Will Celebrate Labor Day

Will Celebrate Lahor Day.

September 1st has been set apart and dedicated to labor in order that the wage worker may have a day of enjoyment and recreation. It is therefore for us to make an effort to observe the day in a manner as was intended by those who in our behalf had it made a legal holiday.

I therefore call upon the different L· A.'s to hold pic-nics on that day, and where two or more L. A.'s are conveniently located, to work together and make the day an enjoyable one. Choose some one from your ranks who will read the preamble or declaration of principles of the order. Home talent will be all that is necessary, or if you can get a speaker from some of your neighboring L. A.'s do so, and make the day as pleasant and instructive as possible.

do so, and make the day as pleasant and instructive as possible.

The time is now at hand for us to push our cause and to affirm the nobility of all who earn their bread by the sweat of their brow. A special meeting of D. A. S7 will be held in Freeland, at their regular place of meeting, on Saturday, August 2d, at 2 o'clock p. m. for the purpose of making arrangements for a general observance of the day.

A full representation from each L. A. is requested. J. D. Myers, D. M. W.

WILKES-BARRS, Pa., July 8.—P. M. Boyle, one of the most skillful mine bosses in the employ of Coxe Bros. & Co., of Drifton, has been in Wilkes-Barre for the past week, studying mine gas in the collieries of the Lebigh and Wilkes-Barre Coal Company. A few days ago the first gas ever found in a colliery of the Lebigh region was discovered by a party of miners who were opening a lower lift in one of the Coxes mines in Drifton. As the bosses there have no experience whatever with one than the control of the coxes where the control of the control of the coxes where the cox

who were opening a lower lift in one of the Coxes' mines in Drifton. As the bosses there have no experience whatever with gas, the company sent Mr. Boyle to Wilkes-Barre, with orders to make a close study of the deadly vapor and the means employed to prevent explosions. He returned home to-day and will at once communicate his information to his subordinates.

The above is taken from the Public Ledger, of Philadelphia, and shows the ignorance of the penny-a-liner who runs the associated press in the upper end. Gas has been known to exist at Drifton for many years, and none knows it better than Mr. Boyle himself. Some twenty years ago the editor of the TRIBUNE discovered gas in No. 1 slope at Highland, and so reported it to the bosses. But not until an accident was caused by it, and one life lost, was there any measures taken to guard against it. It is evident that the writer of the above dispatch was imposed upon, or else he does not know where Drifton is.

A Hungarian Murdered. A Hungarian Murdered.

A Hungarian, named George Wardzik, was brutally murdered at Luzerne Borough on Thursday last by persons who are as yet unknown. Wardzik was on his way home when he was accosted by three men, two of whom held his attention while the other dealt him a blow on the back of the head, which felled him to the ground. While he lay there he was again beaten around the head until his skull was crushed, and when found he was apparently lifeless. The affair was witnessed by several persons residing in the vicinity, but, owing to the quickness with which the perpetrators fied, they were not recognizable. A man named Michael Sweeney, who, tits said, was seen in the vicinity of the crime about the time it was committed has been arrested on the charge of being implicated in the matter, but is out on bail.
