# MOORE'S

*Air-tight* CIRCULATING-RADIATING HEATERS

ARE MORE DEPENDABLE • MORE DURABLE AND SAVE UP TO 1/2 OF YOUR FUEL

**OVERSIZE FEED DOOR OPENING PROVIDES CHEERY FIREPLACE GLOW**

**CAST IRON FIRNS PROVIDE PLACE FOR COOKING OATMEAL, BEANS, ETC., AND HEATING WATER AND COFFEE**

**FEED DOOR HINGES CAST INTO DOME—NOT BOLTED**

**SMOKE APRON**

**HUMIDIFIER PROVIDES MOST, HEALTHFUL AIR**

**COAL CHUTE**

**SLOTTED ANTI-CARBON FIREPOT INCREASES RADIATING EFFICIENCY—SAVES 1/2 THE FUEL**

**DUPLEX GRATES BURN ANY TYPE OF FUEL**

**ROOMY ASH PIT AND BIG ASH PAN**

**ENGINEERED TO HEAT ALL ROOMS EVENLY**

**THE ASHPIT DOOR, DOOR FRAME AND DRAFT SLIDE ARE GROUND TO A TRUE FIT JUST LIKE THE PISTONS IN A FINE MOTOR CAR**

**CAST IRON ELBOW WITH HEAVY CAST IRON DAMPER EASILY ATTACHED TO FIREPLACE OR CHIMNEY**

**EXTRA LARGE AND HEAVY EGG-SHAPED COMBUSTION DOME—SHAPE OF DOME CAUSES HEAT TO SPREAD FANWISE FROM TOP**

**CAST IRON FIRNS WHICH ARE AN INTEGRAL PART OF THE DOME—NOT BOLTED ON**

**NO BOLTS EXPOSED TO FIRE**

**PURE ASBESTOS WICKING SEALS PERMANENTLY ALL JOINTS. ACTS AS A CUSHION, LIKE A GASKET BETWEEN THE CYLINDER HEAD AND MOTOR BLOCK, PREVENTING CASTINGS FROM WARPING AND CRACKING**

**GRATE GEARS OUTSIDE OF ASHPIT—CANNOT CLOG AND BREAK**

**LIBERAL OPENINGS FOR RETURN AIR**

**RIGID, HEAVY CAST IRON BASE AND LEGS**

**STURDY, DURABLE, ALL CAST IRON INNER CONSTRUCTION**

AIR PASSAGES AND HEAT GENERATING SURFACE SCIENTIFICALLY BALANCED TO ASSURE POSITIVE AIR CIRCULATION

OUTSIDE ENAMEL FINISH IS PERMANENTLY BEAUTIFUL—EASY TO CLEAN—ALL BOLTS CONCEALED

Your heating worries vanish when a MOORE'S "Air-Tight" Circulating-Radiating Heater moves into your home—and you save up to one-half of your fuel. Come in—solve your heating problems NOW—select a MOORE'S "Air-Tight" Heater and enjoy real warmth and comfort—this winter and for many winters to come.

### STATE CHECKS FOR POISON ON APPLES

Harrisburg — The bureau of foods and chemistry of the State Department of Agriculture opened its branch laboratory for the fourth consecutive season at Arendtsville, Adams County, August 28. This laboratory, located in the heart of the apple growing region of the Commonwealth, has been established for the purpose of determining the amount of spray residue on apples. Certain chemical compounds are sprayed on apples at various stages during the growing season in order to reduce to a minimum the ravages of certain insects.

Export shippers of apples are required to produce a certificate to the effect that the apples involved fall below a tolerance established for spray residue. Representative samples are obtained from orchards by department representatives and analyzed by department chemists. When samples are found to be above the established tolerance, growers are required to wash apples in a solution designed to remove the spray residue before shipment is permitted to be made.

While these precautions are taken to ascertain that apples shipped in interstate commerce are fit for human consumption, the Pennsylvania consumer is by no means forgotten. Agents of the department are procuring samples of apples throughout the State, which are being analyzed in department laboratories to determine their fitness for human consumption.

### "YOUR HEALTH"

"When I was a boy — I" "You had a lot of typhoid, eh?" "Why, yes, how did you know?" This is the season when typhoid fever was prevalent.

The rains of early fall washed the surface filth into springs, wells and streams, people drank the polluted waters, and developed typhoid fever. Not so today — for only about 100 Pennsylvanians die each year from this disease.

Yet thirty years ago as many as 2,500 persons in this State died of typhoid fever each year.

Typhoid fever is preventable and the number of cases is said to be an index of the sanitary intelligence of a community.

It is distinctly a seasonal disease, the minimum number of cases occurred in June, the greatest number in October.

Individuals between 15 and 25 years of age are more susceptible than those at other ages.

There is a natural immunity to typhoid fever which prevents many from contracting it.

It is essentially a filth disease, spread by human pollution.

Water is the chief source of infection, but thanks to filtration and purifying water plants, most individuals in cities are protected.

Raw milk may carry the organisms of typhoid fever, either from a typhoid carrier who milks the cow, handles the milk or cans, or by contaminated water used about the dairy farm.

Chronic typhoid carriers frequently contaminate food eaten in cities, but authorities are continually on the alert for these persons who carry the typhoid germ, and they are isolated. Thirty years ago, most family doctors had a few cases of typhoid fever every year at about this time.

There are doctors practicing today younger men, who have never seen a case of typhoid fever. That is what medical science and sanitation have done.

NO OUTSIDE AERIAL NEEDED...you save trouble and money

NO GROUND NEEDED...more saving

And no need to worry about TELEVISION

Here is a new

# 1940 RCA VICTOR

Push-Button, Superheterodyne

MODEL K-60  
IT'S YOURS FOR \$49.95  
Terms to Suit

Check THESE MODERN FEATURES!

- ✓ Built-in Antenna does away with aerial and ground nuisance. Set plugs in as easy as an electric iron.
- ✓ When Television gets here you can plug a television attachment in and use this set for reproducing the television sound.
- ✓ Right now you can plug in RCA VICTOR RECORD PLAYER and use the instrument to play records.
- ✓ In addition, this great instrument has such features as Improved Push-Button Tuning for 8 stations... 3-band Super-night Streamlined Dial... RCA Victor Tubes... Plug-in for Television or Record Player... 12" Electro-Dynamic Speaker.
- ✓ A dozen other new or improved features insure your complete satisfaction with this amazingly low priced instrument.

For finer radio performance — RCA Victor Radio Tubes

Hear its Glorious Tone!

The big 12-inch Electro-Dynamic Speaker and the correct RCA Victor construction of the whole set create tone that will be a delight if you've been using an old, out-moded set.

### TO POUR CONCRETE ON CRESSON ROAD

Cresson — Pouring of concrete on the 2.75 mile stretch of William Penn Highway from the crest of Cresson Mountain eastward started on Thursday of last week. Cement used in the roadwork arrived in Duncansville and is being hauled by truck to a mixing plant near the scene of the improvement project.

It is believed by officials of the Harrison Construction Company, which has the contract for the improvement, that paving work can be completed

before the advent of cold weather.

When completed the William Penn Highway will be a four-lane road over the steepest portion of the Cresson Mountain.

Grading operations at the top of the mountain are progressing. Soon grading will start eastward from the Old Portage Monument, where the road will be relocated entirely. The highway for eastbound traffic will be separate from the present road, rejoining it at a point west of the lone grave of the Alleghenies above the Muleshoe Curve.

### CAMBRIA DPA BOARD MAKES PROVISIONAL APPOINTMENT OF 12

Twelve provisional appointments were made by the DPA County Assistance Board at a special meeting last Thursday afternoon in the Ebensburg relief offices. The 12 increased to 19 the number of such appointments made within the past two weeks.

The names of the new appointees were withheld pending approval of the selections by Harrisburg DPA officials. From 44 applicants interviewed, 10 junior visitors, a junior clerk and a stenographer were selected.

Executive Director Edward R. Golob said the provisional employees will work only as long as their services are required, or until such time as present staff vacancies are filled from the civil service registers to be established from competitive examinations scheduled in Johnstown September 30 and October 7.

Golob announced last week Cambria County's quota of enlistments for the October period of the Civilian Conservation Corps has been set at 201, a decrease of 44 from the quota set for the six-month period which expires in September.

### PAVING STARTED ON HASTINGS STREET

Hastings — A crew of 70 workmen last week started paving Beaver Street, main thoroughfare of Hastings Borough, which has been in bad need of repair for some time.

Residents of Hastings carried a complaint against the condition of the street to State Highway Department officials in Ebensburg some time ago. At that time they were given assurances that the street would be one of the first included on the schedule of the department of improvement.

Plans of the department call for a 40-foot street. The center 21 feet of the thoroughfare will be paved with a stone base and an armistite top. The two nine and one-half feet sides of the street will be paved with a stone base and brick top.

The improvement will be 2,200 feet long and is expected to require six weeks to complete. Beaver street is the main highway artery through Hastings and for this reason the thoroughfare comes under jurisdiction of the State Highway Department.

### DO YOU KNOW

There were more than 15,000 cases of smallpox in the United States last year. New Jersey has not had a case of smallpox in seven years, because it has compulsory vaccination. Seven Western states with a smaller combined population than New Jersey, but without adequate vaccination laws, had 12,000 cases of smallpox in the same time.

FOR SALE—White "Estate" Enamelled Range. Inquire of Ed Kuhnley, 507 Palmer Avenue, Patton, Pa.

## 'THE FAMILY GOES SHOPPING' IN PATTON'S SMARTEST SHOPS

READ OF THEIR EXPERIENCES WITH THESE LEADERS

It's H. A. WITHEROW SERVICE STATION for me. They know how to create smiles. The gas they sell has lots of pep. And gives you many extra miles. 304 East Magee Avenue N N Patton, Pa.

To shirts and ties, Bill's partial. But they must be right. He leaves it to THE TOG SHOP. Which shows he's pretty bright. 725 Fifth Avenue. B. C. Winslow, Prop.

The family was so highly pleased. Friends were amazed at their zest. They all went to HALUSKA MOTORS For a Used Car of the best. 426 Magee Ave. Phone 2051 or 2053.

The hardware in the family home Amazes every guest. It all came from CORDELL'S HARDWARE STORE. Where all is of the best. 411 Magee Avenue. Phone 3502.

"Ma," said Bill, "You look so young. You've got Pa in a daze!" Ma knew that CARTWRIGHT'S BEAUTY SHOPPE. Deserved all the praise. 445 Magee Ave. Phone 3391.

A dinner guest enthused to mother. "Gee, this roast is fine!" "Yes," said John, "It's QUALITY MEAT MARKET'S. I know it every time." 404 Magee Avenue. Phone 3501.

Cream is very essential. As HOOVER'S DAIRY always say, it's very healthy for everyone. Just phone for yours today. Patton, Pa. Phone 3842.

Dad was losing tire miles. His wheels went out of line; He went to BILLE'S GARAGE. They fixed the fault up fine. 707 Fifth Avenue. Phone 3371.

To good accident insurance Dad is partial. But the price must be right. He leaves it up to COWHER, NEHRIG & CO.

Which shows he's pretty bright. 814 Fifth Avenue. Phone 2491.

When the family gave a party. Baked goods thrilled each guest; It all came from MERTENS Bakery. Where all is of the best. Patton, Pa. At Your Grocery Store.

WATCH FOR THE FAMILY NEXT THURSDAY!
