LOOK TO THE FUTURE for Telephone Service on Even More Farms

For more than half a century, the telephone has served the farmer well... in business... in emergencies... in more pleasant living. But the future holds far greater promise, and in the years to come, the telephone will serve the farmer even better than before. We have our plans. All we need to put them into effect in the rural areas we serve is the end of the war... for this will mean that production, released from war necessities, can again catch up with rural (and city) demands.
