SUM UP!
 An Editorial By Ruth Taylor.
 Do you remember the carpet laying examples in your old arithmetic and how you stumbled and puzzled over them until you finally learned that you had to allow something for the stretch?
 In solving the problem of living in these days of stress and strain—we are going to have to do just that—allow for the stretch.
 There is so much to be done, so many ways in which we want to help that there is danger in overcrowding our lives, in taking on too much, in cramming our hours so full, that we make a fetish of being busy and are as continually haunted by the hands of the clock that we don't do justice to anything we tackle.
 Slow up. Plan your time so that there will be enough stretch to your day to take up the delays and unforeseen emergencies that will arise, no matter how wisely you plan. Do what you can. See to it that you do it thoroughly and as well as possible, but don't try to do the things you can't. And don't try to crowd everything into one day.
 It is conceded that we have not done enough in the past, that we are in arrears in defense and in straightening out our own national, local and personal economy. We have years of negligence to make up—and precious little time in which to do it.
 But—we can make haste best by going at an even pace, filling our time to the brim but not in oversteering. Make time by giving up some of the non-essentials, not by adding to an already full schedule.
 Leave time for living—for thinking—for recharging the battery of your spirit. Each and every one of us is needed in some definite activity for the welfare of this democracy in which we owe allegiance—but we are needed strong in body, clear in mind and courageous in spirit. And we cannot be these three if we run on nerve alone.
 These be perilous times and they may be worse. The strain and stress will continue, unless a miracle happens, and demand of us a hundred per cent efficiency. Let us therefore prepare for such a call by coordinating ourselves and conserving our energies, working hard—but all time allowing for the stretch.
 Do the best you can and trust in the goodness of Edvins Providence for the rest, remembering the words of the Prophet Isaiah "He that believeth shall not make haste."
NURSERIES.
 Harrisburg.—Inspectors of the Bureau of Plant Industry of the Department of Agriculture are now engaged in checking growing stock in the various nurseries throughout the state for disease and plant infestation. Certificates will be issued by the Department to the nurseries which are free of disease and pests, assuring protection both for the growers and the buyer of nursery stock. The certificates will be for the year beginning next October 1st and ending September 30th, 1942.

EDWIN S. SMITH HAS BEEN
 PUBLIC SERVANT OF THE LABOR RELATIONS BOARD
 No act of Congress has been passed to more vitally attack the evils of labor than the National Labor Relations Act. The act was introduced by Congress to protect the right of American workers to organize and bargain collectively. The activities of its attackers are reprehensible and understandable.
 These same enemies of labor have attacked Edwin S. Smith, member of the National Labor Relations Board, with equal viciousness and the equally unjustifiable reasons. They are now demanding that President Roosevelt do not appoint him to the position at the expiration of his present term.
 C. I. O. President Philip Murray is urging the reappointment of Mr. Smith, notes that he is under attack precisely because "he has refused to engage in any appointment at the expense of the workers but has courageously continued to enforce the mandate of Congress."
 Legislation to protect labor is to be properly enforced, it requires outstanding public servants of the type of Edwin Smith to administer it.—men who do not flinch before the attack of labor's enemies, who do not engage in stalling or compromise under political pressure, but who perform the duties assigned to them at no matter what risk to their personal fortunes.
