DRIVE CAUTIOUSLY AT INTERSECTIONS MESSNER ADVISES

Harrisburg — Pennsylvania motorists were urged last week by Deputy Secretary of Revenue, Otto F. Messner, to traverse street intersections with extreme caution.

"The most frequent scene of motor vehicle traffic accidents in this Commonwealth is at street intersections," he said. "There, 30.7 percent of all accidents occurred during 1938.

"Analysing this group we find that they accounted for 15.7 percent of the total fatal accidents, and 32.8 percent of the total non-fatal accidents during the year.

"Rural intersections, however, accounted for only 3.7 percent of the fatal accidents, 4.8 percent of the non-fatal accidents and 6.7 percent of the property damage accidents."

The difference in the accident rate between rural and city street intersections is believed to be due to the fact that most country crossroads traffic lanes are regulated by Stop signs, whereas the right of way at city streets frequently is left to the judgment of the operator.

The second location of accidents in order of frequency, the records show, is found to be between cross streets. Such locations accounted for 24.2 percent of all Pennsylvania accidents in 1938.

A breakdown of figures reveals these accounted for 26.1 percent of the total fatal accidents and 29.1 percent of the total non-fatal accidents.

Fifty-one percent of the fatal accidents in this group involved the pedestrian.

Next in order of frequency are those occurring on a straight stretch of rural road. These are responsible for 21.4 of all accidents.

This group comprises 33.9 percent of all fatal accidents as well as 18.8 percent of the total non-fatal accidents.

Officials of the Safety Bureau point out that on the open road a driver has the opportunity and a tendency of speed, which increases the chances for trouble.

Ten percent of all accidents last year happened on curves, comprising 12.3 percent of the total fatal crack-ups and 8.8 per cent of the total non-fatal smashes.

Unwariness on hills is held responsible for 4.8 percent of the total fatal accidents while accidents on bridges accounted for 1.4 percent of all fatal accidents.

The balance of motor vehicle casualties are reported as having occurred at railroad crossings and at miscellaneous other locations. The former comprised two percent of all fatal accidents, while the latter accounted for 0.6 percent of the total fatal accidents.

It is recorded that 7.8 percent of all the accidents which occurred at railroad crossings were fatal.

FARM PRICES DECLINED 4 POINTS IN MARCH

Harrisburg — Prices paid Pennsylvania farmers for their principal agricultural products were four points lower on March 15 than a month previous and 7 points lower than the same time a year ago, according to the Federal State Crop Reporting Service of the Pennsylvania Department of Agriculture.

The mid-March index of prices of agricultural commodities in the United States averaged 1 point lower than a month earlier at local farm markets. Seasonal declines in dairy and poultry product prices more than offset advances in fruit and truck crops. Price changes in other groups were small. At 91 percent of pre-war the index was the lowest since July 1934. The grain price index did not change during the month, fractionally higher prices of corn, oats, and barley offsetting lower prices received for wheat, rye and rice.

Removing Grass Stains

To remove grass stains from washable material, dip it as quickly as possible into lukewarm water and mild soap suds. Rub until the stains come out and then rinse in clear, warm water. If the material is not washable, sponge the stains with denatured alcohol. Rub gently until the stain disappears.

EMERGENCY TAXES

Harrisburg — Receipts of \$11,300,000 from emergency tax collections during the month of March were announced today by acting Secretary of Revenue, Walter J. Kress. This brings the total collection for the biennium from June 1, 1937 to March 31, 1939, to \$137,952,011.

Cleaning Leatherwork

To clean leather furniture, use a prepared cleaner — there are several good ones on the market. They remove stains and give the leather a certain amount of oil, which it needs. Be sure to remove any surplus cleaner with a soft cloth. Never wash leather upholstery.

Nation's No. 1 Trailer Family at Home

All the comforts of home are claimed by R. F. Vale, head of the nation's No. 1 trailer family, who is busy working at his lathe during a short stop in Washington, D. C. Mrs. Vale, busy with housework, is aided by her daughters. The two youngest children were born in the trailer, and none can remember any other home. Mrs. Vale supervises the children's education.

Ball at the Fair

NEW YORK—One of the most striking sculptures at the New York World's Fair 1939 is pictured above. It represents Europa riding Jupiter, the white swimming bull. The sculptor was Gleb Derujinsky.

GREATER DEMAND NOTED FOR DRUGS TO CURE SYPHILIS

Harrisburg, April 20 — More than half a million doses of anti-syphilitic drugs were provided for patients in Pennsylvania by State Department of Health in 1938, and Dr. John J. Shaw, Pennsylvania Secretary of Health, today said that the 502,853 total for 1938 probably would be doubled for 1939.

"I am determined that these drugs, which are the means of curing syphilis, shall be made available to every person who needs them," said Dr. Shaw. "While progress has been made, there is still room for improvement.

"Demand for medication is expected to increase in direct proportion to public recognition of the need for active treatment of syphilis. And the public is beginning to realize that treatment not only cures syphilis and prevents development of late, crippling effects, but, what is ever more important, prevents spread of this disease by contagious patients.

"Scientific studies have proved that when proper treatment is employed at regular, weekly intervals it is equivalent to quarantine. But when the patient neglects treatment, he quickly becomes contagious."

COLLEGE EXCHANGES MEET FILM DEMAND

Harrisburg, April 20 — Motion picture film exchanges are conducted by the State Teachers Colleges. During the three year period 1932 to 1935, there were 3,170 exchanges, or user made of these films. The number had increased for the next three year period 1935 to 1938 to 7,366. For the six-year period 1932-1938, the films were used almost three times as much away from the college as in the college itself.

HASTINGS STUDENT IS CRITICALLY ILL, HOSPITAL
Major McCoy, sixteen year old son of Dr. and Mrs. C. L. McCoy of Hastings, is in a critical condition at the Spangler hospital suffering of what may be tetanus or lockjaw. The young man is a student at Hastings High School, and is suffering from an infection starting from a small cut on his hand.

Harrisburg — It is estimated that approximately one person out of six gainfully employed in the United States is engaged in some phase of
