Final population figures for Pennsylvania have just been issued by the Census Bureau in bulletin form. The population of the State on April 1, 1930, according to Fifteenth Census, was 9,631,350, which represents an increase of 911,333, or 10.5 per cent as compared with the population of the State on January 1, 1920. This was the lowest rate of increase in the hsitory of the State, while numerically the gain the smallest since the decade of 1870 to 1880. However, Pennsylvania stil Iretains, by a wide margin its place as second state in the science of the propulation and McKeesport. There
