Why Complain?

There is a question in our mind as to whether workingmen are really justifiable in complaining of the multiplicity of evils which afflict them, when they have the remedy for the removal of all these evils within their own grasp. In the matter of legislation we see them indifferent until the law-making power has discriminated unjustly against them, even then no effort is made to remedy the evil, except to growl and grumble at the men who made the laws, while at the men who made the laws, while at the men who made the laws, while at the men who have been cursed by them, are again elected, only to complete the

men, who have been cursed by them, are again elected, only to complete the iniquitous legislation which they began. In view of the near assembling of the State Legislature, it would be well for our workingmen to turn their attention towards Harrisburg. There is hardly a session of the Legislature, during which, the screw of oppression does not receive another turn, and during which labor is not made to carry additional burdens for the benefit of the non-producing classes. At every session we see bills passed in the interest of corporations, trusts and other monopolies, while those presented for the benefit of the laboring man are either pigeon-holed or handicapped with amendments, making them worthless (if passed) for the purpose which they were intended. No wonder that workings are seen in the light of coal are very too be purpose which they were intended. No wonder that workings are seen in the intense body of water in the Ebervale mines threatens to a conversation had with Mr. A. P. Godeke, of Butler Valley, in reference to the proposed tunnel to be driven to tap the water in the Ebervale and Harleigh mines. That the tunnel will be driven, as was then stated, is assured. The following, which we take from the Standard, gives the outline of the proposed undertaking at greater length:

The Tunnel Will He Driven.

Some mouths ago the Tribuve called the attention of its readers to a conversation had with Mr. A. P. Godeke, of Butler Valley, in reference to the proposed tunnel to be driven to tap the water in the Ebervale and Harleigh mines. That the tunnel will be driven, as was then stated, is assured. The following, which we take from the Standard, gives the outline of the proposed under the total transversation and the transver called the attention of its readers to a conversation had with Mr. A. P. Godeke, of Butler Valley, in reference to the proposed under the tentention of its readers to a conversation had with Mr. A. P. Godeke, of Butler Valley, in reference to the parchet the attention of its readers to a

Tand advances of this country. A single tray on land values would knock land speculation sky high.

The effects of the McKinley bill on the people so far has done more toward; educating the people as to the fallacy of protection than the most pronounced free trader ever dared to hope for.

Sprexer Ree told Milwaukee that "the West is now receiving the full-benefit of the protective traiff." Ore more such benefit and the West would have to lower her trunk from her window between two days, in the fashion of other hyly-hight combinations.

The Philadelphia Press says the "McKinley prices" is the cry of the hour. "McKinley wates will be the hour. "McKinley wates will be the hour. "McKinley prices" is the cry of the hour. "McKinley been passed by the last Congress." The working men of this part of the country are already enjoying the benefit of McKinley prices, in the increased cost of ther living, with no compensating increase in their wages. What taffy we are getting!

A Law has recently been passed by Congress and approved by the president, is another scheme by which this highly moral and proved by the president, is another scheme by which this highly moral and proved by the president, is another scheme by which this highly moral and proved by the president, is another scheme by a contract of the postoffice department for the benefit of the express companies, We don't take much stock in the

mosphere filled not only with matters of greaten therest, but with numerous parameters by the president, is another scheme by which this highly moral administration cuts down the revenues of the postoffice department for the benefit of the express companies. We don't take much stock in the morality of an administration which will countenance such a bill as the infamous McKinley G. O. P. steal.

The members of the borough council will be asked at the next meeting to make an appropriation towards paying the two night watchmen, who have been engaged by the business men of town, so that the system in augurated by them can be carried out more successfully. If any person doubt the good results accruing from it, let them stay out a little late at night and they can see for themselves the change that has taken place inside of a month. The noise and disturbance accasioned by the rougher element of our borough and surrounding villages have been broken up.

Since the above was put in type we learn that a few of our business men have refused to contribute any more, thereby lessening the pay of the two watchmen, so unless something is done by the council at its next meeting the system is likely to fall through.

Why Complain?

and have since been idlethough millions of dollars worth of coal are yet to be purpose which they were intended. No wonder that workingmen complain, deprived as they are of every comfort calculated to make mankind happy; compelled as they are, through poverty, to drive their little children into the breakers and mines before they have mastered the alphabet; forced as they are under a false, oppressive and rotten social system, created for their enslavement, to be come the pliant tools in the hands of monopoly. But should workingmen complain when they have the power, and need but to apply the remedy?

The action of the next Legislature will be watched with great interest. Both political parties came before the promise that if electeo "reform" would be their motto in all future legislation. If the workingmen were true to themselves and those who have the intelligence, manhood and pluck to fight the battles of labor, the ohoxious laws, which now bear so heavily upon them would soon be erased from men who would otherwise be their friends.
