

NOTES AND COMMENTS.

There are more evictions for non-payment of rents in New York and Brooklyn in one year, says a judge of the latter city, than in Ireland in two years.

The Philadelphia Record suggests a fruitful subject for speculation in an article in which it gives the names and addresses of more than 200 women of Philadelphia, most of them young, who mysteriously disappeared last year.

The Brazilian government has failed to obtain recognition by Germany, Spain, Austria and Russia. At St. Petersburg the czar has announced that nothing would induce him to recognize the republic during the lifetime of Dom Pedro.

DUBLING continues very frequently in Italy. During the last twelve months 3,750 ducks were fought and fifty of the combatants were killed. Some of the ducks were wounded several times in the same conflict, for 3,901 wounds were inflicted and over one thousand of these were serious.

It is believed that thirty strangers per week arrive in New York to purchase counterfeit money of shavers, and while each and every one of them is swindled, it is only about one out of every hundred who makes a complaint. His own guilt forbids, and he goes home a swindled and wiser man.

According to statistics recently sent out from Washington, the internal revenue receipts have increased nearly 7 1/2 per cent. over those of the previous fiscal year. The annual increase in population is about 2 1/2 per cent. Inasmuch as the internal revenue is largely derived from spirituous liquors the exhibit gives a very fair indication of the progress of the national thirst.

In all probability, the most enviable community in the world is that in the village of Klingenberg, on the Main, in Germany. Instead of paying taxes as ordinary mortals, the citizens of Klingenberg received each 350 marks from the income of several factories owned by the town. The division was made after the expenses of administration had been paid by money from the same source.

SMALLPOX has practically disappeared from the British Isles, only one death having been registered from this disease in England and Wales for the three months ending with September last. During the same period 85 deaths from smallpox were recorded in Venice; 53 in St. Petersburg; 18 in Paris; 11 in Vienna; 10 in Brussels; 7 in Turin; 6 in Prague; and a large number in Madrid.

VIC-PRÉSIDENT MORTON'S country-home at Rhinecliff, N. Y., is provided with two hundred and fifty incandescent lamps. An interesting feature is the wiring of the house in such a manner that should any window or door be tampered with by burglars, a special automatic switching device will throw into circuit a number of lights, thus giving the nocturnal intruder a bright and warm welcome.

THE YOUNG WOMEN'S Christian Temperance Unions of the larger cities will give special attention this year to "College Settlements," a plan by which refined and well-to-do women take up their residence for a time in the most undesirable quarters of the city, there to give an object-lesson in cleanly, healthful home-life. Such "settlements" in New York and Chicago are telling visibly upon the "slums" by which they are surrounded.

THAT precious relic of the old world, the Egyptian obelisk, in Central Park, absolutely refuses to be naturalized, says the New York Mail and Express. The spirit of serfdom was doubtless so ingrained into it that at this late day it simply could not be reformed. This is what the Board of Aldermen voted \$2,800 to get it a new coat of wax. The old coat has worn away, and the prospect of easterly storms threatened the old veteran's life. What a pity this antique party isn't put under cover!

SUPERINTENDENTS of factories would do well to regard attentively the regime which exists in a wool-spinning mill in Norway. All the unmarried hands, both male and female, are engaged for a fixed yearly salary and get board and lodging at the works. There is a large kitchen and a large dining room; where the employer and employed dine together. The owner's wife herself supervises the cooking. The bedrooms and the other apartments are roomy and well ventilated, the women sleep in one end of the building and the men in the other. They all look healthy and fresh, and very unlike ordinary factory hands.

ACCORDING to a functionary of the czar in New York city, it is a mistake to suppose that his Majesty is not aware of the attacks made in foreign countries upon his policy. He says: "There is no government in Europe that hears the voice of mankind more attentively than that of the czar. He recently thanked the American Minister in St. Petersburg for expressing approval of his tolerant disposition. He has prohibited the flogging of women on account of the foreign outcry against it. There is no doubt that he has been made angry by the English and American remonstrances against his treatment of the Jews, and that he has endeavored to prevent him from changing his anti-Semitic policy. He hears some foreign protests and disregards others, but he knows of them all, as can be found out by anybody who reads the Official Messenger."

A PEASANT physician named Rieger, of Glogau, in Silesia, announces a cure for diphtheria which an agent of the Emperor has examined and reported very favorably upon. It is thought to be a mixture of extracts from two or three common weeds and an oil. The salve resulting from the mixture is liquefied, and applied with a brush to the interior of the throat. The remedy was discovered by Rieger's father, a shepherd. It was applied by him only to external wounds. Once, when young Rieger's whole herd was dying of diphtheria, he, in despair of all other means, began treating their throats with the salve. The favorable effect was apparent almost immediately, and in a few days every head of cattle was well again. Shortly afterward diphtheria became epidemic in the village. Rieger was invariably called to give his remedy in the most severe cases, and almost without exception it was followed by recovery. Gradually its fame spread, till to-day he is receiving calls to cure persons of diphtheria all over Germany. The cures that he has contributed most to his reputation were effected a few weeks ago in the family of the Freiherr von Falkenhausen, in Bielea.

AN experiment for the solution of the tramp question was begun in Germany by a benevolent clergyman in 1882. It was to give relief to those vagrants in exchange for work. He established stations called labor colonies, and last year twenty-one of them admitted 6,281 persons. If a tramp reuses the work pro-

vided for him at a colony, he is turned over to the civil authorities and disposed of according to law. The system has already reduced vagrancy and mendicancy in the empire, it is reported, and has diminished the number of paupers. The work supplied is largely farming, labor, reclamation of wastes, forestry or trades. The stations are supported solely by private subscriptions. After fourteen days the tramp is paid moderate wages, and from them is deducted the cost of clothing and other articles he may use. Besides the colonies there are a thousand "stations" where wanderers have temporary relief always in return for work.

Twenty-seven locomotives are in course of construction at the Baldwin Locomotive Works, Philadelphia, which, when completed, will be shipped to New South Wales, Australia. This is one of the largest foreign orders ever filled by the Baldwin Works, and coming from an Australian province under the dominion of Great Britain, is very significant. These twenty-seven locomotives will be taken on a railroad owned and operated by the Government of New South Wales, and will be used to haul English government roads were mainly supplied with English-made locomotives. The contract for the iron monsters was made about two months ago. Ten of them are passenger locomotives, built on the ordinary American plan, and are especially designed for runs on heavy "stations" where wanderers have temporary relief always in return for work.

The Lutheran is a church of many languages. The latest statistics show that of its baptized membership throughout the world 32,000,000 speak German, 5,300,000 Swedish, 2,500,000 Norwegian, 2,300,000 Danish, 2,048,000 Finnish, 1,250,000 English, 1,113,000 Hungarian, 824,000 Livonian, 480,000 Couronian, 372,000 Estonian, 70,000 Icelandic, 48,000 Bohemian, and that in every other civilized tongue she is well represented, numbering in the world 24,000 educated ministers, 28,181 church edifices, and 50,061,380 baptized members. This church, though taking its origin in Germany, seems to know no other fatherland or mother tongue. She is at home everywhere. In the United States, though among the last to come to general public recognition, she is doing Christian work in twelve different languages, and has 4,992 ministers, 7,948 churches, and 1,100,000 communicant members, 24 theological seminaries, 25 colleges, 48 seminaries and academies, 57 orphan homes and hospitals, and 140 church papers, of which 48 are English, 51 German, 16 Swedish, 15 Norwegian, 4 Danish, 3 Finnish, 2 Icelandic and 2 French.

Some idea of the enormous value of real estate in New York can be gathered from the fact that a single plot of ground on the northeast corner of Thirty-first St. and Broadway is the subject of sharp bidding for nearly two years on the basis of \$600,000. This is a building on the premises, but as it is a somewhat antique structure it does not enter into the negotiations for the sale of the land. It is said that \$650,000 was refused last week for this lot. The enormous value of property along upper Broadway is the cause of some of the most dilapidated and ragged appearance of the buildings on that thoroughfare. Many of the tumble-down three-story brick buildings pay their owners \$7,000 and \$8,000 a year in rents. It is more profitable to keep them in their present condition than it would be to pull them down and put up more pretentious structures. The wedge-shaped lot at the junction of Fifth Avenue, Broadway and Twenty-third street, which is covered by a rambling lot of two-story buildings, has been the subject of exhaustive figuring by every builder and real estate speculator of consequence in New York. None of them can figure out higher returns on the capital invested than the ram-shackle little buildings now pay. If the owner were to take them down and put up a ten-story building his loss in the way of interest on the capital invested in the new building and the net loss on rents during the construction of the building would be equivalent to a good-sized fortune; hence one of the most important bits of ground in America is held under the head of unimproved real estate.—[New Orleans Picayune.

Artificial Rubies. About three years ago, two French chemists succeeded in producing rubies artificially. The crystals obtained, however, were small, and since then the inventors have been occupied with the problem of increasing the size of the rubies obtained. To this end considerable changes have been made in their methods of operating. Instead of using pure alumina, as formerly, alumina alkalinized by potassium carbonate is employed. This addition of an alkali does not alter the purity of the crystals obtained, while it facilitates their regular formation. In the original experiments the operation was completed in twenty-four hours, but the reaction is now extended over several months, with the result of obtaining much larger crystals. As much as seven pound weight of rubies is said to have been obtained at a single operation. Although the crystals are still relatively small, they are sufficiently large to mount, which was not the case in the first essays of the inventors.

Salt for Stock. It is scarcely necessary, at this late day, to question the advisability of giving salt to farm stock. It is true that they may live a long time without, but what deprivations our animals may endure is not the way we should look at the subject. In European countries, where they have not only the salt licks, but have also conducted their experiments with greater care than has ever been attempted in this country, salt is generally considered as essential to the health and comfort of all herbivorous animals. In France, an ox is allowed about two-thirds of an ounce of salt per day to every two hundred pounds of his weight, while a slightly larger amount is given to pigs and sheep. The Germans have a proverb that "one pound of salt makes ten pounds of meat."

Neutralizing Lightning Pains. A singular phenomenon of the lightning flash is that its chief effects are observable only at the points of its entrance and exit. Thus a flash which entered a school room injured only the first and last child on the form, those between escaping unhurt. The most effective treatment of lameness and other ailments

due to lightning is the application alternately to the head, trunk and limbs of a large horseshoe magnet. In case of a quick stroke the clothing should be unfastened, the patient laid with the head high and quietness and fresh air should be secured. If consciousness does not return the head should be exposed to a stream of cold water.

SNOW TWO MILES DEEP. N. B. Lazard's Experience While Prospecting in Alaska.

"Yes, I have been in a country where the snow is two miles deep," said N. B. Lazard, a mining expert from Tombstone, Ariz., at the Palmer House recently. Mr. Lazard was in the East during the recent snowstorm, and was talking about what the people in Pennsylvania called a blizzard.

"They thought the two-foot fall of snow was something to talk about," continued the visitor, "but if they would visit Alaska about two hundred miles up the Yukon River they would find snow that for miles is so thick that the banks almost reach the skies. It keeps on accumulating as fast as it falls during the last ten scientific men will not be able to say truthfully the earth is round."

"I was in Alaska in the Consofka regions in 1885, and that year the snow-fall was quite heavy. Snow that falls there remains, for it never melts. A prospector named Jim Thomas was with me during the trip, and one beautiful morning he fell from a glacier about 100 feet. The fall broke both his legs, one of his arms, and crushed in several ribs, besides injuring him internally. He was conscious when I reached him, and he told me he knew he was going to die. He begged me to see that his mother and sister in the East received all the property he had left in Harrisburg. I promised, and have fulfilled the trust."

"Just before he died he asked me to pray for him, and, for the first time since I had knelt beside my mother when a little boy, I got down on my knees and asked God to receive the soul that was about to depart. I prayed as I never have prayed since, and I meant all I said. There came a smile on poor Thomas' face when I said 'Amen,' and, with a most peaceful expression on his countenance, he breathed his last. I buried him in the snow, and to-day, if his body could be found, I know it would look as natural as the moment he died, peaceful expression and all."

Mr. Lazard also had some thrilling experiences with the Alaskan. While hiding in a chaparral and not daring to move for fear of his own life he witnessed atrocities upon a mother and her daughter the recital of which explains why army officers prefer to shoot their wives rather than to let them fall into the hands of the savages. "Afterward," said Mr. Lazard, "I had the satisfaction of shooting down two of the wretches and of sticking a knife into them. I tell you the only good Indian is a dead Indian."

Ericsson's Exactness. John Ericsson, the inventor, had not only genius but the immense capacity for taking pains" which sometimes accompanies it. All his work was so exactly done that he could demand from workmen the most rigid observance of details in the drawings furnished for their guidance, without fear that they might go astray.

When the steamer Columbia was built, its engines were put in according to his designs. It was customary at that time to get the length of the piston-rod from the engine itself, and a man, one day, engaged in measuring it with a long baton. Captain Ericsson chanced to go on board, at that moment, and going up to the workman, he roared: "What are you doing there, sir?" "Getting the length of the piston-rod, sir."

"Is it not on the drawing?" "Yes, sir." "Then why do you come here with sticks? Go and get the length from the drawing, sir! I do not want you to bring sticks, when the drawing gives the size."

At another time, a workman was endeavoring to put in the engines of the steamship, and found great difficulty with a small connection which is described as being "crooked as a dog's hind leg." Finally he went to Ericsson, and informed him that the rod could not be put in place. "Is it right by the drawing?" was his query. "Yes, sir." "Then it will go in." And on another trial, it did. The master brain had left nothing to be supplied by the ingenuity of others.—[Cincinnati Com.].

A Noted Safe-Blower. Cincinnati detectives have just arrested the most noted safe-blower outside of prison walls in the country. He is William Coleman, alias Connelly, alias Rodgers. It was owing to Coleman's ingenuity that the use of nitro-glycerine is due in the bursting open of safes—a discovery which renders unsafe even the wonderful time lock which is generally considered proof against "gophers" or safe-blowers. In Cincinnati, a few years ago, he advertised over the initials E. C. for a small vat of nitro-glycerine, which he got by paying \$1,000, the sum offered. Soon after, with several others, he burst open the safe of the treasurer at the east of London county, Tenn., and stole \$15,000. One of the gang was soon after captured in Alabama, with \$10,000 of the stolen money in his pockets. Those captured and placed in the London prison were released by force soon after by Coleman and a number of the gang. After robbing a bank in Auburn, N. Y., the gang went abroad. All of them that came back have either been killed or sent to prison, and now Coleman is in custody.—[New Orleans Times-Democrat.

A Hairless Horse. Now and then a very curious specimen is found among the desert horses of Australia. The oddest of these that I ever saw was a huge, ungainly beast without a hair upon it. It was cut out of a wild herd and roped in by a station hand, who sold it for a drink and a plug of tobacco to some man riding along the road past the homestead. The latter tamed the hairless horse, taught it a few commonplace tricks and showed it all over the colonies. He was said to have taken \$100,000, though he spent it as fast as he got it. I saw the animal many times. It was rather well shaped when it fell out, and having no mane but a high neck and crest, it had something of the appearance of horses in antique sculptures or bronzes. Its skin was perfectly smooth and shiny and a dark mottled brown in color, and the poor thing seemed very intelligent and docile.

Cause of Rheumatism

An acid which exists in our milk and other acids is believed by physicians to be the cause of rheumatism. Accumulating in the blood, it attacks the fibrous tissues in the joints, and causes swelling and pain. What is needed is a remedy to neutralize the acid, and so to purify the blood and liver that all waste will be carried off. We can honestly recommend Hood's Sarsaparilla for these purposes. It has cured others of rheumatism and it will cure you.

Hood's Sarsaparilla Sold by all druggists. Price, six for \$1. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass. 100 Doses One Dollar

"August Flower"

The Hon. J. W. Fennimore is the Sheriff of Kent Co., Del., and lives at Dover, the County Seat and Capital of the State. The sheriff is a gentleman fifty-nine years of age, and this is what he says: "I have used your August Flower for several years in my family and for my own use, and found it does me more good than any other remedy."

"I have been troubled with what I call Sick Headache. A pain comes in the back part of my head first, and then soon a general headache, until I become sick and vomit. At times, too, I have a fullness at the pit of the stomach, and sourness, when food seemed to rise up in my throat and mouth. When I feel this coming on if I take a little August Flower it relieves me, and is the best remedy I have ever taken for it. For this reason I take it and recommend it to others as a great remedy for Dyspepsia, &c."

G. G. GREEN, Sole Manufacturer, Woodbury, New Jersey, U. S. A.

The American Language. "One col," he brusquely announced as he entered a "gents" furnishing store on upper Broadway.

"Clerk," replied the girl in attendance, as she took down a collar and wrapped it up. "Much?" he queried, as he toyed with a silver pipe. "Quite dol," she answered, as she gave him the change.

"O. K.," he said, as he turned away. "Tra-la," she replied, as she went back to wait on an old man who had been looking at neckties. "What sort of language do you call that?" he asked. "Short-hand, sir." "Oh, that's it. Sort of saves your breath, doesn't it?" "Course."

"Well, I don't think I could ever get used to it at my age. It don't express enough." "Why, land o' love! I want to say to you that I'll wear one of my suspenders 'round my neck for a tie before I'll pay fifty cents for such a shoddy affair as this. How could you express all that in three or four words?" "I can do it in one," she replied. "Git?" "Git," he ambled.

Intoxication by Ether. Intoxication by ether is quite an old fad which is still prevalent. The practice came into use in England in 1841, and it was customary at that time to get the length of the piston-rod from the engine itself, and a man, one day, engaged in measuring it with a long baton. Captain Ericsson chanced to go on board, at that moment, and going up to the workman, he roared: "What are you doing there, sir?" "Getting the length of the piston-rod, sir."

"Is it not on the drawing?" "Yes, sir." "Then why do you come here with sticks? Go and get the length from the drawing, sir! I do not want you to bring sticks, when the drawing gives the size."

At another time, a workman was endeavoring to put in the engines of the steamship, and found great difficulty with a small connection which is described as being "crooked as a dog's hind leg." Finally he went to Ericsson, and informed him that the rod could not be put in place. "Is it right by the drawing?" was his query. "Yes, sir." "Then it will go in." And on another trial, it did. THE ARIZONA KICKER.

We extract the following interesting items from the last issue of the Arizona Kicker: ONE LESS.—We know of one Indian who won't gambol along the flowery war-path any more to speak of. We refer to Lay-Dove-And-Roll-Over-On-The-Grass, otherwise known as Big Jim. He was helping himself to a mule from Thompson's corral the other night, when one of the herdsmen killed him so dead that he didn't have time to pull in his tongue. As usual, most of the funeral expenses had to come out of our pocket, although he was not our meat.

GETTING MONOTONOUS.—Some one in Omaha is selling off land in this neighborhood for gardens and pasturage, and every day a ten-foot line is up to take possession. He finds the land to be long to the Government, and to be composed as follows: Cactus..... 15 Sage brush..... 15 Sand..... 10

In five different cases our private graveyard has been included in any sales, putting us to considerable trouble and expense to hold it. We are getting rather tired of this sort of thing, and the next pilgrim who comes along and takes that graveyard for a cattle range of which he is the sole owner has got to skip at the word, or made the tenth man sleeping under the sands.

WE APOLOGIZE.—The editor, owner, publisher and proprietor of the thing called the "Columbian" was driven frantic with jealousy because we were able to order and pay for three bundles of paper at once. We happened to meet him in Bonny's hardware store Tuesday afternoon, where he was dicker for a grindstone to use as a balance wheel on his "only steam press," and he hoped he can be patched up, sewed together and saved from the grave, through the latest reports are discouraging. We didn't mean to. If he will only get well he may abuse us the rest of his natural life and we won't say a word.

ANNOUNCEMENT.—We hereby announce ourselves as a candidate for Mayor at the election in April. It is a little early, but no man ever secured an office by being a little late. We don't propose to let any sense of false modesty stand in the way of getting there. We can read and write and cipher. We represent the intelligence and manners of this community. We are the top-sheaf of society and can borrow a hundred dollars at the bank any day. In brief, we are the best candidate who can be put up for this office, and we are doing the public a favor by consenting to run. We shall have something further to say on this subject later on. We don't want the office, but the office wants us. At least we think she does.

Do You Ever Speculate? Any person sending us their name and address will receive information that will lead to a fortune. Send, Lewis & Co., Security Building, Kansas City, Mo.

Water power runs a Quebec electric plant. Lee Wa's Chinese Remedial Cure. Harlan's Nervine. Book-keeping, Business Forms, Penmanship, Arithmetic, Short-hand, etc. Macaulay's History of England. Circuits free. Bryant's College, 457 Main St., Buffalo, N. Y.

There are in England 6,668,260 children under ten years of age. If not above being taught by a man, take the good advice. Try Dobbin's Electric Cure, next Monday. It won't cost much, and you will know for yourself just how good it is. Be sure to get no imitation. There are lots of them.

The Protestant Episcopal Church has 112 congregations in New York and Brooklyn. FITS stopped free by Dr. Kline's GREAT NERVE RESTORER. No fits after first day's use. Marvelous cures. Treatise and bottle free. Dr. Kline, 601 Arch St., Phila., Pa.

New York City's 1st in population is 997,873,23; and that of Brooklyn 838,181,565.

Is Your Child Sick.

S. S. S. NEVER WITHOUT IT. It is perfectly harmless, yet so powerful as to cleanse the system of all impurities.

Books on Blood and Skin Diseases Free. THE SWIFT SPECIFIC CO., Atlanta, Ga.

ELY'S CREAM BALM—Cleanses the Nasal Passages, Alleviates Inflammation, Heals the Sore, Restores Taste and Smell, and Cures Catarrh of the Throat.

THE greatest burdens are not the gainfullest. You can lessen FE'S BURDEN by using SAPOLIO. It is a solid cake of scouring soap used for cleaning purposes.

What would you give for a Friend who would take half your hard work off your shoulders and do it without a murmur? What would you give to find an assistant in your housework that would keep your floors and walls clean, and your kitchen bright, and yet never grow ugly over the matter of hard work? Sapollo is just such a friend and can be bought at all grocers.

PAIN'S REMEDY FOR CATARRH.—Best, Easiest to use. Cheapest. Relief is immediate. A cure is certain. For Cold in the Head it has no equal.

It is an Ointment, of which a small particle is applied to the nostrils. Price, 5c. Sold by druggists or sent by mail. Address, E. T. HAZELTINE, Warren, Pa.

Guaranteed five year eight per cent. First Mortgage on Kansas City property, interest payable every six months; principal and interest collected within due and regular without expense to lender. For sale by J. H. Bauerlein & Co., Kansas City, Mo. Write for particulars.

The most artistic house in Washington is that of Vice-President Morton. BECHAM'S PILLS act like magic on a weak stomach. Germany has 3,000 miles of wire underground.

Money invested in choice one hundred dollar building lots in suburbs of Kansas City will pay from five hundred to one thousand per cent. the next few years under our plan. \$25 cash and \$5 per month without interest controls desirable lot. Particulars on application. J. H. Bauerlein & Co., Kansas City, Mo.

The yearly receipts of coal in New York city are about 6,100,000 tons. Deafness Can't be Cured By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever. It is not a matter of time, but of fact, that it is cured by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that we cannot cure by taking Hall's Catarrh Cure. Send for circular, free. F. J. CHERRY & Co., Toledo, O. Sold by druggists, 75 cents.

A Portland (Ore.) Chinaman died recently and left property worth \$200,000. The estate is valued at \$200,000.

Entirely to the Best. All are entitled to the best that their money will buy, so every family should have, at once, a bottle of the best family remedy, Syrup of Figs, to cleanse the system when constive obstructions. For sale in 50c. and \$1.00 bottles by all leading druggists.

In New Zealand one in every five of the adult male population is a holder of land.

Hood's Calendar for 1891. To convey briefly an idea of the magnitude of our Calendar business, we will say that the edition for 1891 is \$100,000. To make this enormous number requires the labor of fifty people in printing presses and various other machinery for seventy days, manufacturing at the rate of \$1,000 calendars per day.

ANNOUNCEMENT.—We hereby announce ourselves as a candidate for Mayor at the election in April. It is a little early, but no man ever secured an office by being a little late. We don't propose to let any sense of false modesty stand in the way of getting there. We can read and write and cipher. We represent the intelligence and manners of this community. We are the top-sheaf of society and can borrow a hundred dollars at the bank any day. In brief, we are the best candidate who can be put up for this office, and we are doing the public a favor by consenting to run. We shall have something further to say on this subject later on. We don't want the office, but the office wants us. At least we think she does.

Do You Ever Speculate? Any person sending us their name and address will receive information that will lead to a fortune. Send, Lewis & Co., Security Building, Kansas City, Mo.

Water power runs a Quebec electric plant. Lee Wa's Chinese Remedial Cure. Harlan's Nervine. Book-keeping, Business Forms, Penmanship, Arithmetic, Short-hand, etc. Macaulay's History of England. Circuits free. Bryant's College, 457 Main St., Buffalo, N. Y.

Is Your Child Sick.

S. S. S. NEVER WITHOUT IT. It is perfectly harmless, yet so powerful as to cleanse the system of all impurities.

Books on Blood and Skin Diseases Free. THE SWIFT SPECIFIC CO., Atlanta, Ga.

In reading over the literary items of the week, I found not much to interest me, until my eye caught sight of an article headed "Jenk's Dream." Imagine my surprise to find it ended up with a recommendation to use Dr. Pierce's Pleasant Pellets. Nevertheless, being a great sufferer from sick headache, I determined to try them, and, to my great joy, I found prompt relief, and by their protracted use, a complete immunity from such attacks. Pierce's Pellets often cure sick headache in an hour. They are gently laxative or actively cathartic, according to size of dose. As a pleasant laxative, take one each night on retiring. For adults, four act as an active, yet painless, cathartic. Cause no griping or sickness. Best Liver Pill ever made. Smallest, Cheapest, Easiest to take. For Constipation, Indigestion and Bilious Attacks, they have no equal.

Manufactured at the Chemical Laboratory of the WORLD'S DISPENSARY MEDICAL ASSOCIATION, No. 63 Main Street, Buffalo, N. Y.
