

MARSELLER NEWS

Mr. and Mrs. Joe Peles of Emeigh were visitors at the home of Adam Speicher on Saturday.

Mrs. Sam Keith was a recent visitor at the home of her daughter, Mrs. William Peet Jr.

Lois McIndoe of Cresson was a visitor at the home of her parents, Mr. and Mrs. John McIndoe of Marsteller.

Mr. and Mrs. John Masserio of Greensburg were recent visitors in Greensburg.

Mr. and Mrs. Joe Kay of Barnesboro were recent visitors at the home of Mr. and Mrs. William Kay.

Mr. and Mrs. Ted Butterworth of Portage were recent visitors at the home of Mr. and Mrs. Henry Hoskins.

Miss Florine Peel is visiting in Barnesboro.

Miss Marjorie Davidson was a recent visitor in Cleveland.

Dorothy Peet and Edith Evison of Marsteller were recent visitors in Barnesboro.

There was a baseball game between Patton and Moser Creek Sunday at the Moser Creek field. Patton won by a score of 12 to 4.

Mrs. Joe Norton served as hostess to the Bingo Club of Marsteller on Wednesday. Those present were: Mrs. Joe Duke, Mrs. Paul Clawson, Mrs. George Elder, Mrs. Alex Davidson, Mrs. Oscar Link, Mrs. Walter Weekland, Mrs. Louis Verchick, Mrs. William Cole and Mrs. Norton.

Mr. and Mrs. Walter Weekland recently visited at Cresson.

Mr. and Mrs. Schelle and daughter Gloria of Marsteller were recent visitors in Homer City.

Mrs. Veretta and daughters Catherine and Rose of Marsteller were recent visitors in Greensburg.

Anna Timms of Marsteller was a recent visitor in Johnstown.

Mrs. Joe Norton, Avanelle Norton, Frank and Mrs. Orando Peet of Marsteller and Mary Ellen Norton of Nicktown were recent shoppers in Altoona.

Mr. and Mrs. Joe Norton and daughter Avanelle and Frank Moli and Della Jasserie were recent visitors at Clearfield.

The Catholic Church in Marsteller is starting catechism for all school children. They will be taught by the sisters from St. Patrick's Church.

The following pupils are listed on the Honor Roll at our school for the fifth period: Fifth Grade—Fred Semmesberger, Mary Lou Kline, Sally Davidson, Lois Wilburn, John Homody, Sue Anderson and Jean Weekland.

Sixth Grade—Ricky Clawson, Rose Montello and Rose Hillewa.

Seventh Grade—Robert Laird, Ken Wubara, Betty Hoover and Eris Askew.

Eighth Grade—Mary Pipp, William Seacey, Anna Clawson and Alex Nudge.

The boy scout of Troop 77 held a troop meeting April 25 after Scoutmaster Bashista and the Patrol leaders held their Green Bar Patrol Meeting.

The roll and dues call was read and Patrol Leaders gave their reports. The scoutmaster gave the boys hints on 1st Class judging, one of the requirements. Meeting was dismissed at 9:00.

AMERICAN LEGION WILL HOLD CONVENTION AT ALTOONA NEXT AUGUST

National defense and the critical condition of international affairs will hold a vital place on the convention agenda and undoubtedly will make the Twenty-third Annual Convention of the Pennsylvania Department, American Legion, to be held in Altoona, August 14, 15 and 16, one of the most important meetings ever held by State Legion, said Commander B. C. Winslow of the Walter McCoy Post 614 of Patton recently.

Five resolutions aimed at sabotage and anti-American activities have been proposed by the Executive Committee.

He said that, according to word received from Commander William Cole of the Altoona Post, Altoona is making arrangements to entertain one of the largest crowds in the history of that convention city and world-famous railroad center.

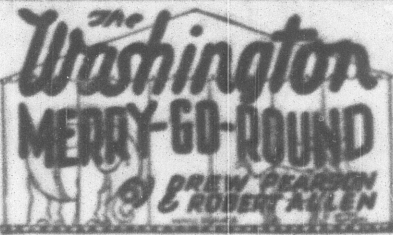

With Americanism and the Legion's own long-supported National Defense Program dominant in the nation, interest in the Altoona Convention is expected to be so keen this year that plans are being made and rapidly being pushed toward completion to provide accommodation for in excess of 50,000 Legionnaires at the Convention.

Commander Cole has extended an invitation to the Walter McCoy Post and to the other posts throughout the state to attend the convention sessions at Altoona, and gave assurance that adequate provision will be made to the care of all those who attend.

"Altoona's Jaffa Mosque, where some of the convention sessions will be held, has one of the largest auditoriums in the state," said Commander Cole in his communication to the Patton post "and everything is being planned on a grand scale for what Altoona expects to be the most enthusiastic and active convention on record in the department.

"It is certain that there is much to be accomplished, and it is equally certain that, along with the Convention work to be done, the Altoona Post and the State Committee have planned a program that will suit every Legionnaire and make the 1941 State Legion Convention at Altoona as memorable as this year may prove to be in National as well as Legion history."

The "Oil City and Bradford Air Line" of 1933 had nothing to do with airplanes, but was a narrow gauge road from Sheffield to Garfield in the northwestern part of Pennsylvania. It led to the Cherry Grove oil fields.

Washington, D. C.

NAZIS SHY OF MAGNESIUM

Examination by U. S. experts of the captured Messerschmitt sent here by the British has uncovered one highly significant fact: The Nazis are now using only 1 to 200 pounds of magnesium in the construction of these famous fighter planes.

This low Nazi magnesium content is compared to the 400-500 pounds used in similar U. S. planes made of this featherweight metal, one-third lighter than aluminum. Our big bombers use as much as 1,000 pounds of magnesium. The more magnesium used, the lighter the over-all weight of the planes.

This is considered evidence that German magnesium production is not keeping pace with Luftwaffe requirements. If it were, the Nazis would certainly be using more magnesium in their planes, because of its extreme lightness and strength. Heavier metals increase the dead weight, reducing the ship's lifting power, speed and cruising range, all vital factors in aerial combat.

If, as the experts believe, German magnesium production is falling behind war needs, it is highly important. Under the Nazis, Germany took the world lead in the output of this strategic metal.

For years the United States lagged behind because of cartel agreements between magnesium and aluminum manufacturers, which kept down production. In 1938, U. S. magnesium production barely totaled 7,000,000 pounds. By 1940, as a result of frantic defense efforts, this was stepped up to 12,500,000 pounds, still far short of army, navy and air-Britain requirements.

Large scale output of certain types of aircraft is being held up until several new magnesium plants get into operation. OPM plans call for an output of 75,000,000 pounds in 1942. If no hitches develop, the 50,000,000-pound mark may be reached by the end of this year.

TEXTILE PROFITS

When OPM Purchasing Chief Donald Nelson remarked at his press conference that textile prices were under scrutiny, his words went un-noticed in the press. But to textile insiders they sent cold shivers up the spine.

What Nelson did not reveal, but which they knew, was that his associate, Leon Henderson, defense price regulator, had quietly completed a survey showing that the mill margins (profits) are the highest in history. Henderson's figures show a jump in mill margins from 10.65 to June, 1940, to 16 in February, 1941, and still going up.

If the price paid growers for cotton had kept pace with that of textiles, it would be selling today at around 20 cents a pound instead of 10.71—its present figure. Informally, Henderson has warned textile leaders to watch their step, indicating willingness to allow them to put on the brakes themselves.

TS PROTECTION

At cost of less than a penny apiece, the navy is taking pictures of the lungs of all new recruits, to weed out the unfit before they become government charges for life.

Rear Admiral Ross T. McIntire, surgeon general of the navy, estimates that the pennies will save taxpayers many millions. Veterans' hospitals are full of TB cases from the last war, and of whom probably had the disease before they entered the service.

The new device takes a photograph on a 35-mm. film of a fluoroscope, replacing the larger and far more expensive X-ray picture. So revolutionary is the change that manufacturers of X-ray equipment opposed it for fear of losing business.

The navy did the pioneering in "mass chest surveys," but gives credit as the original pioneer to a Brazilian named D'Abreu.

NO GLITTER

No phase of modern defensive warfare, in which attacking planes must be checked, is considered more vital than the art of camouflage. The British long ago learned that one effective protection against daytime bombing of an army in the field was to make sure no equipment reflects the sun. The U. S. army is following this same sound rule.

All glitter has been ordered removed from military equipment. Even bayonets are being dipped in a special blue finish to prevent shine. The dull olive surface of staff cars, troop transport trucks and other vehicles was designed to this end. It blends with the landscape and is a safeguard against air attacks.

MERRY-GO-ROUND

Three years ago Hans Karl-Heinz Sonnenberg, young German immigrant, declared his intention to become a U. S. citizen and received his first naturalization papers. Under the Selective Service act that makes him a "declassant alien" and subject to draft. But now a clerk at the German embassy, Sonnenberg is fighting being drafted as the ground that he is not a U. S. citizen and does not want to be one.

Mrs. Roosevelt's morning mail consists of 800 to 1,000 letters.

Put your car in shape for warm-weather driving now. Have your crankcase filled with the proper grade of new Atlantic Motor Oil... then change every thousand miles.", "NEW MOTOR OIL", "ATLANTIC", "LUBRICATION SERVICE", "WHITE FLASH PLUS".

What Intentions Indicate Supply Requiring Quota composed of E. J. Farbergh, Loreto, W. H. Fyock, Johnston and C. J. Boover. According to Government estimates, the total supply for the 1941-42 marketing season would be about 1200 million bushels. This is more wheat than we normally grind into flour in two years. In three years time, war blockades and economic barriers have reduced U. S. exports from 100 million bushels to 20 to 25 million bushels. This loss of market plus favorable wheat crops during recent years, has brought about a surplus. ABOUT CHALK Commercial chalk today is made mostly of gypsum, but originally came from chalk deposits, which were composed of tiny shells known as "foraminifera."
