*no TRIP...
no DRIP...
no DROP...
no TWIST!*

If you trip over a telephone cord and break the wire, your telephone goes "dead". If water drips on the cord from a wet umbrella or an open window, that means trouble, too. Dropping a telephone doesn't do it a bit of good and twisted cords will some day break and cause a "noisy line"

Because of war-time shortages of copper wire, gasoline, tires and manpower, we urge you to take good care of your telephone. An ounce of prevention may save enough gasoline to start a bomber or enough copper to make a shell. Waste doesn't rhyme with Victory. The Bell Telephone Company of Pennsylvania.
