ewhat do you want?" she asked, rather sharply, not much liking his appearance.

The man looked at her, opened his eyes wide as if struck with amazement, and said:

"Well, madam, I don't want anything. I see I've made a mistake. The fact is, I've come to the wrong house."

Then he murmured, but sufficiently loud for the lady to hear:

"What a complexion! Never saw such a lovely one in all my life! The pink and white seem to melt into one another. Beautiful! beautiful! If all ladies had such complexions, I might as well go into the workhouse at once!"

The lady had listened to his eulogy on her complexion with visible pleasure, and, noticing that the man had a box under his arm, asked:

"Have you anything to sell?"

"Well, madam I have, and I haven't, at least, not to you; for you don't require what I have to sell. So I'll say good day, madam, and must apologize for troubling you."

"Wat a minute. What is it you have to sell?" inquired the lady, her curisity being aroused.

"I have, madam—I repeat, it is no good to you—I have, madam, a wonderful wash for the complexion. It's called the 'lily and rose blend,' and is prepared from a recipe nearly a hundred years old, and was used with fascinating affect by some of the great beauties of France. But, good day, madam, I won't detain you any longer; as I said before, you don't require a complexion wash. Art, madam, great as it is, cannot compete with Nature."

He gave au intense glance of admiration at the lady, took off his hat, reveated two steps and the servered to the servered t

before, you don't require a complexion wash. Art, madam, great as it is, cannot compete with Nature."

He gave an intense glance of admiration at the lady, took off his hat, retreated two steps, and then stopped to
fiddle with the clasp of his box.

"Is it really good for the complexion?" asked the lady.

"Wonderful, madam, wonderful! but
as I have said—"

"How much is it a bottle?"

"One shilling, madam, or two bottles
for one and nine. But—"

"I'm half inclined to try a bottle,"
hesitated the lady.

"Of course, madam, if you feel charitably disposed, and would like to make
a present of a bottle or two to some
lady friend who suffers from the great
fetriment to beauty, a bad complexion

good complexions are very rare,
madam—I say, should you feel charitably disposed, madam, why, that's
another thing."

"Well, I'll take a bottle."

"Two for one and nine, madam," said
the man, insinuatingly.

"Very well, give me two, then."

"Thanky ou, madam. Good-day. I'm
extremely obliged to you, madam."

Said the lady to herself as she walked
indoors: "What a well-spoken manquite gentlemanly. It's a pity he can't
get some better employment than peddiling."

Seid the man to himself as he walked
lower the street, with a boundless

Said the man to himself as he walked Said the man to himself as he walked down the street, with a boundless, prairie-like smile on his face: "That woman has about the worst complexion I've ever seen in my life! It almost made me bilious to look at her. What gulible creatures women are! If women were fish, how they would bits!"

How Base-Balls Are Made.

How Base-Balls Are Made.

Automatic machines for making baseballs have been so successfully contrived that their introduction is likely to constitute a practical industry. Each machine winds two balls at one time, in the following way:

"A little para-rubber ball, weighing three-quarters of an ounce, around which one turn has been made with the end of a skein of an old-fashioned gray stocking yarn, is slipped into the machine, then another, after which the boy in charge touches a lever, the machine starts and the winding begins. The rubber ball is thus hidden in a few seconds, and in its place appears a little gray yarn ball that rapidly grows larger and larger.

When it appears to be about half the size of the regulation base-ball there is a click, the machine stops, the yarn is cut, the boy picks out the ball and tosses it into the basket. When this basket is full it is passed along to another boy, who runs a similar machine, where a half-ounce layer of worsted yarn is put on.

The next machine adds a strong

where a half-ounce layer of worsted yarn is put on.

The next machine adds a strong white cotton thread; a coating of rubber cement is next applied and a half-ounce layer of the very best fine worsted completes the ball with the exception of the cover."—Commercial Advertiser.

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the tests, and acts and refreshing to the saste, and acts gantly yet promptly on the Kidneys, Laver and Bowels, cleaness the system effectually, dispels colds, head-sches and fevers and ourse habitral donst particle. Any reliable druggist who may not have it on hand will pro-ours it promptly for any one who wishes to try it. Downt accept any substitute.

SAN FRANCISCO, DALL VEW YORK, W.C.

ment.

The speech with which Oliver Cromwell turned Parliament out of doors in 1653 has come to light through the researches of Dr. Wolfgang Michael, and there is strong evidence that it is authentic. It was this: "It is high time for me to put an end to your sitting in this place, which ye have dishonored by your contempt of all virtue, and defiled by your practice of every vice. Ye are a factious crew, and enemies to all good government. Ye are a pack of mercenary wretches, and would—like Esau—sell your country for a mess of pottage, and—like Juden—betray your God for a few pieces of money. Is there a single virtue now remaining among you? Is there one vice ye do not possess? Ye have no more religion than my horse. Gold is your God. Which of you have not bartered away your consciences for bribes? Is there a man among you that hat the least care for the good of the commonwealth? Ye sordid hirelings! have ye not defiled this sacred place, and turned the Lord's temple into a den of thievest By your immoral principles and wicked practices ye are grown intolerably oldous to the whole nation. You, who were deputed here by the people to get their grievances redressed, are yourselves become their greatest greivance. Your country, therefore, calls upon me to cleanse this Augean stable by putting a final period to your iniquitous proceedings in this house, and which, hy God's help, and the strength He hath given me, I am now come to do. I command you, therefore, upon periol of your lives, to depart immediately out of this place. Gol' Get you out! Make haste! Ye vernal slaves, begone! Soh! Take away that shining baulbe there, and lock up the door."

The Czar's Fit of Economy.

The Czar's Fit of Economy.

The Czar's re re received. Now, like ordinary households, this autocrat and Emperor of all the Russias, first instituted his economical reforms by cutting down the expense in the royal with the proposal and final period to your iniquitous proceedings in this house, and which, and you have the proposal proposal proposale

The Czar of Russia has been seized with one of those periodical fits of economy which all good wives know husbands will have about once in so often, and which must be endured, like flies in summer or company in house-cleaning, simply because they are inevitable. Now, like ordinary households, this autocrat and Emperor of all the Russias, first instituted his economical reforms by cutting down the expenses in the royal household, and reduced his wife's allowance one-half. Poor woman, she received only \$300,000 a year in the first place, and every woman's heart will throb with sympathy for her now. Fancy her trailing about the royal palace in last year's gowns and wearing the same old tians and coronets week after week. To be sure, the Czar thought he had just reason for his summary proceeding, for things in the household were not looked after according to a good housewife's domestic thrift. Evidently the Danish princess didn't go down in the kitchen and see that that the butter for the day was weighed out as it should be and gibles awed for stock, to say nothing of dish towels being scalded and the refrigerator looked after. One bill which some functionary had been drawing, as had his predecessors since the time of Catherine IL, through that august lady having once, when suffering from chapped lips, ordered a box of the article. One would think, however, that a man so best on every side by assassins and murderers would have trouble enough without interfering in the housekeeping or looking after the coal bills.—[Brooklyn Citizen.

It is 250 Years Old, and Was Worn by a Christian Chief.

Ernera Mail Pattome, son of the reigning chief of the Bay of Islands in New Zealand, was born in 1704. When Captain Cook, the circumavigator of the world, visited the territories of Fattomos's father visited the territories of Fattomos's father rady the rising hope of the brave and noble Moori race, which is now practically extinct. At an age when American youths are struggling with the cigarette, he was slaying giant warriors in battle. Pattome, who was destined to live to a romarkable age, became a Christian early in life. His position was a very difficult one, for the converted natives were often the converted natives were often the converted natives were often the beat of the the structure of the braves of the the structure of the structure of the structure of the converted natives were often the beat of the converted natives were often the beat of the braves of the structure of the s

The Decline of Wig-Making.

The Decline of Wig-Making.

The Decline of Wig-Making.

Baldness has grown so common among men of every age—boys are frequently highest to try it. Do not accept any substitute.

Baldness has grown so common among men of every age—boys are frequently highest to try it. Do not accept any substitute.

Baldness has grown so common among men of every age—boys are frequently highest to try it. Do not accept any substitute.

Baldness has grown so common among men of every age—boys are frequently held nowadays—that it has almost ceased to be noticed. Consequently, wigs are very little in demand, and the trade of wig-making has greatly declined. One rarely sees a wig now, except on sovery old-fashioned, every artificial man, addicted to paste diamonds and dyeing his whiskers. If it were not for the wearring of wigs on the stage, wig-making the strategy of wigs on the stage, wig-making the strategy of the masses of the people is forbidden—that is, for the men, for no sumptumy. Forty years ago men prematurely bald nearly always donned wigs. They did dath the unmarriage within the strategy of the masses of the people is forbidden—that is, for the men, for no sumptumy. Forty years ago men prematurely bald and with the proposed of the masses of the people is forbidden—that is, for the men, for no sumptumy. Forty years ago men prematurely bald and with the strategy of the mean of the marriage. White indications are stilled and the unmarriage with the strategy of the common and the strategy of the strategy of the strategy of the care the noble, the commoner, the soldier, the peasant, the priest of Buddha and the trade of which are the more and the tendency of the strategy of

too close together. Alice—Why, mother,
there was a chair between us. Mother
—Yes; but there should have been
two.

Pincking and Shearing Geese.

A curious case came before an English court for adjudication recently. A poulterer was charged with cruelty to forty-eight live geese by plucking them of their feathers, and the owner was charged with procuring the commission of the offense. The proceedings were taken by the Society for the Prevention of Cruelty to Animals. A witness swore that "after the geese were plucked their skins turned a purple color, and they seemed to be in pain. They walked about with their backs up, and shrank when touched."

The practice was shown by defendants to be very prevalent, and the society asked for a nominal fine to put a stop to it. The defendants said it was the custom of the district to pluck the feathers every six weeks, and if they were stopped from doing so many people would discontinue keeping geese, as much more money was realized by the sale of feathers than by the geese. The court imposed a fine of eighteen shillings upon the defendants, and expressed the hope that it would be a warning to other people. Plucking live geese and ducks prevails all over the United States.

There is a species of large waterfowl whose habitat in winter is the open lakes of the interior, and their feathers are so firmly set that they can not be plucked. Shearing is resorted to, and many housewise have beds made of the feathers, which almost equal those of eider down, as the stiff, troublesome quills are absent. Shearing geese and ducks could be made to supersede plucking.—American Agriculturist.

NERVE-PAINS. Cures Neuralgia. Oil Neuralgia. Neuralgia.

Sait Point, N. Y., April 16, 1889.

I suffered six weeks with neuralgia; a half bottle of St. Jacobs Oil cured me; no return of pain in three years. Have sold it to many, and have yet to hear of a single case it did not relieve or permanently cure.

6. AAY TOMPKINS, Druggist. Green island, N. Y., Feb. 11, 1889.

I suffered with neuralgia in the head, but found instant relief from the application of St. Jacobs Oil, which cured me.

E. P. BELLINGER, Chief of Police.

An Accident in a Spanish Bull-Fight.

A few years ago the inhabitants of Seville read with surprise, in the advertisement of an approaching bull-fight, this unusual notice:

"When the third bull shall have attacked the picadors and received three pairs of banderillas, a young peasant, by whom it has been brought up, will appear in the ring. He will approach the bull, caress it, and, after removing the banderillas, one after another, will lie down between its horns."

The announcement of so singular a feat attracted an immense crowd to the amphitheater. The third bull appeared, an animal with splendid horns and very brave; it slew four horses, received the banderillas, and became furious. Then, contrary to custom, all the toreadors retired from the ring, leaving the blody darts which hung from his neck.

All at once a long whistle was heard.

all the toreadors retired from the ring, leaving the blody darts which hung from his neck.

All at once a long whistle was heard. The bull paused and listened. It was repeated. The bull approached the barrier and a young man leaped into the ring, calling the bull by its name, "Mosquito!" The animal knew its master came to caress him, and was appeased. The peasant gave it his hand to lick, and with the other began to scratch it behind the ears—an operation which seemed to afford the brute much pleasure. He then gently removed the banderillas which annoyed the neck of Mosquito, made it go down on its knees, and placed his head between its horns. The grateful bull seemed to listen with pleasure to a pastoral melody sung by its master.

The admiration of the multitude, hitherto suppressed by surprise, burst forth with Andalusian violence and shook the building. Hearing this frenzied applause, which had accompanied all his sufferings, the bull, till then under a charm, appeared to wake and return to reality. It suddenly rose, bellowing, and the peasant tried to escape. But it was too late. The animal, as though furious at being betrayed, tossed the young man into the air, received him again on its horns, gored him, trampled on him, and crushed him to pieces, in spite of the efforts of the toreadors. The performance was suspended—a phenomenon in Spain—and the horrified public quitted the circus in silence.—New York Clipper.

The Two Gamblers.

A fox and a crow once engaged in a game of poker. They had played but a short time when an owl came past and stopped to watch the game. He soon noticed something crooked, and called the crow to one side and observed: "You are a fool to play with that fox. He goes to the deck and sorts out straights and flushes to suit himself."

I know that he goes to the deck after most of his hands, "replied the crow: "but he is so busy watching himself that he does not watch me, and I sort out a full house."

That is the way all gambling is done.

That is the way all gambling is done
