upper end of the county. The men had been shadowed by a detective for several days until sufficient proof was ob-tained to point to their guilt. When the police attempted to arrest them they offered desperate resistance and tried hard to get away, but were finally gotten under control and hustled to the lockup. One of the fellows, by appearances the leader, attempted to pull a revolver but was prevented by the officers. The prisoners were searched at the jail and were found to be heavily armed. They had four self-cocking revolvers of large calibre, four knives, one of them a long dagger, a steel can-opener and a pair of pincers. The leader had in his pocket fifty-four pennies, which is considered proof beyond a doubt that this is the gang which robbed the slot machine at the station in Avoca.
