Jones, the famous clog dancer. They propose to give a concert at Freeland at an early date.

They will give a concert at South Heberton school house on Saturday evening, April 5th.

**Struck an Opening.**

While sinking a subterranean slope at No. 1 Highland yesterday, the men employed there were somewhat surprised on returning to the face of the work after firing a shot to find an opening in the coal, and upon further investigation it was found to be the gateway of No. 2 Drifton, which is supposed to be driven past the boundary line.

The completion of this slope and the one on the eastern dip of No. 1 Highland, together with the new plane, gives High and a new lease of life, and the indications are that more steady work will result from these openings.

The tunnel being driven to tap the overlying vein at No. 1 slope, was stripped yesterday, and a 7 foot vein of good workable coal discovered.

Mr. James Ryan was very seriously injured here on the 20th inst at No. 10 slope. He was coming home, and was riding between the cars in the mines. The car in front of the one he was riding on was too heavily loaded and caught on the timbers, throwing the car off the track, and by so doing it caught him on the foot and crushed it. The Jeddo doctors were telephoned for, and upon arrival made an examination of the limb and decided that amputation was necessary. He was very low on Sunday, but hopes are entertained of his recovery. Jim was an old driver. He has the sympathy of the whole community.

## A New Miners' Organization.

A new labor union called the "Workmen's Benevolent and Protective Association" was formed at Pottsville on Saturday. Forty-one delegates, representing the entire anthracite region, met and adopted a resolution declaring that the deplorable condition of the miners of the region is largely due to the unorganized condition of the masses, and that the various organizations in existence would better protect and advance the common interests of all if consolidated into one. The resolutions favor the eight hour movement and arbitration. The new order is intended to take the place of the old Miners and Laborers' Amalgamated Association and the Knights of Labor. It is believed by the projectors and organizers of the new association that it will be a success. They will strive for a perfect organization, and to do so will agitate and work for a complete unity of forces throughout the entire region. Another meeting will be held April 3.

## Observance of Holy Week.

The following circular has been sent out by Bishop O'Hara, of Scranton, to clergymen of the Catholic Church; the contents of which will be read in every church in the diocese on Sunday next:

REV. DEAR SIR:—In our circular dated February 25, and addressed to you, you were informed that we were authorized by the Holy Father to dispense the faithful of our charge from the observance of Lent, both as to the fast and abstinence. The closing week of Lent is now at hand, a holy week, which should be devoted in a special manner to reflections on the passion and death of Christ. We therefore revoke our dispensation of February 25 and enjoin on the faithful of our diocese the observance of Holy Week in accordance with the published "Rules for the observance of Lent in the Diocese of Scranton."

WILLIAM O'HARA,  
Bishop of Scranton.  
Scranton, March 22, 1890.

## Failing to Do Their Duty.

It is just a little more than a year ago that the complaint of Coxie Bros. & Co., against the Lehigh Valley Railroad Company was argued before the Interstate Commerce Commission, but not a word has been heard from that body as to its decision. Through the short-sightedness of a number of transportation questions in the intervening twelve months and has even stirred up a great deal of new work for itself, but it has been unable to find time to decide the most important single question of the day brought before it. This is a dereliction of duty that is a gross injustice to one of the parties to the suit. If Coxie Bros. complaint is just they should be so notified; if it is unjust the Lehigh Valley Railroad officials should be so informed, that they may arrange their business accordingly.

The only result in Mr. Coxie's agitation is a reduction of 20 cents a ton in the freight rates on the so-called unprepared sizes, although the complaint has been just as much preparation about pea coal as there is about stove and chestnut. The reduction of 20 cents has not been enough to check the inroads that bituminous coal is making in the fuel market. Through the short-sighted policy of the carrying companies the consumption of the steam-making sizes of anthracite coal is decreasing year by year. Nothing but decisive measures will now answer. Instead of exacting \$1.40 a ton for hauling pea coal, the toll should be put down to \$1 or 80 cents if necessary. Any rate that more than pays expenses is better than losing the traffic altogether.

## STATE NEWS.

The foot race at Wilkes-Barre on Saturday between Engleman, of Weatherly, and Lehman, of Wilkes-Barre, was won by the latter.

The body of John Gallagher, who disappeared from his home some time ago, was found in the Lackawanna River, at Moosic, six miles from Scranton.

George Newton, of Pittston, has invented a new process of making brick fuel from culm, which is odorless, causes a white ash and is free from resinous material.

About 250 Hungarians immigrants have arrived at Shenandoah during the past week, creating indignation among the hundred of idle miners at the influx of cheap labor.

A prize fighter, who claims to be the champion of Luzerne county, could only stand one round before Tom McCarthy, of Woburn, Mass., in a fight at Ocean, N. Y., on Tuesday night.

The Susquehanna Coal Company posted a notice at their collieries at Nanticoke on Monday, that on and after April 1st, the company would work full time during the whole season.

Governor Beaver has approved the recommendation of the Board of Pardons that the death sentence in the case of Jas. H. Jacobs, of Lancaster, convicted of the murder of R. E. Quigley, be commuted to imprisonment for life.

Governor Beaver issued a proclamation on Tuesday calling the attention of the people of this State to the opening of the international exhibition to be held on the island of Jamaica in January, 1891, under the auspices of the Government of that island.

The rope of a coal plane at the Indian Ridge colliery, at Shenandoah, broke on Tuesday and a car, thus liberated, dived from the top to the bottom of the plane, and killed Michael Murtician, a Polish laborer. A young man named Robert Tempest was badly injured.

During a quarrel at the Erie depot at Susquehanna on Tuesday, Michael Furey was stabbed three times by William Sullivan Foley, better known as "Mac-Arney" or "Burrill Hill." Foley is in a precarious condition. Foley was arrested, but escaped to the hills, pursued by officers.

Michael Murphy, Patrick Murphy and Richard Hurley, charged with the murder of John Moran during a drunken brawl at Hokenlaugus, were given a hearing on Tuesday at Allentown. Michael Murphy was held for trial, Patrick was discharged and Hurley was held in \$500 bail to appear as a witness.

The coroner's jury, investigating the death of James Clark, who was found dead on the street car track at Wilkes-Barre two weeks ago, rendered a verdict of violence at the hands of some person or persons unknown, and then his body placed on the railroad in order to place suspicion as to the cause of his death.

A party of foreigners who reached Pittsburg on Tuesday were found to be a portion of the 600 German and Hungarian miners who a New York employment agent had hired to go to work at Pottsville. When they arrived there they found a big strike in progress, and it is said, that the company's store absorbed all their wages. Some 300 of them quit last week and scattered all over the country. They denounced the New York employment agent, who they said, had misrepresented affairs to them in every way, and all were on their way back to Germany.

## The Post-Office to be Removed.

Postmaster-elect Fowler informs us that on Tuesday evening he received from the post-office authorities, at Washington, permission to remove the office from its present location to the vacant lot of Adam Sachs, corner of Front and Centre streets, where a large one-story building will be erected, in which will be located the post-office and the Progress office. On all the above named improvements are made, the post-office will remain where it is.

## Weekly Coal Report.

The anthracite coal trade does not display increased activity in any particular. The demand for the domestic sizes does not improve materially, but the furnace and steam sizes continue in good request and the consumption of these is fully equal to the supply. The output of anthracite for February, according to the official figures of the Chief of Bureau of Statistics, John H. Jones, fell over a quarter of a million tons behind the production for the corresponding period of last year, and it was also nearly 150,000 tons less than the previously estimated tonnage for that month. The decreased production last month was well distributed between the Wyoming, Lehigh and Schuylkill regions, indicating that all of the larger mining and carrying corporations are working in close harmony for mutual benefit, and we are informed that this policy will most likely be continued throughout the year. The general sales agents of the anthracite producing interests will meet again at New York to-day to discuss the situation of the coal trade and the question of reducing prices, but there is not much likelihood of any change being made while the demand for coal continues so light as it is presently. The individual operators are clamoring for a reduction in the rate of tolls, both for the line and tidewater business, but those well posted on the situation are of the opinion that there will not be any reduction in tolls while the prices for coal continue to rule so low.

The total amount of anthracite coal sent to market for the week ending March 15, as reported by the several carrying companies, was 525,964 tons, compared with 508,300 tons in the corresponding week last year, an increase of 20,133 tons. The total amount of anthracite mined thus far in the year 1890 was 5,175,140 tons compared with 5,760,941 tons for the same period last year, a decrease of 585,301 tons.—Ledger.
