

Make a Toy of Baby's Nerves Have Nervous

Dr. Peery's
Verdigris
The nervousness in older babies is traced to the over-irritability of infancy, caused by the over-stimulation of the nervous system. Dr. Peery's Verdigris is a safe, reliable, and effective remedy for the treatment of nervousness, irritability, crying, and sleeplessness. It is a purely vegetable preparation and is safe for all ages.

Rot in Sheep and Hoofs of Cattle
BALSAM OF MYRRH
Prevents rot in sheep and hoofs of cattle. A powerful antiseptic and disinfectant. Sold in 1/4 oz. bottles for 50c.

Proportion
The proportion of the body is important in health and beauty. Dr. Peery's Verdigris helps maintain a healthy proportion by relieving nervousness and promoting a healthy sleep.

Lydia E. Pinkham's Compound
I have used Lydia E. Pinkham's Compound for nervousness and I have used Lydia E. Pinkham's Compound for constipation. I can certainly praise your medicine for what it has done for me and I wish you success in all your work. I can do any kind of work when women ask me to. I will answer any question about them. Gresham, Route 3, Box 625, Texas.

How Do ANY WORK
I have used Lydia E. Pinkham's Compound for nervousness and I have used Lydia E. Pinkham's Compound for constipation. I can certainly praise your medicine for what it has done for me and I wish you success in all your work. I can do any kind of work when women ask me to. I will answer any question about them. Gresham, Route 3, Box 625, Texas.

To Beauty and Charm
Nothing so marvellous as the beautiful face as the inevitable lines of fading suffering caused by old, aching feet. ALLEN'S FOOT-POWDER, the Antiseptic Healer, Healer, Healer, Healer, Healer. It is a Tonic, It is a Tonic, It is a Tonic. In your shoes in the morning. Shop all day. It is a Tonic, It is a Tonic, It is a Tonic. It is a Tonic, It is a Tonic, It is a Tonic. It is a Tonic, It is a Tonic, It is a Tonic. It is a Tonic, It is a Tonic, It is a Tonic.

Educational Drawback in Failure of Teachers to Understand Pupils

By DR. ALFRED ADLER, Viennese Psychologist.

THE most common error in education is the failure of the teacher to understand the coherence of the child's living. The "problem child," the class "bad boy," is scolded and punished, but that is about as foolish as for a physician to call on a man who has broken his leg and say, "Aha! I see you've broken your leg—for shame!" If the teacher will put herself in the bad child's place she would see that, according to his lights, he is acting intelligently. He has either been pampered or hated and has grown into an atmosphere of alienation, feeling nothing in common with others around him and wanting to be aloof.

To discover the child who steals, and punish him, does not correct the evil; it increases his sense of the sport of the thing and only sets him to figuring out what his mistakes were which led to his discovery so that in future he can avoid them.

The progress of education has been greatly retarded through the stress placed on the inheritance of abilities. To say that one child is gifted and another stupid is to retard both. The gifted child is stumped by thinking too much is expected of him, and the stupid one comes to think it is futile for him to try to achieve anything. Mankind is as a species tremendously timid. We need encouragement, not discouragement. We need to be taught, what is really the truth, that we can be anything we want if we will train ourselves properly for it.

Entrance Requirements for Colleges Savor Too Much of Medievalism

By DR. GEORGE W. FRASIER, Colorado Educator.

American liberal art colleges, which seem not to be interested in the future of public education for the masses, should strive to discover the kind of students they want rather than how they have been prepared. Preparing for entrance to one of the average eastern colleges wrecks the high school career of thousands of boys and girls. The subjects, Latin, essay writing, English classics, "dry as dust ancient history," as taught in high schools prepare for nothing in the world but college, and it takes a confirmed optimist to see how they do that. Liberal arts colleges should not prepare high school teachers and these colleges should drop specific matter requirements for entrance and also drop the type of specific examinations demanded by the college entrance board.

For present entrance requirements I would substitute judgment of the student's intelligence and character and evidence of the accomplishment of whatever kind of high school work he may have chosen. The present domination of the colleges over the high schools would be a good thing for the high schools if these colleges had a conception of education as something to do with modern life. But the average college of this group still clings to its medieval curriculum.

Older People Not Justified in Condemnation of the Youth of Today

By DEAN C. M. WOODWARD, Emory (Ga.) University.

Since youth today possesses more information and knowledge, is more intelligent than their predecessors, it is necessary to impress them with the reality and character of God in order to get them to co-operate with the moving force behind the universe. Youth today knows more about the world in all its phases than those of any other period in the race's history and youth today has a wider freedom of choice than youth has ever had. With all its progress in every branch of human activity, the world has not had time to devise means of handling the knowledge it has obtained. I wonder if older people are justified in criticizing the youth of today. In my opinion, youth can be relied upon. The change from the home of the past, when authority and discipline held sway, and the present condition when the child has about as much contact with other spheres of life as the home, emphasizes the need of development of internal control and youth should be made to realize the reality and character of God. By using intelligence youth can co-operate with God in the development of a world personality.

Wage Earner Seeks Only Opportunity for Full Free, Comprehensive Life

By WILLIAM GREEN, President A. F. of L.

Organized labor considers wages of first importance because wages are the basis of human activity and human enjoyment. The working man must depend upon wages for the education of his children, for old-age protection, for the care of dependents when he is incapacitated. He seeks reasonable hours of employment that he may relax from exacting toil, so that he may have time to think, that the better part of his life may be developed, because man was not made to slave and die. There is something better in man. He must be given opportunity to live a full, free and comprehensive life.

We have increased wages, shortened hours, improved work conditions, but, in addition, we have secured enactment of laws that have brought many benefits not only to wage workers directly concerned, but to the community. We were the pioneers in compulsory education for children. We prefer to see America's children in the school house and playground rather than toiling in factory, mill and mine.

Belief in Immortality Has Its Foundation in Accepted Natural Laws

By JOHN HAYNES HOLMES, New York Community Church.

I believe in the immortality of the soul exactly as I believe in the law of gravitation, or the theory of evolution, or the magnificent vision of a fourth-dimensional universe. What science consists of, in its higher reaches, is speculation as to the ultimate meaning of the facts of observation and experiment. These facts must be explained and man's explanation constitutes a generalization which we call a natural law. We do not doubt these scientific facts. We accept them as a part of the great body of scientific truth. But at bottom they are all theories, deliberately conceived to explain facts otherwise unexplainable. Immortal hope is a generalization of the same kind. There are facts of human life that cannot be explained without the postulate of an immortal soul.

POULTRY

ALL-MASH RATION GIVEN APPROVAL

All-mash poultry rations, for both growing chicks and laying hens, are suggested in the most recent bulletin on poultry procedure issued by the extension service of the Ohio state university. "The newer idea of poultry feeding favors the feeding of all the ingredients ground, mixed, and fed as a mash," says Prof. A. R. Winter, of the poultry husbandry department of the university, author of the bulletin.

"The method is simpler, more sanitary, and more economical in the use of the feed than where the ration is fed partly as scratch grain and partly as mash. Since birds prefer a granular mash to one finely ground, it is advisable not to grind the ingredients any finer than is necessary to prevent the chickens from picking over the material and taking out what they like best."

Two "starting and growing" rations, both of them all-mash, are listed in the bulletin. Three all-mash rations and one scratch grain and mash ration are suggested for laying hens.

The first starting and growing ration, a mash, consists of:

- | | |
|---------------------------|-----------|
| Ground yellow corn | 72 pounds |
| Wheat middlings | 20 pounds |
| Meat scraps (50% protein) | 5 pounds |
| Poultry bone meal | 2 pounds |
| Salt | 1 pound |

Skim milk instead of water is given to drink during the first eight or ten weeks. Other forms of milk may be substituted.

The first ration suggested for laying hens is:

- | | |
|---------------------------|-----------|
| Ground yellow corn | 65 pounds |
| Middlings or ground wheat | 20 pounds |
| Meat scraps | 10 pounds |
| Bone meal | 4 pounds |
| Salt | 1 pound |

Water is given to drink. If milk is available, the meat scraps in the ration may be reduced to five pounds.

The bulletin discusses 21 feeding materials for poultry, with reference to their constituents and the particular feeding purpose for which they are available. It is entitled "Poultry Feeding Stuff and Rations" and may be obtained by writing to the agricultural publications department of the Ohio state university.

Toulouse Best Goose Breed for Marketing

The best breeds of geese for market are the Toulouse which is sometimes called the Land goose because it does not seem to miss the water; the Embden geese which are white and are profitable market geese, and the African which are nearly the color of the Toulouse and are also fine, large market geese. These are smaller, however, weighing only a little more than one-half of what the others do. Whenever Canadian geese are used to cross with the three or four above mentioned breeds, this cross produces a hybrid goose which is called a mongrel goose on the market. They are considered a great delicacy and bring the highest prices of any poultry per pound. Only a few of them are raised, however, as the demand is limited.

Successful Incubation

Successful and careful incubation, in the case of either duck or chicken eggs, is one of the first and most essential steps towards a strong, healthy flock. Many early chick losses are due to improper incubation and much of the low hatchability of eggs can be traced to poor incubator management. As a consequence, care to details at this time will mean dollars and cents for the poultryman when selling or egg-laying time comes.

Goose Septicemia

There is a disease of geese and goslings known as goose septicemia which causes sudden death. This is a disease undoubtedly due to poison in the feed. No cure is yet known. Sanitary conditions will prevent the disease. The healthy goslings should be removed to new quarters, a coarse mash should be fed and everything kept as clean as possible. With clean water and a fresh range there should be no trouble to raise them.

Raising Baby Chicks

Raising baby chicks is not such a difficult operation as some would think. Yet a few things are necessary for proper care and raising of chicks. You can raise chicks without much preparation or very much equipment, but your losses will be heavy and your profits will be little if you do not use the proper methods. You should be prepared to receive the chicks so that when they come you will not have to delay putting them in their future home.

Dirt Floors Poor

Dirt floors are the poorest kind for the poultry house because of the great amount of labor required to keep them clear through each year. Board floors are better than dirt but are hard to clean thoroughly. Concrete floors are the most sanitary and economical. It pays to put in concrete floors in the spring or early summer so they will have time to dry out before the hens are housed for winter. The concrete floor should be 6 or 8 inches above the outside soil.

NEW DRAPERIES for A FEW CENTS By Mae Martin

All of us realize nowadays how brightly colored draperies seem to invite people in, and how warm touches of color in spreads, cushions and runners help to make us love our own surroundings.

No woman need deny herself these touches of cheer, because they can easily be had at the expense of a few cents and a little planning. Curtains may be faded or drab in color can be made bright and pleasing with a package or so of Diamond Dyes. Then spreads, covers, runners, etc., can be tinted or dyed to match. Anyone can do it. Tinting with Diamond Dyes is as easy as bluing, and dyeing takes just a little more time. Brilliant new colors appear like magic, right over the old, faded colors. Diamond dyes give true, fadeless colors. They are the kind of dyes used when the cloth was made. Only Diamond Dyes produce perfect results. Insist on them and save disappointment.

My new book, "Color Craft," gives hundreds of dollar-saving suggestions for beautifying your home and clothes. Sixty-four pages, fully illustrated in colors. It's FREE. Just write Mae Martin, Home Service Department, Diamond Dyes, Burlington, Vermont.

Poor Diplomacy

House Agent—By the way, sir, I suppose you can let us have a banker's reference? Just a formality, you know.

Client—Well, I could; but I'm afraid it would only disappoint you.

A wise old lawyer says that a cross-examination should be a good-natured one.

The proudest moment in a successful man's life is when he tells how he got there.

Culture doesn't always make a gentleman. Some very large beets are cultivated.

How Terrible!
Betty—I stood up in the tub, reached for the bathroom light and when I turned it on I got a fearful shock.

June—Who was in there?

Bad Outlook for Some Girl
Raymond is six years old. One morning in school his teacher was trying to impress upon the children the idea of self-reliance. "Your fathers and mothers work for you now," she said, "but what will you do after you are grown? Who will work for you then?"

Little Ray's hand went up instantly. "Wives, of course," he shouted.—Boston Transcript.

A Lucky Break
The dinner menu of a North side family included corn-on-the-cob, considered a delicacy by the youngest member, a husky ten-year-old. As luck would have it, sister was going out for dinner, and so when the call to "come and get it" was sounded, she was upstairs dressing.

"Hey, sis, come on," the younger said, as he gave his companion a final pat in front of the mirror.

"No, I'm having dinner downtown," she answered.

"Are you? Hot dog! Can I have your part of the corn?" he asked excitedly.—Indianapolis News.

That Stomach of Yours!

Frankfort, Ky.—"For many years I suffered with stomach trouble; my food would not digest, it would sour on my stomach and cause me to be distressed and cramp until I would be almost bent double with pain. I was extremely nervous could not eat or sleep and was near a physical wreck when I was advised to take Dr. Pierce's Golden Medical Discovery. It soon relieved me of my stomach trouble and built me up in health and strength. 'Golden Medical Discovery' did wonders for me and I am glad to give it a recommendation."—Mrs. Maria E. Cox, 682 Kentucky Ave., All Dealers.

Put up in liquid and tablets.

It was woman who invented all the dishes she has to wash. Men preferred to eat out of the pot.

The Ideal Glare Protector!

Safe for the eyes. No glass to break! If you drive a car, read or work by artificial light, Protecto Shield will be a welcome comfort for your eyes. They eliminate GLARE. In night driving a slight tilt of the head eliminates the glare of oncoming cars, set you save clear vision of the road. The Safety Director of an Eastern Traction Co. equipped his night crew of Motorists with Protecto Shields. They are most practical.

If your dealer cannot supply you, send \$1.00 for pair postpaid. Money refunded if you are not entirely pleased. Dealers write for wholesale prices. Choice territories open to high-grade specialty salesmen. Protecto Shield Inc., 18 Edinboro St., Boston, Mass.
