Subscription, \$2 a Year in Advance Advertising Rates on Application

The endeavor of the Union Press-Courier is to sincerely and honestly represent Trade Union Workers in efforts to obtain economic freedom through organizations as advocated by the CIO and AFL, and we solicit the support of trade unions. Material for publication must be authorized by the organization it represents and signed by the President and Secretary and bear the seal.

The Union Press-Courier gives its advertisers the advantage of the combined circulation of the two largest circulated weeklies in Cambria County and has a reader coverage that blankets Patton and the major mining towns.

WITH THEIR ORGANIZATION only two weeks under way, the Friends of St. Francis, organized to raise funds to purchase a part of the Schwab Estate for St. Francis College, at Loretto, now boast a total of 26 organized committees functioning actively on the project. Every indication is that the required amount of money will be raised, Patton and all the other communities have organized in the movement and the interested parties include not only Catholics but members of other faiths as well, who appreciate the work of the "College Among the Pines."

IT IS WITH PLEASURE THAT we note that our old-time friend of the pen, Miles E. Ranck Sr., editor of the Barnesboro Star, last week became the owner and publisher of that newspaper. Mr. Ranck has labored long and faithfully in the interests of the Star and has kept it in an outstanding position despite these days of hard struggling for the weekly newspapers. We wish him every success in the world.

WE ARE DUE FOR ANOTHER surprise blackout most any time, and it is likely that such surprises will be continued for the duration. The chap who isn't caught napping is the fellow who is always prepared. That goes for the blackout regulations as well as most everything else.

LAST FRIDAY WE WITNESSED another large contingent of men leaving for the armed services. This contingent comprised most all ages from 20 to 45. Men who little dreamed they would every be called for military duty are being called in this all-out war. As time goes on, more and still

GLASSES ARE A SCHOOL-TIME NEED

Have you ever stopped to realize how precious good eyesight is? Your child's studies almost demand them, for without perfect eyesight his ability to learn may be seriously impaired. Why not stop in to see us before school begins?

DR. J. P. MITCHELL

more will leave, unless, of course, Herr Hitler and the Japs trip up!

WALKING WILL BE HARDER!
The War Production Board has forbidden the use of tire friction scrap, which makes a high grade of reclaimed rubber, in rubber soles and heels, in order to save this type of reclaimed rubber for more important uses. In another action, WPB further decrees that only 30 per cent of the normal amount may be used in cosmetics and none at all may be used in the manufacture of fireworks and film developing preparations.

A GOOD BET IS THAT AMERICAN and British fighters will soon turn up in the Caucasus, and an equally good bet is that the Japs will attack Siberia within thirty days or abandon the project for this year altogether. If they don't attack the Russians can thank the Americans and (1) the Coral Sea, (2) Midway, (3) Solomon Islands and (4) our growing air power in China.

WITH ONE OF THE MOST eventful sessions in its history predicted the United Mine Workers of America will begin its 37th annual constitutional convention October 6th in Cincinnati. Originally arranged for Atlantic City, the site has been switched to a more convenient geographical location because of the transportation difficulties. Mine unions in this district this week will begin to elect delegates to represent them at the national meeting. Each local is granted one delegate for each 500 members.

LABOR IS DIVIDED INTO TWO great armies—the fighting army and the army for production. Both are charged with the responsibility of doing their special part in the winning of the war. The duties of the fighting army are more specific and for that reason more easily understood. When our boys changed from overalls to uniforms they left behind all action in the life in which they were reared. The enemies at our gates must be repelled. There's an agreement between our soldiers and their brothers in industry—"you do the fighting, we supply and we will do the fighting." They are fighting to protect the food, clothing and shelter of all our people, for now and the future. There is a mutual dependence and responsibility that cannot be broken without disastrous results.

THE RECENT WASTE PAPER drive was so successful that warehouses are stuffed. There is now little market for most paper. But there are lots of other things that should be saved and salvaged. It is our patriotic duty to aid all the drives.

MAJOR GENERAL LOUIS B. Hershey's warning that the Selective Service Rolls soon would be exhausted of single men are leading Congressional circles to speculate that the armed forces might renew their request for the drafting of youths 18 and 19 years old. Congress now is in informal recess and any such request might well be deferred until after the November elections lest the question be made a political issue. Likely the army and navy is going to insist on lowering the draft age. Army men have estimated there are 2,500,000 to 3,500,000 youths in the 18 and 19 classification. All men between 18 and 65 already have been registered, those 18 and 19 and above 45 being included for purposes of cataloguing the Nation's manpower.

LIVING COSTS IN PENNSYLVANIA reached the highest level during the second quarter of the year since 1930, the state department of industry reports. Notable is the fact that prices of foods not under the general maximum price regulation were responsible for most of the increases while those coming under the regulation showed little or no change. In some cases a slight decline was noted. Johnstown had the highest increase in living costs in the cities of the state with 6.9 per cent.

PENNSYLVANIANS ARE WARNED to guard against pernicious purveyors of patriotism. Joining in the admonition are numerous state and local officials concerned over the war-spawned flock of "gyps" over the commonwealth peddling everything from fake synthetic rubber to special sand for incendiary bombs—all under the guise of patriotism. Local authorities to a certain extent try to arrest the activities of these fakirs. Folks should be on guard against gold-brick salesmen. Be particularly leary of persons offering bargains in retread tires, battery chemicals lauded for their qualities during the winter, and other scarce materials which may have passed thro-

ugh "black market" hands. The majority of the tantalizing offers will probably be worthless. One scheme, although not illegal, is the peddling of "certificates" to families of men in the armed forces. Generally the impression is given that the certificates are official. One reportedly sold in Western Pennsylvania for \$1.50 carried the serviceman's name on a scroll below an eagle and some flags. Purchaser's are urged by the salesman to buy a frame also, usually at \$2 extra.

LAMOUR FILM BRINGS THRILLS, TUNES AND LAUGHS—AT THE GRAND

Local movie fans can look forward with certainty to a film combining thrills, laughs and melodies when "Beyond the Blue Horizon," Paramount's new technicolor jungle film comes to the Grand theatre, Patton on Sunday and Monday nights next, with a matinee on Sunday at 2:30. That's pretty evident because Dorothy Lamour is in it, and when Dotty

appears in a jungle film, attired in a sarong, it's inevitable that there are going to be some spine-tingling adventure scenes, comedy and newest tunes.

Dotty's starring role is bolstered by a top grade cast including Richard Denning, the sarong-girl's new jungle romance; Jack Haley, the comedian; Patricia Morrison, Walter Abel, Helen Gilbert and Elizabeth Patterson. A new tune that Lamour introduces is "A Full Moon and An Empty Heart."

Pouring From Cans

The secret of pouring liquid from a can is to make two holes in the can instead of one, about an inch apart. The one hole is for the liquid to pour from, the other hole to let the air into the can.

Hippocrates, the Father of Medicine born in 460 B. C., knew about night blindness and recommended the eating of liver to prevent it—liver containing a good supply of Vitamin A.
