The endeavor of the Union Press-Courier is to sincerely and honestly represent Trade Union Workers in efforts to obtain economic freedom through organizations as advocated by the CIO and AFL, and we solicit the support of trade unions. Material for publication must be authorized by the organization it represents and signed by the President and Secretary and bear the seal.

The Union Press-Courier gives its advertisers the advantage of the combined circulation of the two largest circulated weeklies in Cambria County and has a reader coverage that blankets Patton and the major mining towns.

**SEVENTY GALLONS OF GAS** will drive your car one thousand miles. Seventy gallons of gas will keep a fighter plane up one hour. This is still a free country. Make your choice!

**BOY SCOUT TROOPS FROM ALL** over the north of the county had a three-day camporee near St. Lawrence over the past week end. The scouting movement in this section has been growing by leaps and bounds in the past several months. The St. Lawrence camporee is the largest of its kind ever held locally. The boys, for the most part, still in the initial stages of scouting, appeared to have a good time roughing it from Friday afternoon until Sunday afternoon.

**ACCORDING TO NEWS STORIES** the Sheriff's Office will lose two deputies within a short period. It is said that First Deputy James W. Brown of Revloc will resign shortly to again resume his position as checkweighman at the Revloc mining operations. Johnny McHugh, another deputy, is called up for final examination for military service this week. Because of a dull business spell in the Sheriff's Office, it is said that only one new deputy will be named to fill the vacancies.

**THE HOUSE APPROPRIATIONS** Committee, voting to abolish Civilian Conservation Corps has pointed out the way toward the eventual reduction and probable abolition of the WPA within the next year. Peace-time experiments in public works are incongruous in the nation facing a shortage of manpower and geared to all-out war production. Unlike the CCC, however, reduction of the WPA must be a slower process because of the huge commitments made by the agencies with thousands of communities throughout the United States. There are some of those commitments here in the north of the county. A job started has to be finished or it can work hardship on all concerned. So, before the WPA can be finally abolished, it will have to finish the jobs it has started.

**HAVE YOU FORGOTTEN WHAT** America and American citizenship mean? If you have, then take time to attend a session of Naturalization Court the next time such is in session at Ebensburg and watch the people come quietly into the courtroom—quietly, with a suppressed eagerness hidden beneath an outer layer of deprecation, lest they be caught looking melodramatic. Each of the applicants appearing in Naturalization Court must be accompanied by two character witnesses, either native born or qualified as naturalized citizens themselves, who give courage and stamina to the nervous. These people want to be Americans. They know why. Maybe we who have always had the privileges of this great democracy don't appreciate it fully.

**PATTON HAS BEEN HIT TO** the tune of eighteen more young men inducted into the military forces this week. We hadn't thought there were that many left here in the original draft registration. However, from the standpoint of population, and of health, Patton has representation pretty well over the globe—men who are Americans fighting for their country and for freedom.

**SATURDAY AND SUNDAY, JUN. 13** and 14, are days to display the flag. June 13 has been set aside as a day for honoring General MacArthur, it being an important date of an important anniversary in his career. June 14 is observed as Flag Day, and this year it should have an earnest observance with a background of seriousness. Fly your flag on both these days.

**THE WAR WILL COME A BIT** more to our homes, or at least the lights of the people in Central Pennsylvania, when a trial blackout has been ordered. The local defense council, of course, is looking for the wholehearted cooperation of all the citizens in the community, and because of the legal aspect of the blackout, they have every authority to demand it. If you don't do your part on the night of the 24th, there is no reason whatsoever why your neighbor can't brand you as a "slacker."

**AFTER ALL, EVERY MAN AND** woman in our section who has been engaged in any of the defense and war activities has been giving of his and her time freely and willingly for the common good. None had anything to gain in an individual sense, but in the interests of the Nation, and of the community, they have gained much materially, and if the time ever comes that danger will face us right here at home, folks generally will have every reason to be thankful for the many hours the local units have trained in their patriotic duties.

**COLLEGES GENERALLY ARE** announcing a reduction in time from four to three years for completion of a standard course leading to a bachelor's degree. It is too bad that it took a war to bring about this reasonable adjustment. Many a worthy student has been barred from completing a needed college course in the past because of the length of time required for doing so. Instead of requiring four years of two semesters each for graduation they could just as well have had three semesters per year, thus finishing in three years or less. An occasional independent or private school which did that, however, was not recognized in high-brow educational quarters as coming up to the required standards—Nanty-Glo Journal.

**WHILE WE MUST EXPECT** some of our boats to be torpedoed, the war will have definitely turned against the Axis when we have stopped the sinkings in the Atlantic. To be sure, we are destroying German and Italian submarines, but not fast enough. It is number one problem for us just now.

**THE CONTROVERSY STIRRED** by the proposal to lower the minimum draft age to include youths to 18 and 19 should not be permitted to sink to the maudlin level of objection that those who would be affected are tender inexperienced boys who should be sheltered from the realities of war, says the Johnstown Democrat. There is much to be said both for and against drafting of men under 20, but the issue is too broad to be fought from the standpoint of youthfulness alone.

**REMEMBER WHEN YOUR BOY** was 16? About the first thing he demanded was the privilege to drive the family car. From that time on you began to see him in man's estate. Now there are a lot of these boys out of school and in various defense industries pulling down big money. Surely they think they're men. War is a grim business. If the government really needs these young men of 18 and 19 it's not likely that these young fellows will object on the premise that they're too young. If our memory serves us rightly, we recollect that it was along about this age that we felt the world was at our feet.

**HOWEVER, UNLESS THE MAN-**power of the Nation has hit a very low ebb, most folks don't see the necessity for inducting the young chaps into the Army. They are not mere children by any means, even though some fond mother may think them so. But many are still in school, and disrupting their scholastic life at this age would remain permanent. But all-out war means just what it implies, and everybody takes a hand in the common cause.

**American women, by doing** without hair pins and bobby pins this year will be releasing 16,000,000 pounds of steel to the war effort.

**Jane Parker Says: MY DONUTS MAKE DANDY SUMMER DESSERTS!**

"How original! How delicious!" That's what folks will exclaim when you serve them Jane Parker's Donut Desserts! We show one of them to the right. Read it! Doesn't it sound tempting? For more of them, read the June Woman's Day Magazine. Be sure to use Jane Parker Donuts...light...tender...chockfull of flavor. They're DATED daily for freshness!

**TRY THIS ONE!**

**DONUT FRUIT TARTS!**  
Cook 1 cup dried apricots, peaches, apples or prunes in 1/2 cup water until tender. Mash fruit, add 2 tablespoons sugar mixed with 1/2 tablespoon cornstarch; cook, stir until thick; cool. Fill donut centers.

**JAMS AND JELLIES ARE NOT RATED SO IMPORTANT ON VICTORY FRONT**

Harrisburg.—Jams and jellies have small importance on the victory program this year and the office of price administration will release only a little sugar for such use.

A spokesman for station rationing headquarters explained the OPA ruling limiting extra canning sugar to

one pound for each member of the family for use in jams and jellies as an attempt to hold down the use of the large amounts of sugar required by those non-essential delicacies.

Families will be allowed one pound of sugar for each four pounds of fruit canned, and state officials knew of no limit on the amount that would be made available.

Applicants seeking sugar for fruit canning will be asked by their rationing boards how much canning they

did in past years and how much canned fruit is left over. Any extra sugar allowed for fruit canning which is not used for that purpose must be reported to the board, which will tear from the holder's sugar rationing book enough stamps to cover the amount left over. This was explained as a caution against any family's obtaining extra sugar for normal use.

Solution of the problems attendant on issuing extra sugar will be left largely to the local rationing boards.

**SYNTHETIC RUBBER OUTPUT BEGINNING**

The first synthetic rubber from a new government-sponsored addition to the Goodyear Tire & Rubber Company's chemium plant in Akron, Ohio, was produced late last week, company officials have announced.

Production for the two new additions is to be given exclusively to the Army and Navy.
