PATTON BASEBALL

AS REPORTED TO US BY BARBER "JIMMY" LEONE

The Patton Ball Club is very sorry to have disappointed so many fans on Sunday last, at the ball field. We were very anxious to have a good team here for the opening game, and thought surely South Fork would prove a good opposition, but you fans who were at the game saw what they sent up to play us. We want to assure the baseball fans that this will not occur again. We were not aware that a junior team was coming.

On Thursday evening Dysart will appear here for the opening game and inasmuch as Patton holds a victory over them, they will be seeking revenge. So fans, let us all turn out and root for our home club. There is plenty of seating space available, so you can enjoy the game in comfort. The game will start promptly at 5 p. m. See you there!

A word of praise to the Patton high school track team for their splendid showing at the Ebensburg track meet on Monday.

Among the outstanding feats accomplished by the boys were: Cossiter shattering the one-half mile mark, which has withstood assaults for thirteen years Tommy Reed won the one mile run and came within a tenth of a second of breaking one of the oldest records at Ebensburg, which is held by a former star at P. H. S.—Les Watters. Ryan, Donahue, Cossiter and Eckenrode captured the one-mile relay. It was the first time Patton copped this event in thirteen years. The Patton high squad is going to Altoona on Saturday to enter in Class A meet to qualify in the state finals. We wish them luck.

FIFTY SEVEN TAKE THE WASSERMANN BLOOD SPECIMENS, SPANGLER

With the special survey period half completed, the State Syphilis Clinic of Spangler has taken a total of fifty-seven blood specimens for Wassermann examination, it was learned this week.

Arrangements have been made by clinic officials to begin treatment of those cases found to be positive.

"The Health Department has been doing everything in its power for the past several months to detect and treat syphilis," Dr. John J. Shaw, the state secretary of health, commented recently in Harrisburg during discussion of the survey, "and now we are beginning to see some beneficial results."

"Citizens in whom syphilis has been found can now be treated. This will prevent their suffering any of the ravages of the late effects of the disease. In a great majority of cases, proper treatment under proper supervision will entirely cure them.

The Spangler State Clinic which is located in the Spangler hospital basement, will be open from 3 to 4 p. m. each Wednesday and from 3 to 5 p. m. each Friday for the remainder of May. During these special periods blood specimens will be taken, from persons unable to engage the services of a private physician, for examination in the State Laboratory in Philadelphia. The samples are identified by number, no name being used.
