"Gate of the Gods"

It was the idea of the Chaldean and Platonic philosophers that the "gate of the gods" was located in Capri-cornus, says Nature Magazine. Through this gate souls released by death returned to heaven, while through the "gate of men" in the constellation of Cancer, souls descended from heaven in the bodies of men. The positions of these two "gates" correspond to the positions of the two solstices, winter and summer respectively.

Catalina Island Yields Many Ancient Treasures

Avalon, Santa Catalina Island, Cal. —An attempt to follow ancient trails to the long-lost island temple of Chingichinch, the Sun God, has resulted instead in the discovery of the burial place of a small Indian princess of 3,000 years ago and evidence indicating that child sacrifices were made in wholesale fashion by tribes of the Channel Islands, off the coast of California.

Within a stone urn weighing 134 pounds and fashioned skillfully as though by modern tools was found the skeleton of an Indian girl between five and seven years. Her hands apparently had clutched the rim of an urn, whose rich ornamentation of wampum bespeaks her royal lineage.

In a circle with the urn as a center were counted by Prof. Ralph Glidden, curator of the Catalina museum of Channel Island Indians, the skeletons of 64 children buried in tiers four deep with small heads touching each other.

Beneath them was the skeleton of a seven-foot man. A spear blade still was fixed in the ribs.

The sand within the funeral urn had the appearance of ground crystal — apparently, according to the discoverer, a sacred sand used in the burial of Indian royalty—and was far different from that which had sifted over the graves of the other children. These finds as well as a wealth of obsidian knives, spear points and arrow heads and hundreds of other articles of wampum-inlaid stone and bone have provided material over which Glidden has puzzled since he discovered them.

One thin piece of slate he believes to be a stone map, holes having been drilled to indicate trails to the four main burying grounds on Santa Catalina Island.

"It is plausible," Glidden said, "that the strange child burial within the urn and those surrounding it were the result of a natural death of a little girl of high rank and the slaying of 64 attendants and playmates with her. Or they all may have been killed in some religious ceremonial rite."

"It is even possible the princess may have been given some potion and buried alive. The way the small hands clutched the outer rim of the bowl makes this a possibility."

Wampum inlaid in four broken circles on the rim of the urn with "gates" leading to the four points of the compass lead Glidden to believe the burial place may be near the site of the temple of Chingichinch.

Butter Stored for Winter

The Department of Agriculture says that for butter, to be stored for winter use, pasteurized sweet cream should be used, churned at a low temperature and the butter washed so that it will be firm and waxy. Rolls or prints of butter should be wrapped in parchment butter paper, placed in a stone crock, and covered with strong brine. Butter should be stored in as cool a place as is available and in a place free from odors likely to be absorbed by the butter.

Popular trio—three meals a day.

When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal. Phillips does away with all that sourness and gas right after meals. It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Milk of Magnesia neutralizes many times its volume in acid. Next time a hearty meal, or too rich a diet has brought on the least discomfort, try—
