WANT to be free from that nervous tensing up for a jolt every time a rough spot looms in the road ahead?

Want to enjoy the relaxing feel of a sure-footed car beneath you, that stays level even when the road doesn't?

Well, sir, ease into a Buick and see how such matters are cared for.

See what a wonderful difference in level buoyancy coil springs can make when you have them on all four wheels, not just the front ones.

Note what firm and solid steadiness is yours when a full-length torquetube drive is your keel-how smoothly you stay on course when the rear wheels can't help but run true.

See what big, low-pressure tires and Buick's wide rims can do to pillow your course without jounce or sway.

In other words, sample this two-ton beauty for over-all stance and balance -and the cradling comfort of its roomy interiors.

And while you're at it, get the very special thrill of its mighty Fireball power plant, plus the free-as-a-birdin-flight bliss of its Dynaflow Drive.\*

It's an experience that you owe yourself-and it's yours for the asking. The thing to do is get in touch with your Buick dealer-and discover the ride that only Buick owners know.
