### TAXES? SO WHAT!

BY RUTH TAYLOR.

It is hard to make ends meet today—and often taxes spell the difference between comfort and just living. All the little luxuries that make life so pleasant have had to go by the board.

But when I hear complaints about taxes, I think of what I heard a Norwegian seaman say a couple of years ago:

"We, who would not, or could not create security against fear and famine amongst the underprivileged, have seen rich and poor alike reduced to a destitution far worse than that of our most wretched slums of yesterday."

"We, who squabbled in our own household over ancient prejudices of race and religion and over petty differences of politics or trade, have learned that sectional boundaries cannot isolate a people to the furious force of Nazi assault and persecution."

"We, who saw the class struggle blind capitalist and labor to the fury of the gathering storm know now that both lost in their folly more than either had ever hoped to gain."

This we too have learned in the past two years. Are we going to take that lesson to heart? Are we going to realize that paying taxes for this war is our one hope of not paying tribute? That what we give up we would lose forever if men did not work and fight and die for the protection of our rights as free men?

We, who shut our eyes to the sore spots of the world found those plague centers too close for comfort to our own homes. We, who said it was none of our business have learned that cruelty, persecution and hatred are like a forest fire, spreading past its own boundaries and seeking what it may devour.

We, who generalized in our conversation, setting group against group, do not realize that this was how the whole thing started. The despots of today are those who felt themselves the "have nots" of yesterday. A frank discussion of common objectives, a voluntary cooperation now is far better than arbitrary regimentation later on.

I like to think what one man who was an American by choice told me. He said, "I am a poor man today—

**A NEW DRUG.**  
Most of our readers have heard of the wonder drug called penicillin. It has become important within this past year and our scientists tell us it is many times more effective than the powerful sulfa drugs that have themselves proven so wonderfully effective in healing and saving lives. There are now nine firms manufac-

turing penicillin in order to fill the call of civilians as well as the necessary military quota. These firms expect to have stock on hand within probably six weeks, but this will not nearly supply the increasing demand. Penicillin is grown from mold and to extract the fluid is a long process. Sometimes the molds don't produce and then more time is needed and

time is vital when lives are at stake. We are thankful it is already being used successfully even in a limited number of cases. We thank our scientists, the laboratory workers who toil day and night that we may benefit. Time means more to them than to the awaiting public for they realize the effects before we realize the discovery.
