STATE SOLDIERS ABOVE AVERAGE

Harrisburg.—Army general aptitude tests rate 46 per cent of Pennsylvania inductees in the superior intellect class, Maj. Wayne E. Homan of the New Cumberland Reception Center, says.

"The fact that Pennsylvania youth shows such an amazing intelligence record is a compliment not only to the state but to the nation," he declared.

Major Homan pointed out that all civilians inducted into the army and sent to the New Cumberland Center are given two tests, one for general aptitude and one for mechanical aptitude.

From March of 1941 until the present time, the Major explained, 11.9 per cent of all inductees have been rated in No. 1 class, very superior intellect, as compared to the nation's average of 7 per cent.

Other comparisons show: 34.16 per cent in Class 2, superior intellect, as compared to the national average of 24 per cent; 33.11 per cent in Class 3, average, as compared to the national overall of 38 per cent; 15.35 per cent in Class 4, inferior as compared to the national figure of 24 per cent, and 5.4 per cent in Class 5, very inferior, as compared to the average of 7 per cent.

SELECTEES AWAITING INDUCTION IN ARMY LOSE JOB BENEFITS

Harrisburg—Selectees who have passed their final-physical examinations and await Army induction are no longer eligible to claim unemployment compensation benefits.

That order was issued by the unemployment compensation division after a ruling by David R. Perry, deputy attorney general, that men aw-

aiting induction are, for all practical purposes, withdrawn from the labor market. One of the eligibility requirements for job benefits is that the applicant must be available for suitable employment.
