Will You Recognize the Services of Your Fighting Men?

Recognition of the services of America's fighting men after the close of every conflict is traditional in our country. George Washington was the first to aid our soldiers in adjusting themselves by providing grants of land.

Down through the years after each war, the Federal Government and the several states have appropriately recognized that men who were taken from their normal pursuits and who served their country at small pay, were entitled to a special consideration, a consideration to help them regain or attain community security.

What is proposed for Pennsylvania's veterans of World War II is adjusted compensation—an adjustment of their pay with the pay of civilians whose earnings were far greater than the serviceman's pay.

Two successive sessions of our General Assembly voted unanimously to give World War II veterans adjusted service compensation. The voters must decide on Tuesday, November 8, if they shall reward with an average \$325 nearly 1,300,000 men and women who were in uniform.

Those men and women made possible our security, preserved our freedoms and the American way of life. If a "bonus" had been suggested for these men and women during the war, the favorable vote would have been overwhelming. If you would have voted yes then, you should remember how you felt with each victory, and vote "yes" November 8.

On Tuesday, November 8, Vote "Yes" on AMENDMENT 1-A for Adjusted Service Compensation

GIVE HER TIME TO GET TO THE TELEPHONE!

It's always wise to "wait 10 rings"

People can't always "drop everything" to answer the telephone the very moment it rings. That's why it pays, when making a call, to wait about 10 rings before you decide "nobody's home." By doing so, you'll often save a second call.
