

THE growth of most of the German cities, according to the census lately completed, is nothing short of marvelous. It rivals, and in several cases exceeds, the increase of population of the chief cities of the United States, and it leaves all recent European precedents far behind.

SENATOR GORMAN is a most methodical man. He rises at just 6 o'clock every morning, sits just sixty minutes at dinner, and never on any pretext permits an interruption of his meals. He takes a walk of a fixed length every day, bathes at the same hour, and never uses tobacco or liquors.

SOME smokers have an idea that "tobacco heartburn" can be cured by swallowing the white ashes from the end of a cigar. Chemists say that it is merely foul cure.

In Paris, out of 2,700,000 residents, it is calculated that one in eighteen, or 150,000, live on charity with a tendency toward crime. In London the proportion is one in thirty.

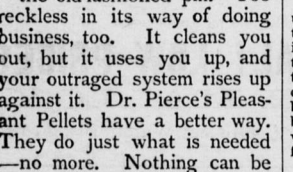

Opinions differ as to the effect of the free ingestion of water at meal times, but the view most generally received is probably that it dilutes the gastric juice and so retards digestion. Apart from the fact that a moderate delay in the process is by no means a disadvantage, as Sir William Roberts has shown in his explanation of the popularity of tea and coffee, it is more than doubtful whether any such effect is in reality produced. When ingested during meals, water may do good by washing out the digested food and by exposing the undigested part more thoroughly to the action of the digestive ferments.

Fepem is a catalytic body, and a given quantity will work almost indefinitely, provided the peptones are removed as they are formed. The good effect of water drunk freely before meals has, however, another beneficial result—it washes away the mucus which is secreted by the mucous membrane during the intervals of repose, and favors peristalsis of the whole alimentary tract. The membrane thus cleansed is in a much better condition to receive food and convert it into soluble compounds.

If you remember how much easier it is to remember what you would rather forget than remember, than remember what you would rather remember than forget, than you can't forget how much easier it is to forget what you would rather remember than forget, than forget what you would rather forget than remember.—*Elmira Gazette.*

**FITS STOPPED FREE BY DR. KATZ'S OCEAN NERVE RESTORER.** No fits after first day's use. Marvelous cures. Treatise and 30 trial bottles free. Dr. Katz, 311 Arch St., Philadelphia, Pa.

A new lace manufacturing establishment is to be started on Long Island.

Too large—the old-fashioned pill. Too reckless in its way of doing business, too. It cleans you out, but it uses you up, and your outraged system rises up against it. Dr. Pierce's Pleasant Pellets have a better way. They do just what is needed—no more. Nothing can be more thorough—nothing is as mild and gentle. They're the smallest, cheapest, the easiest to take. One tiny, sugar-coated granule's a gentle laxative—three to four are cathartic. Sick Headache, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels are promptly relieved and permanently cured.

### Without Medicine.

The hygienic treatment of A. Whitford Hall, Editor of The Microscope, consists in the use of several cures: Dyspepsia, Constipation, Diarrhoea, Headache, Neuralgia, Neuritis, Catarrh and Impaired Circulation. Prescriptive pamphlet free. Address: Health Process Co., 39 Nassau St., New York.

### BEST BROOM HOLDER.

Up. In never out of order. Sample 15c, postpaid. Agents double their money. Terms for this and other articles: 25c. Address: ENGLE GUN CO., 415 Broadway, N. Y. Stamps taken.

### BAKER AND ROASTER.

Latest improved and most perfect of all. Many GOOD COOKS do not know the value of this Pan for BREAD and CAKE BAKING. 5c. Address: M. Koenig & Co., Hazleton, Pa. Agents wanted.

### CATARRH.

Relieves Tense and Irritable, quickly. Relieves Cold in Head and Throat. See at once. Address: E. Y. BROS., 30 Warren St., N. Y.

### PROF. LOISETTE'S NEW MEMORY BOOKS.

Articles on two recent Memory Systems. Ready about April 1st. Full Tables of Contents forwarded only to those who send stamped direct and envelope. Also Prospectus FREE of the Loisetian Art of Never Forgetting. Address: Prof. LOISETTE, 27 Fifth Ave., New York.

### ASTHMA CURED.

AND HAY FEVER. CURED BY STAY-CURED. A NEW DEPARTMENT. PHARMACY, 115 N. 3RD ST., PHILADELPHIA, PA.

### DENSION JOHN W. HOBBS.

Successor to Prof. Loissette's Memory Books. 115 N. 3RD ST., PHILADELPHIA, PA.

### DISEASE GERMS.

#### The Appearance and Prodigious Growth of Bacteria.

Our systematic knowledge of the bacteria is still so meagre, so many species and doubtless so many families of them have never yet come into the range of human vision, and our glimpses of their life powers have been so fragmentary, that as yet we can only try to bring a little temporary order out of the chaos by grouping them according to their shapes.

We find, when we muster all the forms which have as yet been seen, that they all fall into one of three classes: spherical, rod-like, or spiral.

Further subdivisions of these classes have been made, and generic and specific names attached to many hundreds of forms; but over these details we need not linger now. How they look and what they do is here of more importance than what they are.

Although with the ordinary microscope powers the bacteria look like little balls or straight or spiral rods, we find, when we use the most powerful or perfect lenses, that they consist of a minute mass of granular protoplasm surrounded by a thin structureless membrane.

When we put them under favorable conditions for growth, and give them food enough, they may be seen to divide across the middle, each portion soon becoming larger and again dividing, so that it has been calculated that a single germ, if kept under favorable conditions, might at the end of two days have added to the number of the world's living beings 1,500,000,000 new individual bacteria. In fact, if this sort of thing went on for a few weeks unimpeded there would be very little room left on the earth's surface for any other forms of life, and pretty much all the carbon, hydrogen, oxygen, and nitrogen which is available for life purposes in the world would be used up.

There would be a cornucopia of life, and even the master, man, would be forced to the wall, and become the victim of his insatiable fellow-worlder, the bacterium. But, as it happens, this sort of thing does not go on; the food grows scanty; or the temperature becomes unfavorable; or the sun shines hot—and the sun is a sore enemy of your growing bacterium; or, the water is so full of other forms of life, or various chemical substances which often poison itself, or its fellows, or both together. So the proportion is preserved by such a fine balance of the natural forces that, prolific as they are, the bacteria in the long run are held closely within bounds the world over.—*Harper's Magazine.*

### Marriage in Frigid Climes.

In Iceland a bride is known by her dress, which is finer and more costly than that of her sisters, and she wears around the head-dress, close to her face, a silver gilt crown; chains are suspended from her neck, and to one is attached a heart, a present from the groom, in which some kind of perfume is put. This last is a very pretty sentiment, and one worthy of our civilization.

In Lapland the lover, when going to propose to the girl of his choice, arms himself with two bottles of brandy. One he presents to her father; the other he drinks himself.

No business is discussed till the bottles are finished, when, both being in a happy social state of mind, it is presumed the consent is gained without much difficulty. After the betrothal the groom must bring a bottle of brandy to his prospective father-in-law every time he calls upon the daughter, which accounts, perhaps, for the long time which a Lapland father often keeps the lover waiting. After perhaps years of this he is obliged to serve the father for a whole year as his marriage, while the mother-in-law, if she be the object of terror, the fact is carefully concealed, and she is waited upon most assiduously by her son-in-law.

She holds the reins in her own hands, usually lives with her daughter, and has the power to divorce her by simply packing his things and throwing them out of the house. The husband then follows them, and both are free to look for other companions. Sometimes, too, the would-be brides are very shy, and have to be brought into the room by two women, where they crouch in a corner with their faces covered.—*[New York Press.]*

### OLDER THAN SYRIAN CEDARS.

The Oldest Tree on Earth Will See Earth's Youngest City.

Among the remarkable natural products of the United States which will be sent to the World's Fair, the section on the giant trees of California. Keep the old lady for four weeks and then send her back to me.—*[Detroit Free Press.]*

### A Queer Medical Case.

There is a queer case at Gouverneur Hospital. It is that of a man who at noon yesterday weighed about 120 pounds and for a person his size was much emaciated. At 6 o'clock last night he was so puffed up that he looked as if he weighed twice as much. It took the hospital surgeons over an hour to convince his daughters that the man was really their father. Air is the cause of this transformation. The victim of this inflation is in Paul Shoenlein, a German laborer forty years old, of No. 157 West Sixty-second-st. While at work yesterday afternoon on a pile of timber, it was said at the hospital, some of the boards fell upon him, breaking his ribs. One of the broken ribs penetrated his lungs letting the air out and into the tissues under the skin. This caused a general puffing out of the skin all over his body from head to heels, until he was totally unrecognizable.

At Gouverneur Hospital, where he was taken directly after the accident happened, the doctors say they have only had one case like it before. The man after four days resumed normal shape and size and left the hospital. He is now well out of all proportions. His daughters were informed of the accident to their father, and went to the hospital to see him. But when the attendants pointed out the man as their parent they were in search of, they refused to believe what was told them.

### The Resurrection Bone.

It is said in the brief details of Emma Abbott's cremation rites, that the sweet singer was reduced to two or three pounds of ashes, which were preserved in a silver vase.

Now, it is well known that a two, or even four, hour cremation does not totally consume the bones, and there is always a mass of these left, which are thrown away as refuse.

Among these human bones is one which is believed to be impervious to death or decay. It is a small bone, part of the backbone, and is called "Luz." It is said that learned rabbis demonstrated to the Emperor Adrian that water would not seep it, fire would not burn it, a mill could not grind it, nor could any hammer break it.

This resurrection bone is supposed by many to be the nucleus of the immortal body. Hudibras wrote:

"All 'th' other members shall, they say, Spring out of this as from a seed." The question arises, would not it be more in keeping with the importance of mortal rights to have the bones buried in the cemetery lot, while the ashes find their repose in the silver urn, and be retained in the household? Even a superstition has weight in favor of an idea.—*[Detroit Free Press.]*

### Gas Fuel.

London engineers discuss the plan of turning the coal of the north countries into gas and conducting it by pipes to the chief centres of population. The scheme is advocated on the ground that it would greatly moderate the smoke nuisance and reduce the expenses of many industrial operations. Gas has been profitably employed in all sorts of factories, but its substitution for coal in the homes of the poor would not fail to rivet the chain of their bondage to monopoly, and they would probably prefer to evade the smoke by-laws by the use of coal-oil stoves. It has been repeatedly predicted that the invention of a home apparatus for the generation of electric-light currents would ruin nine out of ten gas companies.—*[New York Voice.]*

### The American Mother Abroad.

On their return to America, a lady who was calling on Mrs. X, began to ask about the different ports which the ship had visited, but she substituted for coal the home of the poor would not fail to rivet the chain of their bondage to monopoly, and they would probably prefer to evade the smoke by-laws by the use of coal-oil stoves. It has been repeatedly predicted that the invention of a home apparatus for the generation of electric-light currents would ruin nine out of ten gas companies.—*[New York Voice.]*

in voiceless homage when in a humble manger at Bethlehem, in the reign of Augustus, a child was born, seemingly conscious of the occurrence of the most momentous event in the spiritual history of the world. Yet Pagan Rome still flourished to foster and bequest to the generations the priceless dowry of such intellects as Virgil, Ovid, Horace, Lucretius and Catullus. And lo, as the trees looked on she fell and passed away. The Goths were thundering at her gates.

The great trees beheld the barbarism of Northern Europe melt away before the sun of advancing civilization. They saw the followers of Christ, emerging from their hiding-places in the swamps of the Pontine marshes and the Roman catacombs, spread like an irresistible tide the doctrine of the new life. As at the touch of a wand the darkness of centuries was lifted and the sublime creed spread until the enthusiasm of its adherents culminated in the fanaticism of the crusades. All this happened to the people of the earth, and still the great trees looked calmly on. They beheld the extension of civilization from east to west. They flourished and grew when Michael Angelo, Raphael, Titian, Durer and Holbein were born; they witnessed the Renaissance; while they stood, the silent sentinels of the Western world, Spenser, Shakespeare, Cervantes, Rabelais, Montaigne, and Camoens passed away and were enrolled among the immortals. Copernicus, who called in question the Ptolemaic theory, and Galileo, who discovered the fact of the earth's rotation, shared with them the same sunlight; Bacon, Descartes, Hobbes, Kepler, Spinoza, and Sir Isaac Newton came and went, and still in unshaken majesty they towered into the sky.

The fifteenth century dawned and found invading hosts pressing upon the shores of a new world. Calmly the big trees looked on and saw a new continent subjugated to the uses of civilized man. The forest rang with the blows of the woodman's ax. At last, with awestricken gaze, a white man first beheld them, and since the offspring and the history of the age.

To the American, separated by an ocean from the wonders of the Eastern Hemisphere, has been given in these grand trees the greatest of natural marvels, and the magnificence of the gift transcends the most elaborate and costly monument ever raised by the hand of man. Save the big trees.—*Astoria Granville, in Chicago Journal.*

Light Hearts and Plenty Money. I have completed my first week with my Plater, and have \$245 clear money. I am pleased with the business. I bought my Plater from the Lake Electric Co., Englewood, Ill., for \$8, and feel confident if people knew how cheap they could get a Plater, and how much money they could make, we would see many more happy homes. It is surprising the amount of tableware and jewelry there is to be had. If you have a Plater, let your friends know. They would soon have light hearts and plenty money.

Michigan has a Farmers' Telegraph Company. The Ladies Delighted. The pleasant effect and the perfect safety with which ladies may use the liquid fruit laxative, Syrup of Figs, under all conditions make it their favorite remedy. It is pleasing to the eye and to the taste, gentle, yet effective in acting on the kidneys, liver, and bowels.

German schoolhouses have 23 minarets. For a disordered liver use BEECHAM'S PILLS. About \$15,000,000 is invested in electric lighting enterprises in London.

There are people using Dobbins' Electric Soap to-day who commenced its use in 1863. Would this be the case were it not the purest and best soap ever made? Ask your grocer for it. Look out for imitations. Dobbins' is the name. More than 200,000 people are confirmed in the English Church every year. U 16

### Deafness Can't be Cured.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or ringing in the ears, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are cured by catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of deafness (caused by catarrh) that we cannot cure by taking Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75 cents.

Every year more farmers believe that moderate weights in pork pay best.

### The Mother's Delight.

A remedy that will cure croup in a few moments, prevent pneumonia and diphtheria like Dr. Hoxsie's Certain Cure. No opium. Sold by druggists or mailed for 50 cents. Address A. P. Hoxsie, Buffalo, N. Y.

In 1836 only 109 patents were issued in the United States.

### BEWARE OF THEM.

Cheap imitations should be avoided. They never cure and are often dangerous.

S. S. S. WILL CURE. My daughter had a case of chronic Eczema, which for over five years had baffled the skill of the best physicians. As she was daily growing worse, I quit all other treatment and commenced using S. S. S. Before finishing the second bottle the scaly incrustations had nearly disappeared. I continued using S. S. S. until she was entirely cured. I waited before reporting the case to see if the cure was permanent. Being satisfied that she is freed from the annoying disease for all time to come, I send you this.

V. VAUGHN, Sandy Bottom, Va.

BOOKS ON BLOOD AND SKIN DISEASES FREE. THE SWIFT SPECIFIC CO., Atlanta, Ga.

### THE POINT.

From a Catholic Archbishop down to the poorest of the poor all testify, not only to the virtues of ST. JACOBS OIL, but to its superiority over all other remedies. It cures promptly, permanently; which means strictly, that the pain-stricken seek a prompt relief with no return of the pain, and this, they say, St. Jacobs Oil will give. This is its excellence.

### JOHNSON'S ANODYNE LINIMENT.

ESTABLISHED 1810.

For Internal and External Use. Sore Throat, Croup, Asthma, Colds, Catarrh, Cholera, Stomachic, Rheumatism, Headache, Toothache, Hoarse, Stiff Joints and Sprains. Full particulars free. Price 25c per bottle. L. R. JOHNSON & CO., Boston, Mass.

### "August Flower"

I had been troubled five months with Dyspepsia. The doctors told me it was chronic. I had a fullness after eating and a heavy load in the pit of my stomach. I suffered frequently from a Water Brash of clear matter. Sometimes a deadly Sickness at the Stomach would overtake me. Then again I would have the terrible pains of Wind Colic. At such times I would try to belch and could not. I was working then for Thomas McHenry, Druggist, Cor. Irwin and Western Ave., Allegheny City, Pa., in whose employ I had been for seven years. Finally I used August Flower, and after using just one bottle for two weeks, was entirely relieved of all the trouble. I can now eat things I dared not touch before. I would like to refer you to Mr. McHenry, for whom I work, who knows all about my condition, and from whom I bought the medicine. I live with my wife and family at 39 James St., Allegheny City, Pa. Signed, JOHN D. COX.

G. G. GREEN Sole Manufacturer, Woodbury, New Jersey, U. S. A.
