Mail Gifts Early For Sure Delivery By Christmas Day

As part of the "Mail Early for Christmas" campaign, Postmaster George Lehman said today that now is the time to prepare and plan the mailing of your Christmas cards and gifts. Get out your Christmas list, and be sure you have the full name, street and number, city, zone and state for every one. Remember that first-class friends deserve first-class mail and they get this service when you use three-cent stamps. Now is the time to lay in a good supply along with plenty of heavy wrapping paper, corrugated cartons and string cord for your Christmas gift packages. Right now is not too early to start your gifts to the most distant points and try to have them all mailed in this first week in December.

The postmaster especially requests that you do not mail all your Christmas cards at the last minute. Those for out-of-state addresses should go by December 10 and all others should be in the mail by at least a week before Christmas. Most important of all be sure that each Christmas card and parcel is clearly and accurately addressed. Your cooperation will make it a merrier Christmas for every one.

Soft Coal Output Hits Highest Level for Year

Soft coal production in the nation this past week topped the previous high for the year as it again surged above the 10-million-ton mark, the National Coal Association reported. The 10,210,000 net tons in the week ended Nov. 19, highest since the 10,228,000 on Dec. 20, 1952, compared with the preceding week's revised figure of 9,810,000 tons and was well above the 9,070,000 in the similar 1954 week. Production to date approximated 409,304,000 tons, against 343,219,000 a year ago.

A British explorer, Captain James Cook, was first to sight the ice mass surrounding Antarctica, during a circumnavigating trip in 1770.
