For deafness, see your dentist! What's wrong with that sen-

tence?

It's correct according to an article recently published in the "Archives of Otolaryngology," a medical journal having to do with disorders of the ear, throat, larynx and pharynx.

Many of the 10,000,000 Americans who suffer from faulty hearing should be sent to a dentist for abnormalities of the "dental bite" often produce hearing disorders. orders.

At the University of Pennsylvania's special ear and throat clinic it was found that many persons complaining of hearing trouble showed abnormalities of the position of the teeth which interfered with proper movement of the jaws in chewing.

Any abnormality of dental bite directly affects the eustachian tube.
