

DEMOCRATIC TICKET.

NATIONAL President, Grover Cleveland.....New York Vice President, Adlai E. Stevenson.....Illinois

STATE Judge of Supreme Court, Christopher Heydrick.....Venango County Congressmen-at-Large, George Allen.....Erie County Thomas P. Merritt.....Berks County

COUNTY Congressman, William H. Hines.....Wilkes-Barre Senator, J. Ridgway Wright.....Wilkes-Barre Sheriff, William Walters.....Sugarloaf Township Recorder, Michael C. Russell.....Edwardsville Coroner, H. W. Trimmer.....Lake Township Surveyor, James Crockett.....Ross Township

We denounce protection as a fraud, a robbery of the great majority of the American people for the benefit of the few.—DEMOCRATIC PLATFORM.

Twenty-two years can hardly be considered too severe a punishment for a murderer who premeditates the act, and as it is not likely any one with sufficient influence will try for a pardon for Bergman, it may be said he has received a life sentence for his attempt to kill Frick, the manager of the Carnegie works. There would, however, be far more justice in this sentence if the man who is responsible for the lockout, and the subsequent killing of workmen and detectives, would also be brought to the bar and given twenty-two years for the lives he sacrificed to attain his selfish aims. The legal law does not regard him as guilty of any crime, but there is a higher bar before which Frick will have to stand and answer.

The Republicans of this county are to be pitted. The nominations made at the convention demoralized the party from Pittston to Hazleton, and now, to make matters worse, the candidates have commenced to send in their resignations. Stullif, the man who wanted to run for sheriff and after getting knocked out was put up for recorder, has wisely come to the conclusion that he is on dangerous ground while he stands in Russell's path to that office. The delegates will hold another convention on Tuesday, and anybody who is real anxious for a political thrashing should be given the nomination. Russell will sweep the lower end.

KEEP YOUR EYE ON THE combine sheets for the next few days. The Philadelphia Star had a column editorial on Saturday under the head of "Railway Wars Again," and a marked copy has been sent to every editor in the eastern part of the state. Those who are in favor of the deal or afraid of McLeod will publish parts of it, and those who are not afraid of the man who said he cares no more about the law than he does a Sioux Indian, they will dump it in the waste-basket. There are several papers that for reasons best known to their editors have taken no direct stand on the deal, but they show their friendship to the Reading by republishing all of the above sort of matter sent to them.

BEFORE the Republican convention was held the TRIBUNE said it hoped the party would nominate candidates who could put some life in the campaign. It was understood, of course, they would have no show on election day, but that should not cause them to be falling over one another in their efforts to get off the ticket. The idea of leaving a presidential year like this pass by without making some sort of a fight for power is ridiculous. No doubt the past few years have taught the Republicans the folly of trying to carry Luzerne, and they refuse to let the Democrats have any more fun with their little aspirations. From all appearances it will be a go-as-you-please campaign on their side, ending in the usual way.

A Chance for the Senate. The Republican senators whose terms expire in 1893 are from California, Connecticut, Idaho, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, Vermont, Washington, Wisconsin and Wyoming, nineteen in all.

The terms of Democratic senators from Delaware, Florida, Indiana, Maryland, Mississippi, Missouri, New Jersey, Tennessee, Texas, Virginia and West Virginia, eleven sure Democratic states, end next March. By a change of four Republican senators the Republicans will lose control of the senate. The election of six Democratic senators in the place of a majority over all. With Republicans retiring in Connecticut, California, Michigan, Minnesota, Montana, Nebraska, New York and Wisconsin, the case is not hopeless. A Democratic president, a Democratic senate and a Democratic house would mean reduced and honest taxation.

Signaling by Balloon. A series of interesting experiments was conducted the other night at Stanford Bridge Grounds, London, with balloons and apparatus invented and improved by Mr. Eric Bruce for use in military signaling at night over intervening woods and hills. Within the balloon are hung on a small swinging ladder six incandescent lamps, connected by insulated cable with a battery on the ground, worked that night at twenty-four volts and giving sixty candle power of illumination. By ready manipulation of the buttons at the instrument the operator flashes on the translucent sides of the balloon the signals of the Morse or any code, and these can be easily read at a distance of six miles.

The balloon used was a small one of eighteen feet diameter, containing 1,000 feet of gas, and was held by cable at a height of about 800 feet. The strong wind prevailing rendered the position of the balloon unsteady and uncertain, but the signals were nevertheless read by military experts, and were answered from a station on land. The experiments were witnessed by Prince Edward of Saxe-Weimar, by military attaches of the Chinese and other embassies and a number of scientific men. The experiments were varied by hanging the lamps outside below the neck of the balloon and flashing direct. The illuminated balloon when a few feet above ground gives a beautiful light, and can be utilized when required for executing work at night.—London News.

Lionized the Wrong Englishman. The Hotel Del Monte at Monterey, Cal., is stirred up over a ludicrous mistake by which a prosaic English merchant was lionized as Robert Buchanan, poet and dramatist.

The Briton arrived at the hotel three days ago with two friends. He registered in a fine, literary hand, and as he bore a strong resemblance to the author several ladies present declared he must be the author of "The Shadow of the Sword." So several ladies desired him to write his autograph in their albums with some poetical sentiment. He received all their flattery complacently, but grinding out poetry for them kept him up all night and the result was something to shake confidence in their idol.

The next day he was the center of an admiring group. His companions became suspicious and asked the hotel clerk why so much attention was paid their friend. They were amazed when they learned the true reason, because they declared their friend had never heard of Buchanan. They broke the news gently to him, but his conceit received a great shock. All three packed and left before disclosures came.—Cor. Chicago Herald.

The Wilde Boys' First Appearance. It is not generally known that the brothers Oscar and Willie Wilde first came to public notice on the occasion of the centenary of Thomas Moore at Dublin about fifteen years ago. It was proposed to perform an ode specially written for the occasion by Mr. S. N. Elrington and composed by the well known Irish composer, John William Glover. The Wilde brothers, assisted by Mr. Sexton, the member for West Belfast, and then on the staff of The Nation, led a furious and successful opposition against the official adoption of the Nolan-Glover ode.

It may be only a coincidence that the music to "The Poet and Puppets" at the Comedy theater is written by a grandson of the rejected composer.—Irish Times.

In Chains in India. The practice of binding religious persons still exists in India, as is evidenced by the following from the Allahabad (India) Pioneer. The incident occurred recently at Meerut: A fakir, wearing nearly five maunds (400 pounds) of iron chains and bands on him, recently left the cantonment station. The railway authorities declined to allow him to travel as a passenger, but sent him as goods by weight, in spite of his argument that native women were never charged for their anklets and bangles. The iron absorbed the heat so much that the man had to be incessantly sprinkled with water. He is an old man and nearly died at the station.

Luck in Photographing Lightning. One of the most remarkable and successful photographs of lightning ever known was made by Mr. Rusak, at Haines Falls, in the Catskills, during the electrical display of the other night. The lateral zigzag streaks of fire against the massive slope of Mount Lincoln were instantaneously caught in the exposure and are plainly and sharply shown in the print, which also shows bursting bolts of lightning in the upper atmosphere, where the vivid illumination casts wonderful shadows upon the surrounding mountains. The print is an interesting study of atmospheric electricity.—Albany Journal.

A Word About His Mother. A neat report is recorded of the Marquis of Carmarthen, the Duke of Leeds' eldest son, who, at the recent elections in England, was returned for Brixton by a large majority. The night before the election, while he was addressing a mass meeting, he was interrupted by a cry of, "Does your mother know you're out?"—a reference to his very youthful appearance. "Oh, yes, she knows I'm out," said the young candidate, "and she hopes tomorrow she'll know I'm in."—London Letter.

The Failure of the Peach Crop. The newspapers come filled with reports of the failure of the eastern fruit crops. The Maryland and Delaware peach crop, which is the heaviest competitor we have for our California product, is reckoned at less than one-sixth of an average yield. The heavy rains have caused a dropping of fruit in the peach country. The loss is over \$2,000,000 to the eastern peach growers.—Pomona (Cal.) Progress.

A Comfortable Warm Weather Dress. "Never heard of a Chinese collapsing from the heat, did you?" asked a West side doctor as he fanned himself vigorously and occasionally tugged away at his shirt collar. "They may be heathen, but they have more common sense in apparel than all of us good Christians combined. I just passed one of the emerald gentry standing at the corner of Madison and Clark at high noon, the sun pouring upon the top of his head and the thermometer registering 91 in the shade. He was cool as a cucumber. "He wore no hand about his shirt and no collar to shirt or blouse. Vest he had none. You and I have from twenty to twenty-five thicknesses of cloth close about our jugulars and then we say we are Christians. Christians know suicide to be sinful, don't they? Then how dare they choke themselves in blistering weather? And the Chinaman isn't idiot enough to clinch his undergarments at his back with perspiration producing suspenders, nor wear his shirt inside his trousers. He affects cool sandals and light hats, and in all shows a superb regard for his safety. Next to following the example of our first parents in their first estate, the Chinese plan in summer is the most comfortable style of dress upon the face of the earth."—Chicago Mail.

A Tricycle for Land or Water. The people along Ogden boulevard, near Douglas park, at 9:30 o'clock one morning stopped and looked with wonder at a slender man who was riding a queer machine toward the park. The amazement of those who followed was not diminished when they saw the man ride into the park, down the drive to the water and out on the lake. The man was T. J. Olsen, a boot and shoemaker.

The machine somewhat resembled a tricycle, but on the spokes of the drive wheels there were paddles and the little wheel was covered with sheet iron and served as a rudder. Underneath the main axle and about four inches from the ground two boats six feet in length and eighteen inches beam, about two feet apart, like the hulls of a catamaran, adapted the queer craft to the water. The speed attained was equal to that of a rowboat, and Mr. Olsen claimed it was more easily propelled.—Chicago News-Record.

Too Profitable a Fire. The following is a copy of a letter from a town in New Hampshire received at the office of the Hartford Fire Insurance company one day last week: "I inclose \$100 in this letter, which I want paid to the Hartford Fire Insurance company of Hartford. I thought I got more insurance than my right." Inclosed was a \$100 bill of the First National bank of Concord, N. H. The writing is identified as similar to two previous communications received by the company, inclosing, respectively, \$50 and \$100, making a total of \$250 already received from this one source.

It is evident that some beneficiary received more than his due, and is endeavoring to quiet his conscience by returning in installments the amount overpaid. Several thousand dollars have been received by the Hartford under similar circumstances.—Hartford Courant.

A Petrified Corpse. At Hazelwood cemetery, near Montezuma, Ia., one day last week, Charles Block, wishing to remove the remains of his wife, who died eight years ago, opened her grave. He found it full of water and was astonished at the weight of the coffin. The combined strength of five men finally brought the coffin out of the grave, and when opened it was found that the action of the water had turned the body to solid stone, preserving its natural appearance to a remarkable degree. Even a bouquet of flowers held by the dead woman was perfectly petrified. The skin was fair and the hair as black and glossy as in life.—Chicago Inter Ocean.

Glitter in a Cottage. The biggest diamonds in Saratoga do not belong to any of the women who are stopping at the big hotels. They are the property of the stout woman who has a cottage on one of the streets leading up from Congress Hall. And she wears her gems day and night. She has them on when the sun is shining brightly and later when the sun has gone down and the stars have come out. Wherever she goes there goeth also the flash and the sparkle of the big gems.—Saratoga Letter.

Saved by a Dog's Bark. The noise made by a dog saved several persons from being burned to death in a fire which broke out in Brooklyn on a recent morning. A woman was awakened by the yelping of a dog and found the whole place in flames. She roused her husband and children, and inside of five minutes after they were out of the house the building was a mass of flames.

The Largest American Flag. The largest American flag ever made will float from the top of a very lofty "liberty pole" in front of the Administration building at the World's fair. Upon request the state of Washington will furnish this big flagstaff, as well as two or three others of the largest that are required by the exposition.

The Social Swim in Atchison. The young men who attended the lawn party last night took extra collars along. One used six. The thermometer registered nearly 90 at midnight.—Atchison Globe.

A Texas Event. Mr. Cargill, living on Green's creek, and Miss Saffie Jay, of Round Hole Branch, were nuptiated last Sunday. Let the good work go on.—Dublin (Tex.) Progress.

Charles Goodidge, of Tacoma, Wash., could not get a marriage license a few days ago because he forgot the name of his bride. He knew her first name was *Kittie*, but could not remember her last name.

What is the Electropoise? and What Will it Do? The Electropoise has been in use for four years, and is well known in some sections of the United States, but there are many sufferers that have never heard the name. Those that have heard of it and seen something of its wonderful cures, are curious to know how an instrument so small and so simple can accomplish cures so great. Now, while the Electropoise is very wonderful, it is not at all mysterious. Its operation falls in with what we know of science and any one at all familiar with the simplest facts of Biology and Physics can understand.

HOW IT OPERATES.—The way in which the Electropoise accomplishes its cures is very simple and natural. It consists of a polarizer, which is connected by a woven wire cord with a small plate and garter. This polarizer is immersed in cold water, or put on ice. The plate at the other end of the cord is attached to the body of the patient, generally at the ankle. From the inherent nature of this polarizer it becomes positively charged. By the well-known laws of induction, the plate, and with it the body of the patient, becomes positively charged. The body thereby becomes a centre of attraction for negative bodies. Oxygen is the most negative form of matter in nature. Hence the body, bathed in the atmosphere, is to the living-giving oxygen, at every pore. Every process of life is thereby quickened. The temperature rises; the pulse throbs; the heart beats more vigorously; new life every organ acts with renewed vigor, and the effete poisonous products of the body are thrown off.

That quickened change of matter which oxygen produces throughout the system, is the largest factor in the life-giving energy of Nerve Force. Organs half dead and stagnant are born again, and begin to perform their wonted functions. The heart, the lungs, the liver, the organs of the external senses, the organs of reproduction—all these throw off their derangement and weakness, and the disordered intellect is oftentimes reenthroned. Where disease has not already made too great a hold on the system, it has so much of a generative force that the patient is generally able to resist the twenty-four hours. It will last a life-time, never wears out nor loses its strength, and is used by the greatest of the best physicians in this and other countries, and is daily used by them in their practice. It is pronounced by them to be the greatest discovery in the history of medicine, in that it does away with the use of medicines.

DIRECTIONS FOR USING.—Accompanying each instrument is a book of instructions fully explaining its uses. Its method of cure is so simple and free from danger, that the initiated and even children can use it with perfect ease and success.

Editorial in *Eastern Christian Witness and Advocate of Bible Holiness*, September 3, 1891: "A method of treatment of disease without the use of any medicines or drugs, which has been quietly extending itself over all parts of the United States during the past three years with very gratifying results. We are slow to commend new discoveries of any kind, for the reason that so many of them prove to be worthless. But we can commend the Electropoise as a safe and effective health restorer. We do not pretend to explain the philosophy of its workings, but, having realized its beneficial effects, we can speak of its results. About one year ago we recommended it to Dr. L. D. Ware, of Philadelphia, for his son, who was a great sufferer from Sciatica. He had sought relief in various ways and found none. He was almost blind, and rapidly declining. The use of the Electropoise restored him to perfect health, and now, after nearly a year, he is enjoying as much health and vigor as ever. We have seen testimonials of many remarkable cures. This notice of the Electropoise, its uses, and calculation, and the gratuitous. We do it for the good of the afflicted. We have no personal interest in it, and are not paid for what we write in its favor."

The following editorial in *Central Methodist*, Catlettsburg, Ky., was written by Zephaniah McGee, D. D., editor: "I think about ten thousand men, mainly professional men, lawyers, doctors, editors, preachers, and all other classes, including the writer, are very much mistaken in the Electropoise. It effects cures and gives relief where all other known remedies have failed. Especially is it efficacious in the case of delicate women and feeble children. I have used one for the past two years, and find it invaluable as a curative agent."

Names of prominent people in all sections of the U. S., generally can be furnished on application. Our cures cover all parts of the United States and Europe. Over 50,000 people have been freed with the most gratifying results. In the large majority of cases the cures have been speedy, but our claims are modest, and in long-standing chronic cases you cannot expect speedy cures. We positively refuse to sell the Electropoise in hopeless cases.

For particulars of testimonials, and for any information, send stamp or call at

Electropoise Treatment Company, 1341 Arch Street, PHILADELPHIA, PA.

What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria. "Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children." Dr. G. C. Osceola, Lowell, Mass.

Castoria. "Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

Castoria. "Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it." UNITED HOSPITAL AND DISPENSARY, Boston, Mass.

Dr. J. F. KINCHLOP, Conway, Ark. ALLEN C. SMITH, Pres., Boston, Mass.

The Centaur Company, 77 Murray Street, New York City.

GRAND CLEARING SALE. Four Days Only. To Make Room for Fall Goods. We will close our entire stock of Oxford ties out at cost. GEO. CHESTNUT, 93 CENTRE ST., FREELAND.

WHAT TO WEAR! WHERE TO GET IT! Two important questions that trouble young men, old men, big boys and little boys. We will answer your queries most satisfactorily. We have ready-made clothing to suit men and boys—all styles and all sizes, and everything is just from the manufacturer—as new as new can be. Our stock of gents' furnishing goods—including collars, cuffs and a handsome line of neckwear—is certainly worth examining. Then we have BLOOTS, SHOES, HATS, CAPS, ETC., in such great varieties that no man need leave our establishment without a perfect fit. We can rig a man out from the crown of his head to the soles of his feet in such fine style that his friends will be astonished, and the man will also be astonished at the low cost of anything and everything he will buy of
