SUBSCRIPTION RATES.

Two Months. 25
Subscribers are requested to observe the date following the name on the labels of their papers. By referring to this they can tell at a glance how they stand on the books in this office. For instance:

Grover Cleveland 28 June94
means that Grover is paid up to June 28, 1891. Keep the figures in advance of the present date. Report promptly to this office when your paper is not received. All arrearages must be paid when paper is discontinued, or collection will be made in the manner provided by law. A blue "X" on the paper is a reminder that your subscription is due.

FREELAND, NOVEMBER 23, 1893

A people's soup ki'chen has been opened in the dreariest section of South Canal street. Soup, bread and meat are served for 1 cent, and everything is neat and clean. Three hun tuning is neat and clean. Three hundred Jewish ladies have undertaken this charitable work, ten of their number superintending the work as waitresses each day.—Chicago Standard.

Peter E. Smith, of Philadelphia, one of the sergeants at arms of the house of representatives during the last session of the legislature, will be a candidate for common council in the twenty-mith ward of that city. Smith received \$7 a day during the entire session and never protected. entire session and never performed an hour's work, says the Harrisburg Patriot.

The souvenir Columbian coin seems to have been as great a failure as the special postage stamps. There are still half a million souvenir half-dollars on storage in Chicago, and the managers of the fair are in a quandry to know what they shall do with them. There never was any reason why the public should want either the coins or the stamps.

The Philadelphia Record calls upon its readers "to furnish it with all the authentic information they may posses in regard to the movements of a certain political conspiracy known as the American Protective Association." It denounces the order as bigoted and sectarian, and says its oaths are such as the spirit of American liberty utterly abhors and condemns.

Up in Monroe county, in the town ship of Eldred, at the recent election, out of a total vote of 154 only two were cast for the Republican state ticket. For many years, says the Philadelphia Times, the Republican voters of the township have consisted of only four all told, but this fall only two turned up. In Middle Smithfield township, in the same county, out of a total of 236 votes only eleven were cast for Samuel Jackson, Republican, for state treasurer. ship of Eldred, at the recent election

We can write by electricity, can send pictures and designs by the same agency, and talk to our friends at a distance by means of the electric wire. When the British Association visited Newcastle, Eng., says the Chronicle of that city, Professor Berry told his auditors that seeing by electricity was a possibility of the future, and he had shortly before drawn a picture of scientific achievements a picture of scientific achievements which would enable friends divided by large continents and ceeans, not only to talk with each other, but to look upon their features.

The great strike of the English coal miners has finally ended in a victory for the employes. Throughout the trouble the men acted in as order-ly manner as could be expected from more than one hundred thousand people. They had the sympathy of their fellow-workers everywhere, and did nothing to cause public opinion to be against them. Their willingness to submit their case to arbitration showed they thought their struggle against a reduction of wages a just

of the 14 huge masses of meteoric from which fell on a spot less than 64 square miles in area near Fort Duncan, Mexico, the largest is bechived shaped to the greatest labor strike of the year.

The report that the ways and means committee of the house will submit a proposition to raise revenue by a tax upon incomes is the basis of much discussion now throughout the country. With several newepapers we notice they parade an income tax as the ideal mode of raising revenue—easy, sure and not harmful to those who would pay it. As a revenue—tasy the might be an improvement on the tariff system, but it would undoubtedly place a premium on perjury. It would not be felt by those who have incomes, because they could shift the tax to those men or things from which the revenue is derived. It is a step nearer direct taxtion, but would not alter the social conditions of the present. The discussion, however, will bring out clearer the advantage of a tax upon the values of land.

CONVENIENT COTTAGE.

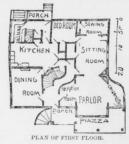

How to Build an Attractive Farm-

Points to Be Considered by Those In-tending to Put Up a Home—Arrange-ments Calculated to Lighten the Housewife's Labor.

To build an attractive home on a new farm site requires considerable careful thought, writes D. Comings, in the American Agriculturist. To so place the house that it shall be conveniently situated relative to the highway, and to have it a central retreat from the farm labors, is one problem; another is to have the house well grouped with the outbuildings, and possessed of a character pleasing to the eye and in harmony with the gen

PERSPECTIVE VIEW OF FRONT OF COTTAGE eral landscape. A very plain exterior, when well screened by old trees or relieved by varied natural surroundings, will pass criticism and be more homelike in aspect than when in the midst of a treeless prairie, the monotony of which is only broken by its one diverting object, that will always receive closer scrutiny than when the house is set in pleasing surroundings. The design shown in the illustrations is for a farm or suburban cottage, which shall have a tasteful outline from any point of observation, and at the same time be compact and comparatively simple in form. It will stand gracefully alone, or become more coxy with the yearly growth of trees and shrubbery. The PERSPECTIVE VIEW OF FRONT OF COTTAGE

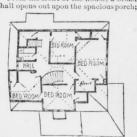

main building is thirty-three by thirty-six feet, covered with a hipped roof, with various minor projections, as in-dicated in the engravings, and of the size shown by comparing with the scale given.

dicated in the engravings, and of the size shown by comparing with the scale given.

The interior is divided into well-arranged rooms, of a spacious, symmetrical appearance. By taking a position between the two front windows of the parlor, the suite of rooms in view may become as attractive as one desires, with proper judgment in decorating and furnishing. On either side of this room an open partition, with grille and portieres, separate, it from the conservatory filled with plants on the right, another reception room, affording a good place for the piano, on the left. In the corner is a mantel fireplace, and a similar one in the sitting-room beyond the folding doors, with a corner closet or cupboard opposite, forms a bay of the three large windows. At the left side is a large closet, while at the rear is a small sewingroom, such as the sitting-room and the rear bedroom opening out of it, will make a convenient family suite of rooms on the firm the front of the house, a broad

this floor.

From the front of the house, a broad

is indicated by the dotted lines, and is is indicated by the dotted lines, and is high enough for a ventilating loft above the chambers. The outside cellar entrance is near the rear porch at the corner of the house. If the conservatory is not desired, it may be easily left out of the plan, and an angular wall and staircase in the hall will be less expensive than the curved style; the reception-room being thus closed off from the parlor, leaving space farther back in the hall for a direct parlor entrance. [Our illustration Fig. 1 presents a perspective view of the front of the cottage. The plan of the first floor is seen in Fig. 2 and that of the second floor in Fig. 3.]

LENGTHENING LIFE.

What the Liberal Use of Water Will Do for Mankind.

What the Liberal Use of Water Will Do for Mankind.

Dr. R. H. Dalton says that, although to suggest that methodical use of cold water as a beverage in the absence of thirst as a means of augmenting the chance of longevity may render a man liable to be dubbed a crank, if not a lunatic, the idea has a soundly physiological origin and is well supported by experience. Solid and dry as the human body appears, water constitutes more than one-fourth of its bulk, and all the functions of life are really carried on in a water bath, and, although the sense of thirst may be trusted to call for a draught of water when required, the fluid can be imbibed most advantageously for many reasons besides merely satisfying thirst. In the latter stage of digestion, when comminution of the mass is incomplete, it is much facilitated by a moderate draught of water, which disintegrates and dissolves the contents of the stomach, fitting it for emulzence and preand dissolves the contents of the stomach, fitting it for emulgence and preparing it for assimilation. Hence the habit of drinking water in moderate paring it for assimilation. Hence the habit of drinking water in moderate quantities between meals contributes to health, and indicates the fact that those who visit health resorts for the purpose of imbifing the waters of mineral springs might profit by staying at home and drinking more water and less whisky. Water is the universal solvent of nature and the chief agent in all transformations of matter. When taken into an empty stomach it soon begins to pass out through the tissues by an osmotic process into the circulation to liquefy effete solids whose excretion from the system is thus facilitated. Very few people think of the necessity of washing the inside as well as the outside of the body, and he who would be perfectly healthy should be as careful about the cleanliness of his stomach as that of his skin.

PRETTY EXPERIMENT.

### PRETTY EXPERIMENT.

How to Make Use of Bottles Whose Necks Have Been Broken.

Here is an experiment by which you may make some use of a bottle whose neck is broken. Pour oil into the botthe until it reaches the point at which you wish it to be cut clean through. Then place it upon a table and plunge suddenly into the oil a redhot poker. You will hear a span and the control of the place it upon the control of the c ou will hear a snap, and then per-eive that your bottle is cut regularly

gh, level with the liquid which

will thus transform a broken You will thus transform a broken bottle into a presentable vessel. A notched glass may thus be transformed into a new one. By removing each time a part of the oil and by cutting the bottle every time in the manner shown, you will get a series of glass rings curious to behold.

glass riugs curious to behold.

A Homemade Barometer.
A barometer which is said to be reliable may be made by filling a common wide-mouthed pickle bottle to within three inches of the top with water. An ordinary olive oil bottle is then inverted and placed within the mouth of the pickle bottle as far as it will go. In fine weather the water will rise into the neck of the flask higher than the mouth of the pickle bottle; in wet or windy weather it will fall to within an inch of the mouth of the flask. Before a heavy gale of wind, and at least eight hours before the gale reaches its height, the water has, it is said, been seen to leave the flask altogether.

A Big Shower of Meteorites.

A Big Shower of Meteorites

Of the 14 huge masses of meteoric iron which fell on a spot less than 64 square miles in area near Fort Duncan,

Had Some Show.

Rounder—I lost a thousand dollars yesterday at the races. Horse broke down at the post.

Sounder—That's nothing. I had my pocket picked this morning of twenty-five hundred dollars and chased the thief for half an hour without catching him.

Rounder—Well, you are better off than I am. You got a run for your money.—Life.

money.—Life.

Gave Himself Away.

First Waiter (at summer resort)—
Can't stop to talk. I'm waitin' on a tendollar-a-week clerk at table 55.

Second Waiter—How did you get his salary down so fine?

First Waiter—It ain't more than that, or he wouldn't 'a'given me such a big tip.—Good News.

Her Real Rights.

Mamie—I believe in woman's rights.
Gertie—Then you think every woman should have a vote.

Mamie—No; but I think every woman should have a voter.—Harper's Ba-
