man, woman and child ready and eager to die for the man they believe is a god. Japan is fighting on "interior" lines. It's true that its fleet is now much smaller than ours. But never forget that the U. S. Navy has a much bigger job to do. The Japs have stated, and no thinking man or woman doubts it, that they are prepared to sacrifice 10,000,000 men to hold their empire. To the Japanese, life is cheap. The emperor and the state mean everything—the individual, nothing. If the war were to end tomorrow, Japan would have put the seal on a conquest greater than Napoleon's. "But," you say, "the war with Japan won't end tomorrow." Well, what about it? Will it end "tomorrow," or next month or next year, for you? Are you planning to quit your war job, stop your blood donations, slacken your Bond buying, use more gas, have more fun, ease up generally? Before you do, remember that many a gallant American boy, now vibrant with the breath of life, will die at the hands of the Japs. How many? Thousands? Certainly. Hundreds of thousands? Probably. Well, how many? That's up to you.

How long will it take to beat JAPAN?

One Year? Three Years? Five Years? Look at these Facts... From the Army and Navy. Then Figure it Out for Yourself!

In spite of Midway, Bougainville, Tarawa, Saipan, Leyte, Manila, Iwo Jima, Okinawa, and all the other American victories, Japan now controls an area and population far larger than the United States, and with many natural resources greater than ours. Her home islands are industrialized and organized to the last rivet, the last kilowatt of power, the last pair of human hands. Japan can put in the field over 4,000,000 well-trained, battle-hardened troops, many with ten years of war behind them. This force is twice as large as all the German armies which defended France, the low countries and the Western front of the Reich against the combined armies of the United States, Britain, Canada and the Free French. Back of these soldiers are more than 70 million civilians on the Jap home front, firmly indoctrinated in emperor worship—every

CARELESS HUNTERS ARE FACING LOSS OF THE PRIVILEGE

Loss of hunting privileges from one to five years face 100 nimrod's cited for careless use of firearms last season when 23 persons were injured fatally, the State Game Commission has announced. The number of fatalities equalled the all-time low set during the short 1936 season, but incomplete reports show that 209 non-fatal mishaps occurred during the small and big game campaigns. "Careless handling of firearms caused virtually all the accidents," cited Seth Gordon, commission director, "and 41 per cent of the fatalities were self inflicted by carelessness. If hunters would only learn to handle guns carefully the accident rate would go way down." Decisions will be made after the hearings in 33 cities to be conducted by the committee's law enforcement division, which later will recommend appropriate action against each man cited. Hunters found to have been careless or law-breaking will face the loss of their right to hunt for one to five years, Gordon said. "This provision in the law is the most powerful weapon the commission has to reduce accidents caused by careless and negligent hunters," he added, "and is comparable in effect to safety hearings held for violation of the Motor Vehicle Code. During the ten year period from 1933 to 1942 an average of 37 fatal
