep they are three years old, but females of any of the breeds may be kept for breeding.

Eggs for Chicks

Eggs that are tested out of incuba tors up to the 14th day make good feed for young chicks if properly prepared. They should be boiled for at least 30 minutes so as to kill all germs that may be in them. Then pulverize them in a jar or some container, using a square stick that will thoroughly mix the contents and pulverize the shell as well as the interior portions. The only danger in feeding eggs lies in not cooking them long enough or overfeeding.

MOST people know this absolute to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Bayer Aspirin without it! A drugstore always has Bayer, with the proven directions tucked in every box:

Program for Evening Formally Called Off

well-known radio announcer was spending the night in the home of a friend. The host did not know that he was an accomplished snorer, and had given his guest the adjoining room, from which any sound was perfectly audible. They were just comfortably settled for the night when the announcer started "broadcasting. The entertainment was not favorably received, and the host was unable to sleep a wink and was contemplating some means for muffling the disturbing noises, when his guest stopped snoring abruptly and in a loud voice

"Ladies and gentlemen, the program to which you have been listening is being broadcast to you through the courtesy of Blank & Co.," and with this he shifted his position and they both spent the remainder of the night
