### A Week of Weddings.

At 9 o'clock this morning a nuptial mass was read at St. Ann's Catholic church by Rev. M. J. Fallihee, during which John B. Keenan, of Upper Lehigh, and Miss Susie Gallagher, of Freeland, were united in marriage. The ceremony was attended by a very large number of friends of both parties and also by the Daughters of Mary Sodality. The groomsmen were Andrew J. Keenan, a brother of the groom, and Dr. Jos. F. Gallagher, a brother of the bride. Miss Sallie Gallagher, of Philadelphia, and Miss Katie Gillespie, of Centralia, were the bridesmaids.

Immediately after the ceremony the bride was presented with a beautiful bridal basket, a gift from the sodality, of which she was secretary.

They leave at 1.32 p. m. for a tour which will include Philadelphia, Atlantic City and other prominent places.

Mr. Keenan and wife are well known young people in this section, having resided here the greater portions of their lives, and they begin today with every prospect of having many happy and prosperous years before them. The TRIBUNE joins in wishing them a pleasant journey through life.

At St. Ann's church yesterday Frank Higgins and Miss Hannah Thomas, both of Drifton, were married by Rev. M. J. Fallihee. Miss Margaret Sweeney, a cousin of the bride, was bridesmaid, and John Gallagher, of Sandy Valley, acted as groomsmen. A reception was held last evening at the residence of John Kennedy, of Drifton, a brother-in-law of the bride, and was attended by the friends of the couple, who have made their start in life with the best wishes of all their acquaintances.

Herron, M. H. Hunsicker, who viewed the body and adjourned until 8.30 this morning, to hear the testimony and also the report of the postmortem examination which was made by Dr. A. S. McKnight.

The inquest was in progress at the time the TRIBUNE went to press.

**Death of Judge Dreher.**  
Samuel S. Dreher, president judge of the Monroe and Carbon district, died on Monday of heart disease, superinduced by stomach trouble, aged 69 years. The judge on Sunday attended the Methodist church, and after the sermon made a financial statement in behalf of the financial board of the church. Shortly before 6 o'clock he awoke, and after telling his wife that he had passed a fairly good night expired in bed without warning. Mr. Dreher is survived by his wife and five children: Mrs. Joseph Mallaek, of Philadelphia; Mrs. A. A. Dinmore, of Philadelphia; Mrs. J. P. Mutchler and Oscar Dreher, of Stroudsburg, and Howard Dreher, of Fontana, Kan.

Judge Dreher was born in Stroudsburg, April 10, 1824, and was the eldest of nine children of Hon. Michael H. Dreher. His ancestry on both sides came from Germany. Judge Dreher was a typical self-made man. At the age of 19 he entered the law office of Hon. M. M. Dimmick and for a time clerked in the offices of register, recorder and prothonotary. He was district attorney of Monroe county for two years.

In 1870 he was elected president judge of the old twenty-second judicial district, composed of the counties of Wayne, Pike, Carbon and Monroe. Prior to his election he had an extensive practice in Monroe, Carbon and Pike. He was re-elected in 1880 and 1890 without contest.

### Two Rioters Captured.

County Detective Whalen, Coal and Iron Policeman Cook, Chief Polgreen and Constable Boyle, of Hazleton, on Monday at Wilkes-Barre captured Neil and Angelo Matz, two Italians accused of leading the recent riot at Harleigh, in which two Hungarians were killed and many wounded. Ever since the affair the police have been on the lookout for the Matz brothers, but the men disappeared soon after the racket at Harleigh.

Nicholas Cussick, of whom mention was made on Monday as being under arrest, was engaged in the fight, but had so disguised himself that the Hungarians were unable to recognize him. He was taken before Alderman Gorman, but could not be held.

He was followed after the hearing to the resort in which Mrs. Matz, the mother of the murderers, lived. Soon after she took a train to Wilkes-Barre, shadowed by Cook and Polgreen. She was met by an Italian and escorted to the lower part of the city. The detectives informed County Detective Whalen and he with several policemen raided the place and captured the Matz boys and their mother. They were taken before an alderman and committed to jail, in default of \$1,500 bail each.

The Matz boys are charged directly and indirectly with ten or twelve murders. Their last exploit, and the one for which they were arrested, was the leading of an attack upon twenty-five Hungarians by as many Italians armed with pistols and stiletos. In the fight two Hungarians, Treble Mathias and Joseph Christeanc were hurt so badly that they died, and several others were wounded.

**Poor Directors Meet.**  
The directors of the middle coal field poor district held their regular meeting at Laurytown on Tuesday. The board notified the state board of charities that they were now prepared to take care of insane, who are now at Danville asylum, just as soon as they wished to send them back.

Miss Moulder, the nurse, was granted a two weeks vacation in July. Mrs. McBride, of Philadelphia, will take her place during her vacation.

Mrs. E. B. Coxie, of Drifton, sent a quantity of fireworks for the inmates to celebrate the Fourth of July.

**In Trouble at Hazleton.**  
Thomas Mulherin, of Summit Hill, now employed at Jeddo, was arrested here Tuesday afternoon by Officer Ferry for being drunk and flourishing in a revolver. A short time after being placed in a cell, Daniel Helentahl, who worked with Mulherin, appeared and informed the officers that Mulherin on Monday evening got away with \$14 belonging to him.

Helentahl swore out a warrant charging Mulherin with the theft.

At the hearing yesterday he was fined \$4.50 for carrying concealed weapons and sent to jail in default of \$300 bail for the theft.

**A Colliery to Shut Down.**  
On Saturday next G. B. Markle & Co.'s No. 5 Pinkash colliery will be shut down for an indefinite period. No reasons are given for this action of the company, but it is generally believed that it is not safe owing the large body of water in the old slope which would cause a frightful disaster if tapped unexpectedly.

The narrow work will be kept going, however, and the miners and laborers who are thrown idle will be given work loading up the three large stock-banks which were accumulated while the slope was being sunk.

**Caught Between Loaded Cars.**  
Hugh McBride, aged 17 years, of Honey Brook, while engaged at his work as a driver in one of the mines there, was caught between loaded cars on Monday and crushed in a terrible manner. He died before he reached the top of the slope. The young man was well thought of in that section and was a member of St. Patrick's Temperance Society of Audenried. He was buried yesterday.

### IRL HICKS' FORECASTS.

WHAT JULY WEATHER IS LIKELY TO HAVE IN STORE FOR US.

All kinds of weather can be had during the next four weeks, according to the predictions of the St. Louis Prophet—Warm Waves, Storms, Etc.

**From Word and Works.**  
Pleasant summer days, for the most part, will prevail at the opening of July. The full moon and the centre of a Mercury equinox falling together on June 29 may prolong cloudiness, with storms in extreme east into July, but westerly and central regions will have change to fair and cooler, with rising barometer. By the 4th, a warm wave will be well defined on the western side of the country—the barometer will be falling in the same region, and storms will start toward the east.

From the 4th to 7th, all the phenomena of a regular storm period may be expected at all points, as they march in regular order from west to east. Fair weather to the east, growing warmer with winds from east to south, during the early part of storm periods are as much parts of the phenomena of a period as the actual storms of rain, wind and thunder. The change to cooler westerly winds, with barometer rising, in regions west of storm areas, are also physical necessities, falling in and bringing up the rear the moment the storm area passes east of any given point.

The 10th and 11th are reactionary days, at which time it will grow very warm, and if active storms do not appear the warmth will increase past the new moon on the 13th, and culminate in heavy storms on and about the 16th, which is the central day of the next storm period. If the new moon on the 13th leans in its perturbing effects toward the storm period of 15th to 18th, storms will appear early in the period, checking the growing heat and bringing temporarily more pleasant weather.

That certain moon-phases exert disturbing influences of a meteorological character, is a fact beyond successful contradiction, and that these disturbing influences are retarded or hastened, so as to blend with the nearest storm period, is also a fact.

If new moon on the 13th lends her influence to reactionary disturbances central on the 10th and 11th, a crisis of heat and storm will be reached about those days, if she reaches forward to storm period of 15th to 18th, heat and storms will come to a crisis early in that period. We expect the latter.

About the 22d, 23d, growing warmth, with all the changes that precede and attend a return to storminess, will appear. These disturbances, also, will in all probability reach their crisis very promptly, under electric pressure of the moon's first quarter, on the 20th. Bluster, with threatening clouds and local rains, may be expected at this and at all July periods, but we think there will be a general lack of rain. The last period for July runs from 26th to 30th, the crisis falling coincident with the full moon on the 28th. At this time we will have entered into the Venus period, which is central August 9, and if we are to have general rains from the Venus disturbance in August, they are apt to begin in earnest at this last July period.

We look for much violent disturbance at this time, and hope for seasonable rains, but shall not be surprised if there are more severe bluster, electrical displays and rapid transitions from heat to cool, than rain. At all events, we may reasonably expect a respite from summer heat at the close of the last July storms.
