FOR THE LADIES.

THE ZIGZAD PATTERN IN DRESS.

The siggang pattern in dress material is decidedly the thing. The pattern is nall sizes and shudes and is fashionable whether in woolen, silk, satin or velvet. The long waist continues to be liked but for costumes and jackets except in the case of young women who prefer round waists and plain skirts. Rich brocaded silks will be worn with gold embroidery. It is not yet fully decided what will be the fashion for party and evening costumes.—New York Commencial Advertiser.

The latest apostle of the beautiful in dress has arisen to promulgate a new code of ethics by which a woman's gowns shall be a chronicle or dress directory of her emotions and conditions. The holy and dignified estate of matrimony shall find expression in a black garment, while love, its precursor, too often only its precursor, is robed in a garment upon which love, and gunder the content of the sun and the silver sheen of the monopolof death. Faney scolding a woman (gott up in such occult, murkily, mystic things) about the coal bill, or asking her where in thunders wherein the golden light of the sun and the silver sheen of the monopolof clean stockings.—New York Times.

TALL GIRLS.

It is the fashion for girls to be tall. This is much more than saying that tail girls are the fashion. It means not only that the tall girl has come in, but that girls are tall, and are becoming tall, because it is the fashion, and because there is a demand for that sort of girl. There is no hint of stoutness, indeed the willowy pattern is preferred, but neither is leanness suggested; the women of the period have got hold of the poet's idea, "tall and most divinely fair," and are living up to it. Perhaps this change in fashion is more noticeable in England and on the Continent than in America, but that may be because there is less room for change in America, our girls being always of an aspiring turn. Very marked the phenomenon is in Europe this year; on the street, at any concert or reception, the number of tall girls is so large as to ocasion remark, especially among theyoung girls just coming into the conspicuousness of womanhood. The tendency of the new generation is towards sunusual height and gracious slimness. The situatior, would be embarrassing to thousands of men who have been to busy to think about growing upward, were it not for the fact that the tall girl, who must be looked up to, is almost invariably benignant, and bears her height with a sweet timidity that disarms fear. Besides, the tall girl has now come on in such force that confidence is infased into the growing army, and there is a sense of support in this survival of the tallest that is very encouraging to the young-(Harper's Magazine.

A WOMAN DOCTON'S BROUGHAM.

A WOMAN DOCTOR'S BROUGHAM

A busy woman doctor in Brooklyn, whose practice is so extensive that it keeps her driving over the city's ill-paved streets for many hours every day, has had made for her a brougham which com-

had made for her a brougham which combines about as many comforts as is possible to pack into so confined a space.

To begin with, under the seat is a capacious drawer, divided into compartments, to hold those surgical instruments which a doctor must carry. In the same drawer is found room for two or three small handbags containing an assortment of medicines. There is also space for a small portable electric battery in its polished wood case. These are all hidden away, however, when the drawer is shut, and so do not mar 'y their painful suggestiveness the snugly comfortable appearance of the rest of the interior.

mind concerning some things, and
this is what he says:

"I have used your preparation
called August Flower in my family
for seven or eight years. It is constantly in my house, and we consider
it the best remedy for Indigestion,

known. My wife is
troubled with Dyspepsia, and at
times suffers very much after eating.
The August Flower, however, relieves the difficulty. My wife frequently says to me when I am going
to town, 'We are out
Constipation of August Flower,
and I think you had
better get another bottle.' I am also
troubled with Indigestion, and whenever I am, I take one or two teaspoonfuls before eating, for a day or
two, and all trouble is removed.'
