

Sophomores and Freshmen in Picturesque "Brawl"

These "knights," mounted on human steeds, are taking part in the annual "brawl" of the sophomore and freshman classes at St. Mary's college, near Oakland, Calif. The sophs triumphed.

Bull Fights Plane; Tosses It on Horns

Dover, Del.—Just how resentful a bull can be toward an airplane was demonstrated when a plane landed in the Raughley field.

HORSE BETRAYS THREE ROBBERS

Toronto.—An amateur detective once won fame by finding a missing horse; and, when asked what method he had followed, replied: "I figured out where I would go if I were a horse; then I went there, and there he was."

Garage Man Knows Tricks of Own Car

Hot Springs, Ark.—When Bill Briggs, local garage electrician, informed police his car had been stolen he told them if the thieves drove it more than 15 miles an hour it would burn up.

Horrid Pilot Fights Rattler Mile in the Air

Scott City, Kan.—An unprecedented battle in the air between a horrified pilot and a rattlesnake was verified when "Happy" Wiggins, aviator, obtained snake bite treatment at a Scott City hospital.

Canadian Girl Revived After an Hour in Water

Winnipeg.—Floating face down, seven-year-old Mary Calder was taken from the water and pronounced dead. But members of the St. John's Ambulance association happened to be in the crowd that gathered. They went to work. At that time they did not know the little girl had been in the water so long.

Snake Picks on Youth, Who Bites It to Death

Wooster, Ohio.—There was a snake about these parts that tried to bite and got bitten.

Kittens Adopted by Hen "Open Their Eyes" Soon

Colorado Springs.—A hen adopted four kittens at the home of F. D. Richardson and took them into her coop, where she defied the efforts of the mother cat to recover them. When the kittens' eyes opened, they abandoned the hen in favor of their natural mother.

Black Cats Blamed

London, England.—A wagon and a motor car collided when both sought to avoid two black cats who were fighting in a road.

Study of Pterodactyls of Value in Aviation

Further study of the structural details of the bodies of the pterodactyls, extinct flying reptiles, would bring to light new secrets of flight resulting in greater efficiency in modern aircraft, is the belief of Prof. D. M. Watson of the University of London.

The wings of the pterodactyls consisted of sheets of leathery skin of a very tough texture quite similar to the material of the wings of a bat. The bones of these creatures were hollow and spongy, with internal ribs added throughout to give strength and lightness at the same time.

These admirable flyers became extinct and were replaced by the less efficient flying machines of the birds because of climatic changes, scientists believe. When the climate gradually changed from a tropical to a colder one the pterodactyls succumbed because they were cold-blooded.

Nests Prove Birds to Be Master Architects

The word nest is pretty of itself and expressive of all homeliness. In the kingdom of the birds, writes J. R. Raynor in the London Daily Telegraph, there are homes which are masterpieces of instinctive architecture, all varied in design, but each one built to serve the great purpose of home and family.

Chicago Has a New Kind of Beacon

A close-up of the reflector light on the new La Salle-Wacker beacon in Chicago. The eight parabolic mirrors, each five feet in height, magnify and reflect the rays of the sun during the day, and at night red neon lights are reflected in the mirrors, sending out beams to eight points of the compass.

Eyes of 10,000 Toilers Are Saved

Use of Goggles Proves Boon to Workers in Industrial Plants.

New York.—More than 10,000 eyes and at least \$40,000,000 were saved in two recent years among 583 plants, employing a total of 500,000 workmen, according to the report of a study entitled "Eyes Saved in Industry," just published by the National Society for the Prevention of Blindness and the National Safety Council.

Clocks Stop When This Woman Gets Near Them

London.—A woman whose face or person actually stops clocks is now living in London, persons who know her insist.

First Study of Its Kind

"In this study, the first of its kind ever made," explained Lewis H. Carris, managing director of the National Society for the Prevention of Blindness, "it was assumed that an object which hit a goggle lens with such force as to pierce or shatter the lens would most certainly have so damaged the eye, if the goggles had not been worn, as to cause complete or nearly complete loss of vision. It was assumed, further, that every instance of a goggle lens bespattered by molten metal or by corrosive or otherwise injurious chemicals represented an eye saved."

Huge Financial Loss

"This is due largely to the fact that innumerable persons, employers and employees alike, still do not realize or do not believe that it is possible to prevent accidental eye injuries in the particular occupations in which they are engaged. It is due also to the failure on the part of employers or employees and communities at large to appreciate the tremendous financial loss resulting from the blinding of men and women in industry."

SEVEN WIVES ARE RIGHT NUMBER IN THESE TRIBES

Mexican Indians, Primitive in Extreme, Pay Little Heed to Faraway Government.

Mexico City.—The Huichos and Cora Indians in the state of Nayarit see no reason why an authority far away which has never done a thing for them, such as the federal government of Mexico, should now tell them what to do, after sending its agents in May to count them.

It seems that some of the census takers discovered that all Indians whom the circumstances favored had more than one wife. Instead of over-looking this, the officials persons reported it and now the Huicholes and Coras are in water that is likely to get hot.

Though among the most primitive Indians ever found in Mexico, if not in the western hemisphere, the Huicholes and their kin tribe know that the week

accidents, such accidents are still considered by many persons inherent or unavoidable accompaniments of certain industrial processes. Despite the tremendous financial savings through accident prevention publicly and authentically reported by some of the leading industrial concerns of America, there are still thousands of employers who regard as an unavoidable (though evil) necessity the payment of thousands upon thousands of dollars for destruction or injury of the eyes of their employees.

over the hands of timepieces is a charwoman in a London suburb. Doctors, commenting on the phenomenon, said that the skin of certain persons often contains chemical properties which may react on various metals and elements and that the charwoman's skin may set up a reaction strong enough to affect the delicate mechanism of a clock or watch.

May Cost Man His Life Long Beach, Calif.—The metal button on the top of David Rizer's cap may cost his life.

Rizer, an operator in an electricity distributing station, was found on the floor in front of the station switchboard—the inside of his cap in ashes, and his hair burned off. The police said the metal cap button touched a switch, sending the full current through Rizer's head and body.

their legs uncovered, trousers having a hampering effect upon motion, they say.

Senior Porfirio Aguirre, an archeologist connected with the National museum, is now fitting out an expedition that is intended to bring to the world the first authentic account of Huicholes and Cora life. The two tribes speak a language of their own and know no Spanish.

Kittens Adopted by Hen "Open Their Eyes" Soon Colorado Springs.—A hen adopted four kittens at the home of F. D. Richardson and took them into her coop, where she defied the efforts of the mother cat to recover them. When the kittens' eyes opened, they abandoned the hen in favor of their natural mother.

Black Cats Blamed London, England.—A wagon and a motor car collided when both sought to avoid two black cats who were fighting in a road.

Don't forget you have a date every Wednesday night at 9:00 P. M. (Eastern Standard Time) over Stations WJAS-WLBW.

"Ah! Such Pies!"

THERE is abundance and variety of delicious pie material at your command in Monarch Canned Fruits and Vegetables. Go to one of the more than 50,000 stores where canned foods are displayed the Monarch Way—"See it in glass, buy it in tin."

MONARCH Mince Meat

There you will find suggestions a-plenty—so many you may wish you had nothing to do but bake the good pies the family likes so well. You can choose from Monarch Apples, Peaches, Apricots, Strawberries, Blueberries, Blackberries, Gooseberries, Raspberries, Cherries, Pineapples, Pumpkin—and Mince-meat that makes a pie that is truly Monarch of all who survey it.

High on the rocks above the waves of the sea the gull-mot places her single pear-shaped egg on a narrow ledge. A layer of seaweed holds it, and when the stormy winds do blow this egg rolls round and round on its axis, seldom falling over the edge. By lake and pond the grebes and coots make sound foundations of dried rushes for their floating homes. On the fallow field the lapwing excavates the slightest hollow for her four dark, mottled eggs. These, set with points to the center, cannot roll or move.

A New Age "He's a very fine doctor." "Seems young." "It's a new age." "Heh?" "A doctor can be successful without whiskers now."

"Old Home Night" Feature of New Gold Medal Radio Program

Famous Fast Freight, Travelling on Coast-to-Coast Radio System, Pulls Into Different State Every Wednesday Night with Old Home State Tunes and Songs

Broadcast Locally Over Columbia Chain Stations WJAS-WLBW Each Wednesday Night at 9:00 P. M. (Eastern Standard Time).

HERE now is 30 minutes of radio entertainment with a real thrill! It's genuine "Old Home Night"—this new Gold Medal Fast Freight program. Tune in on it. You'll hear the song of your native
