Stretch Food Dollars with an Electric Refrigerator

An electric refrigerator and a good planner can make food dollars perform stretching miracles. And how important that is these days! Don't throw away that tag end of Sunday's roast—into the refrigerator with it. Save it until there's another piece of meat left over, a bit of steak, or cutlet. Then put the two together to make a savory stew, or a grand platter of hash.

There's three meals for the price of two. And that's how an electric refrigerator stretches food dollars. You can keep things as long as you want to in its steady cold. Nothing spoils, so nothing is wasted.
