Mr. John Lann spent several days in Buffalo, N. Y., last week.

**ARE YOU A PART TIME CITIZEN?**

An Editorial by Ruth Taylor

Being a citizen in a democracy is a full time job. In other forms of government, the citizenry make up the background, appearing only in mob scenes to cheer on the rulers of the nation.

But there is no room for part time citizens in our form of government. Our government is us—what we make it. Ours is the fault if the wheels of government do not run smoothly, for the laws we made are the roadbed, and the men elected are the machine.

Are you a part-time citizen? Do you fulfill all your duties as a voter—or do you just show up at election time to cast your vote without due consideration of the full qualifications, record and principles of all candidates.

Are you a part-time citizen? Do you obey the laws you have had a hand in making—or is your only thought when you break what seems like an inconsequential little law that if you get away with it, it's all right?

Are you a part-time citizen? Do you evince interest in all issues or only in those problems which directly concern you—and then object when other groups do the same and infringe on your prerogatives? Only as citizens work for the common good of all can democracy progress.

Are you a part-time citizen? Do you lend an ear to alien subversive elements who tell you how much better the conditions are or would be for you were there a different form of government? Do you thoughtlessly pass on these

**Skilled Labor Now Becoming A Great National Defense Need According to the Authorities**

Throughout the state demands continue to grow for machinists tool and die workers, machine tool operators and other operators of a machine trade nature. Likewise there is a state wide seasonal demand for construction and agricultural workers.

In the western part of the state, particularly in the Erie and Pittsburgh industrial areas, it is becoming increasingly difficult to find workers available for jobs as machinists, draftsmen, auto body and fender repairmen, tool designers, machine shop foremen, machine shop equipment operators, service station attendants, male clerks and stenographers, domestics, waitresses, farm hands and sales clerks. The concentration of heavy industries in these areas, most of which are working on defense orders, has created such a demand for workers that persons ordinarily employed on lower paid jobs in retail trade, are leaving such employment to secure higher paying defense work.

The demand for skilled workers in these areas is being partially met through the use of vocational school and national defense course trainees, and through the establishment of in-shop training and apprentice training

THINK THIS OVER! Because they are built better in the beginning, FORD cars stand up best. For economy, performance and dependability, shrewd buyers are picking USED FORD cars.

**STOLTZ Motor Co., Patton' Pa.**

FOR THE BEST DEAL - ALWAYS SEE YOUR FORD DEALER!

votes without checking on their accuracy or considering their source? Are you a part-time citizen? Do you stand up for democracy or do you condemn its mistakes without consideration for the good it has to offer? Do you stress only its shortcomings and never its long range program which slowly but surely and in spite of its stumbling, discriminations and detours is making this country of ours the best in which we live? Now as never before the United States needs the full-time allegiance of all its people. Don't be a part-time citizen!

An advertisement in this newspaper will be read. Its matter how small the ad, it will be seen. You read this, didn't you?
