Little Boys League Will Use High School's Athletic Field

Officials Give OK At Special Meet Last Week

Officials of Carrolltown's Little Boys League announced today that the new official field for the 1936 season has been set up in the John Carroll High School Athletic Field, Carrolltown.

Members of the committee in charge of the local Little League baseball teams, said that members of Carrolltown School Board, at a special meeting last week, voted to permit the use of a portion of the huge stadium as a Little League ball park.

The official playing field, however, will not be used for any practice sessions by any of the league's four teams, or any others. Practice sessions, as like last season, will be held on various other fields in Carrolltown, with last season's official diamond on St. Benedict Street, being named the principal practice field.

Members of the Little League committee stressed the importance that certain reservations as requested by the members of the local school board, will be very strictly enforced. The committee issued a statement as follows:

"Certain reservations in keeping with the request of the School Board, will be enforced to the best of our ability, due to the fact that the Board so generously gave us permission of the use of the Athletic Field and that it is considered one of the finest fields in this section of the county."

The committee stressed that the following rules will be enforced:

No persons will be permitted on the stadium's football field or track, or in any building on

the grounds. Those attending games, including all players will be required to use the gate located at the corner of Lacey and Campbell Streets. No person will be permitted to use any other gate for entrance to the field or to climb the fence surrounding the field.

Besides the above restrictions the Little League Committee will set up a policing force of members of its committee to be on hand at every game to see that all regulations are enforced.

Committee members announced that they hope to have the new field ready for the opening game this coming Sunday afternoon at 2:30 p. m. (DET) when a double header will be played between the Pirates and Indians and the Tigers and Cardinals.

The new diamond will be located in the southeast corner of the stadium on the parking lot and practice field section. The required back-top and a seating arrangement for fans is also being arranged.

The field was surveyed by Adrian Buck of Carrolltown. League officials said they expected to acquire snow fence in order to enclose the little league section of the stadium so that persons could not go elsewhere in the field. Until such time as this can be done, they respectively request everyone to obey the rules of the league officials and they are abiding by the rules requested by the school board, because the stadium belongs to the school district and is under school board supervision and they do not want to have any property destroyed in any way. If fans attending games live up to the rules, officials say, it will be a very fine way to show the school directors that they appreciate what is being done to help the youth of the Carrolltown community.

Honesty Best Policy

"Beware of persons who advertise goods for sale at less than the wholesale prices, and when customers ask to see the goods—Oh, yes, but we are just out of that particular thing at present, but we will have some in a few days, as our sales are so large that we cannot keep a stock on hand to supply our customers." We have always found it best to insert HONEST advertisements for honest goods at honest prices, and be honest with our customers, as well as honest with everyone else, and above all to be honest ourselves, and we defy anyone to say that we have ever misrepresented our goods or our prices, or our neighbors. We claim now that we have the largest stock of goods in Carrolltown, all of which have been bought for cash, and that we are selling them at the very lowest cash prices, and invite competition with any and every one, either in quality, quantity or price.—V. S. Barker & Bro., Carrolltown, Pa.

Low Cost of Eating

"When you are in Altoona, come to Mountain City Hotel, 8 S. A. McLaughlin, Proprietor. We serve a Good Meal for Twenty Cents. Good hotel accommodations and steam heating for the convenience of country people and hucksters."

Local Invention

"Peter Campbell's Patent Wrench and Nut Lock, Patented Aug. 27, 1878. The attention of all persons interested in the use of buggies, wagons, agricultural implements of all kinds, and also of railroad companies, owners of machine shops, and, in short, all persons having in use any implement, machine or anything else in which the construction of which bolts of any size are used, is called to this new and valuable invention. It is an article that has long been demanded and called for and need only be seen to be understood and appreciated. It is to lock, or fasten nuts and bars on bolts to prevent their loss from jolting, etc. As, for instance, from buggy shafts, agricultural implements, and a hundred other such like annoyances that are taking place every day. It will save time and risk of life to the workman generally and saves property by securing nuts and bolts to their places and preventing them from being jarred off unexpectedly, and in no way injures the bolt or threads. Liberal inducement to persons of small capital by which they can purchase agency territory and save money. It is a tool that must be used. Surviving are these children: Mrs. Sara Noel Barnesboro; Warren Hastings, R. D.; and Harry, Pottstown; also 13 grandchildren. He was a member of St. Bernard's Church, of Hastings. Funeral services were held at nine o'clock on Monday morning in St. Bernard's Church by Rev. Father Adalbert Kalch, OSB, pastor, and interment was in St. Joseph's Cemetery at Hart's Sleeping Place.

"Peter Campbell's Patent Wrench and Nut Lock, Patented Aug. 27, 1878. The attention of all persons interested in the use of buggies, wagons, agricultural implements of all kinds, and also of railroad companies, owners of machine shops, and, in short, all persons having in use any implement, machine or anything else in which the construction of which bolts of any size are used, is called to this new and valuable invention. It is an article that has long been demanded and called for and need only be seen to be understood and appreciated. It is to lock, or fasten nuts and bars on bolts to prevent their loss from jolting, etc. As, for instance, from buggy shafts, agricultural implements, and a hundred other such like annoyances that are taking place every day. It will save time and risk of life to the workman generally and saves property by securing nuts and bolts to their places and preventing them from being jarred off unexpectedly, and in no way injures the bolt or threads.
