THE BAKER'S BILL

Tells of Greatly Increased Appetite

"It affords me great pleasure to tell not only the condition of my present health but also that of my whole family. A friend who knew of my poor health advised me to use Hood's Sarsaparilla. After two bottles a great change in my health was noticed. I do not have that tired feeling, no pain in the stomach, especially after eating, and in fact I feel like a new person and hold some pleasure in life. Every member of my family is using Hood's Sarsaparilla and with beneficial results, if I may judge by my baker's bill each week. Hood's

Don't Cheat Your Stomach.

You must have pure, wholesome food, no matter how much of the sham you'll take in other things.

Hecker's Buckwheat

Is pure and wholesome.

TO SINGERS.

The girls who put up my Medical Discovery all go to our Warren Street Methodist Church and two of them sing with great pleasure to themselves and others. One of them came to me one day, saying, "Dr. Kennedy, I must tell you what good the Discovery is doing in our church."

"Glad to hear that," said I.

"Well," she went on, "When I was so hoarse last Spring, you said it seemed like INWARD HUMOR and advised me to begin at once with the Discovery. I did so and in one month the hoarseness was all gone and my voice had improved so much several of our church mentioned it. Of course I told them you had advised the Discovery and I was taking it. In fun, one of the girls said, I want to try it too, and the fact is that the whole church, I might say, found out that KENNEDY'S MEDICAL DISCOVERY would cure their throats and pimples and many other troubles."

"All due to Inward Humor," said I, and that's what I explain in my little book which I send to any one who asks for it, and my Medical Discovery is sold in your town.

Yours truly,
DONALD KENNEDY, Roxbury, Mass.

Things for the Scrap-Book.

A cement that will stand the wear and tear of use is something hard to obtain, but a good authority says: The best cement for joining glass and metal together is pure alum melted in an iron spoon held over hot coals. As kerosene will not penetrate it, it is better than plaster of paris for uniting the bulb of a lamp to its base, where these are only loose.

Old paint should be cleaned before repainting, with a solution of soda—two ounces dissolved in one quart of water—applied warm; rinse thoroughly with clear water.

Keep tea in glass or porcelain jars. An expert says it is ruined if kept in metal boxes; therefore the tin canister must go.

Muriatic acid will remove ink stains from zinc.

A remedy for hiccough that is well-nigh infallible is to eat a lump of sugar saturated with vinegar.

A rubber clothes-wringer should be kept in as even a temperature as possible, and especially not exposed to severe freezing. In cold weather it should be warmed before using, by placing over a pan of warm water or near the range. This is an idea to be remembered in the coming months.

Quick Hat Full of Meaning.

"A crick"—"a stitch"—"a twist"—"a jam"—"a halt"—"a raw spot"—"a blue spot"—"dead aches," etc., are queer names well known among the ill of flesh, bone, muscle, nerves and joints, and are better understood as being so easily and surely cured by St. Jacobs Oil. The names are pointers to what it has done and always will do readily. Some too readily, others for many of the infirmities indicated by these queer nomenclatures, if neglected, often lead to very serious results, which the great remedy for pain stands ready to resist and prevent. None the less useful it is to have on hand always ready, for the sudden pain is very often the fatal one.

Neither One Nor the Other.

An elderly Irish woman who was in a Madison avenue car yesterday wished to get out at Forty-second street. The conductor was on the front platform, so the woman, addressing a gentlemanly looking young man opposite her, said:

"Shtop the car."

The young man looked over her head.

"Shtop the car, I say," she repeated, glaring at him savagely.

"Still no response."

"Didn't I tell ye to shtop this car," she shouted, gripping her umbrella.

"I am not the conductor," remarked the young man with sarcasm, while the young woman in the car tittered.

"Faix, an' ye're not," replied the Irish woman scornfully, "an' ye're no gentleman, nayther. Moreover, ye're no blessin' to your mother, ye're not. If you were you wouldn't let a respectable woman get carried two blocks out of her way without an' askin' from her either."—New York Herald.

Finished at Last.

After many years' delay the spire of the cathedral at Ulm has been finished recently. It is said to be the highest in Europe.

For a list of a man's friends, look in his ledger for those whose accounts have remained unpaid the longest.

\$100 Reward, \$100.

The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the system, and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: W. H. P. & Co., Toledo, Ohio. Sold by Druggists, 75c.

Petroleum is the latest suggestion for preventing congelation of navigable waters.

A Child Enjoys

The pleasant flavor, gentle action and soothing effects of Syrup of Figs, when in need of a laxative, and if the father or mother be constive or bilious, the most gratifying results follow its use; so that it is the best family remedy known and every family should have a bottle.

Mrs. Winslow's Soothing Syrup for children

teething, softens the gums, reduces inflammation, allays pain, cures wind, colic, etc. A bottle Gas was first employed as fuel in 1868.

The Apaches' Watches.

To ascertain the time at night, the Apache Indians employ a gourd, on which the stars of the heavens are marked. As the constellations rise in the sky, the Indian refers to his gourd and finds out the hour. By turning the gourd around he can tell the order in which the constellations may be expected to appear.—New York Advertiser.

Turquoises.

The theory that turquoises are the result of the fossilization of the teeth of animals is apparently confirmed by the experiments of a French scientist, who has found that fossil bones, amethysts and turquoises all contain fluorine. Upon chemical analysis it was found that the turquoise contains exactly the same proportion of fluorine as the bones of tertiary fossils.—Chicago Times.

MODEL STATE FOR ROADS.

A NETWORK OF MAGNIFICENT HIGHWAYS IN NEW JERSEY.

The Legislation Which Has Accomplished This—The Commonwealth Aids the Local Authorities.

EDWARD BURROUGHS, the New Jersey State Commissioner of Public Roads, said, recently, that some additional legislation will be attempted in the interest of good roads, and that in the future good roads will be an important factor in politics.

New Jersey was the first State, the Commissioner says, to enact laws for a permanent system of roadways, in which the State came to the aid of municipalities by a State fund to assist in building good roads. Sixteen other States have within the last three years attempted to aid in the building of good roads, but New Jersey alone has laws that can be carried into practical use.

Five or six years ago New Jersey had a patchwork road system, as Essex, Union and Passaic Counties had special road laws and the other 435 townships in the State had different systems of working roads, and often five or six systems in each township. The first law passed to amend the system of road working in the State was to enable townships to issue bonds to macadamize or telford roads. The new law abolished the old system of overseers, whose control of the working of the roads was absolute, and placed such power back in the hands of the people. These two laws give into the hands of the inhabitants of the townships the working, care and control of all the roads in such townships.

The first year's State aid to roads amounted to \$20,000; second, \$75,000; third, \$70,000, and this year the same sum. Under the State aid act, the owners of the lands along the roads improved pay ten per cent. of the cost, the State 33 per cent., and the county the balance, 56 per cent., which, under the decisions of the courts, the Board of Freeholders of the county in which the roads are built shall raise by county tax or bonds.

These three laws are the basis of all good roads legislation of New Jersey, and these have worked all the improved roads in the rural districts. Mr. Burroughs said that the roads on the South Sea Islands are as good as any in the world, and are worthy models for other people to follow.

The cost of building roads has been greatly reduced within three years, as the width of the country roadways first laid was not less than sixteen feet, now twelve feet wide, stoned ten to twelve inches deep. Another style of road for heavy travel is only ten feet wide, stoned ten to twelve inches in depth, with grass wings on the sides. Such a roadway has been in use three years, and is in good order, even where loads of five tons are transported over it. On roads where there is no heavy travel the width may be only eight feet, stoned ten to twelve inches, with wings two feet on each side, stoned six inches. It has been ascertained that the cost of a telford road is no more than a macadam, though at first contractors charged from ten to twelve cents more per square yard for telford.

In Camden County, in 1893, it cost \$1.15 to lay a square yard of twelve-inch stone road, but in 1894 the cost of the same was only seventy-nine cents. For six-inch stone roads, in Camden County, in 1893, it was eighty cents; in 1894, forty-two cents; and in Gloucester County thirty-nine cents a square yard. This reduction in the cost would make it possible to have stone roads in many sections where before they could not be had. Yet, in justice to some portions of the State, Mr. Burroughs thinks the present laws should be amended so as to allow hard materials, other than stone to be employed in road improvement. He also believes that in the future, say fifteen or twenty years, National assistance will be given as well as State.—New York Times.

Horseless Carriages.

Paris is becoming enthusiastic on the subject of horseless carriages. According to a Commercial Cable despatch another competitive race similar to the one from Paris to Rouen in July last, has been arranged to take place in June next, the route being from Paris to Bordeaux and return. In the Paris-Rouen race the Comte de Dion's carriage, which was propelled by steam, came in a handsome winner, the record being seventeen and a half miles an hour, the machine "charging the hills like an express train."

There will doubtless be many improvements shown in the horseless carriages that will be seen on the road in June. The Comte de Dion has evidently a very enthusiastic following, as shown by the handsome subscriptions made for prizes to be given not only for the best horseless carriages, but for bicycles and tricycles propelled by steam or petroleum. There seems no reason to doubt that in the near future we shall have all our carriages, cabs and coaches run without the assistance of horses, thanks to the initiative of the Comte de Dion.—New York Herald.

SCIENTIFIC AND INDUSTRIAL.

A German chemist is extracting sugar from cotton seed meal.

There are about 525 species of spiders at present known in the British Isles.

A lighthouse lens of the first order costs as much as \$8000. Such a lens is six feet in diameter.

Camille Flammarion claims that the star of Bethlehem was Venus at the time of its greatest splendor.

There is a high scientific authority for the belief that diamonds are the result of the slow decomposition of vegetable matter.

It is believed by microscopists that the highest powers of their instruments have not yet received the most minute forms of animal life.

The rudder of the Cunard steamship Campania consists of a single plate of steel twenty-two by eleven feet six inches and one and a quarter inches thick. It was rolled at Krupp's German gun factory.

The Campania and Lucrezia consume 600 tons of coal daily when driven to their utmost speed. This is equivalent to a consumption of a little over 300 pounds of coal per minute, or twenty-five tons an hour.

A Manchester (England) man carries on his person a complete pick-pocket alarm system. Removal of his watch, pin or other jewelry causes the ringing of the bell. The electric plant weighs twenty-two ounces.

After repeated experiments German army officers have reported the bicyclette unsuited to the service on the ground that it should only be used to replace mounted military messengers when good roads are available.

The greatest cold experienced by Parry in his Arctic explorations was fifty-two degrees below zero. Stuart Jenkins, a Canadian surveyor, writes in the Popular Science Monthly that he has undergone sixty-two degrees below zero in the open air without being rendered very uncomfortable by it.

Lamps shown in store windows at night are sometimes illuminated for purposes of display with an incandescent electric light in place of oil. Such a light shows lamp and shade to the best advantage, and there is no fear, as might be the case with a wick left unattended, that it will burn too high or too low.

In a new work on engineering Professor Warren discusses the "fatigue" of metals—a striking term used to describe their loss of power of resistance after being subjected to strain. Car axles grow thus "fatigued" and finally break from the effect of jolts and strains so small that no single one of them seems to have any effect at all.

Professor Lockyer points out that the great temple of Amen-Ra at Karnak, was built so that at sunset on the longest day of the year the sun would shine completely through its central gallery. It was a sun temple, and this method of "orientation," as it is called in ancient architecture, undoubtedly originated, as did all astronomy, in worship of the sun and other heavenly bodies.

Adoption Among Birds.

Modern scientific research undoubtedly tends to place the ethics of bird life on a higher and higher level. Even the cuckoo, against whom so much has been written, is now acknowledged to have been maligned when it was universally affirmed by ornithologists that it displays in its tenderest stage of development the odious faculty of ejecting its lawful occupants from the stolen nest, in which it has been placed. The Bishop of Newcastle has now made himself responsible for a touching little anecdote. Not long ago, says Dr. Wilberforce, there was a Frenchman who had a large family, and who was haunted by the idea that when he died there would be no one to look after his children. While thinking of this one spring day, he noticed two nests in a hedge close by each other. Each contained half-fledged birds, whose parents were lying dead. He went away sad, thinking that the young birds must die. What was his surprise, however, a few days after to see them quite happy and apparently well fed. He stood apart and watched, and presently he saw the parent birds of other nests come to the young birds and feed them. They had adopted the little orphans, a fact which the Frenchman naturally took as a good omen with regard to his own little ones.—London News.

Coughed Out a Bullet.

A very strange and interesting incident has just occurred in Aaronsburg, Penn. Jacob Dunke, a soldier of that town, lost an eye in a battle of the Civil War. At the time he received the injury the surgeon merely washed his eye and the bullet was not probed for. He has experienced pain at times ever since on the left side of his face, his eye constantly running with water.

Last week while in Milhelm Mr. Dunke took a coughing spell, and during the spasm his friends in his company noticed something drop from his mouth. It turned out to be a minnie ball which had become lodged in the back part of the mouth, having found its way down from the eye.—New York Advertiser.

Women vote at all elections in Wyoming.

The tiara of diamonds is losing its vogue somewhat.

The fashionable chirography of the period is vertical.

There is a rage for "old lace" of every kind and sort.

Souvenir cups and saucers have crowded out the spoons.

NEWS & NOTES FOR WOMEN

Women vote at all elections in Wyoming.

The tiara of diamonds is losing its vogue somewhat.

The fashionable chirography of the period is vertical.

There is a rage for "old lace" of every kind and sort.

Souvenir cups and saucers have crowded out the spoons.

Handwriting on the wall says the days of the puffed sleeves are numbered.

Evidently the prejudice against green as a popular color has died away.

Dull blue note paper and envelopes is the affection among society women.

English girls use artificial means to make them taller than nature decreed.

The "golf cape" is worn by hundreds of women who never saw the game.

Blonds are not in fashion. It is the girl with "chestnut brown" hair who reigns.

In Paris, fashionable women wear a large ribbon bow and streamers on one arm.

Large silver waist buckles should be worn if there is wish to keep up the procession.

There's a hospital in Soo Chow, China, in charge of Dr. Anne Walter, a Mississippian woman.

The medical attendant upon the Ameer of Afghanistan is an English woman, Miss L. Hamilton.

The average age at which women marry in civilized countries is said to be twenty-three and a half years.

It is said that "Ouida," the novelist, never shakes hands. She declares it to be the most vulgar form of salutation.

Miss Lucy E. Ball, of Brooklyn, is the only woman acting as a Deputy Collector of Internal Revenue in the country.

The girls of Gilliam County, Oregon, make considerable pin money poisoning coyotes and collecting the bounty on the scalps.

Money and beauty are tempting baits. Miss Ann Gould is said to have already turned down three princes, one count, one judge and an actor.

Princess Alix worked a man-drill in a Welsh mine she visited and brought down several blocks of coal, carrying off a small specimen as a memento.

The very newest fad among cremationists is that of a New York widow, who wears in a tiny locket over her heart a pinch of the ashes of her husband.

The first colored woman to receive the degree of M. A. in the United States was Miss Mary Paterson, who was graduated from Oberlin College, Ohio, in 1862.

Mrs. Deborah Brown and daughter, of Toronto, Canada, have arrived at years of discretion. The mother is 118 years old, and the daughter eighty-four years old.

Mrs. Craigie, who writes short novels and sharp epigrams over the name of John Oliver Hobbs, is an American, though she was educated in England, and has spent most of her time there.

There are plenty of inconveniences about being a Queen. The Regent of Spain, for example, cannot take a walk with her little royal son, because she has been warned that if she does there will be a double assassination.

The fancy stores are aglow with stock or crush collars, folded girdles, corollaries and plastrons made of Scotch plaid silk, chiffon, ribbon both plain and fancy, and of cerise, magenta, olive-green, black and golden-brown velvet.

The "Flower in Art," will be the name by which an exhibition shortly to be opened in Paris will be called. It will contain representations of flowers in needlework, textiles, porcelain, sculpture, and painting, and, as the title would indicate, will be devoted entirely to floral art.

The Ameer of Afghanistan has been under the treatment of Miss L. Hamilton, M. D., a young Scotchwoman, who first trained as a nurse in the Liverpool Infirmary. She took her medical degree in Brussels, and was a practicing physician in Calcutta until she went to Cabul a few months ago.

Susan B. Anthony says the reason why the average woman who tries to address an audience cannot make herself heard is that she does not know how to hold herself. "Throw your shoulders back," she says, "keep your head erect and talk just as though you thought you had something particular to say to the persons on the last row of seats."

No Substitutes

For Royal Baking Powder. The "Royal" is shown by all tests, official, scientific, and practical, stronger, purer, and better in every way than all other Baking Powders. Its superiority is privately acknowledged by other manufacturers, and well known by all dealers.

If some grocers try to sell another baking powder in place of the "Royal," it is because of the greater profit. This of itself is good evidence of the superiority of the "Royal." To give greater profit the other must be a lower cost powder, and to cost less it must be made with cheaper and inferior materials, and thus, though selling for the same, give less value to the consumer.

LOOK with suspicion upon every attempt to palm off upon you any baking powder in place of the "Royal." There is no substitute for the "Royal."

Cynical.
An Arabian proverb, put in the form of a dialogue, reflects the cynicism of Arab wit. It runs thus:
"Yes, he's indicted, but he'll never be convicted."
"Why not?"
"Nobody to testify against him."
"Why not?"
"Because he hasn't any friends!"

A Foxy Scheme.
A New York syndicate has been formed for the purpose of buying an island off the coast of Maine, stock it with black foxes and engaging in the fur trade.

In Our Great Grandfather's Time.
Big bulky pills were in general use. Like the "blunderbuss" of that decade they were big and clumsy, but ineffective. In this century of enlightenment, we have Dr. Pierce's Pleasant Pellets, which cure all liver, stomach and bowel derangements in the most effective way.

Assist Nature in cleansing laxative, thereby removing offending matter from the stomach and bowels, toning up and invigorating the liver and quickening its tardy action, and you thereby remove the cause of a multitude of distressing diseases, such as headaches, indigestion, or dyspepsia, biliousness, pimples, blotches, eruptions, boils, constipation, piles, fistulas and maladies too numerous to mention.

If people would pay more attention to properly regulating the action of their bowels, they would have less frequent occasion to call for their doctor's services to subdue attacks of dangerous diseases.

That, of all known agents to accomplish this purpose, Dr. Pierce's Pleasant Pellets are unequalled, is proven by the fact that once used, they are always in favor. Their secondary effect is to keep the bowels open and regular, not to further constipate, as is the case with other pills. Hence, their great popularity, with sufferers from habitual constipation, piles and indigestion.

A free sample of the "Pellets" (4 to 7 doses) on trial, is mailed to any address, post-paid, on receipt of name and address on postal card.

Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

BEECHAM'S PILLS

(Vegetable)

What They Are For

Biliousness indigestion sallow skin
dyspepsia bad taste in the mouth pimples
stiff headache foul breath torpid liver
bilious headache loss of appetite depression of spirits

When these conditions are caused by constipation, and constipation is the most frequent cause of all of them.

One of the most important things for everybody to learn is that constipation causes more than half the sickness in the world; and it can all be prevented. Go by the book.

Write to B. F. Allen Company, 365 Canal street, New York, for the little book on CONSTIPATION (its causes, consequences and correction); sent free. If you are not within reach of a druggist, the pills will be sent by mail, 25 cents.

YOUNG MEN GOING TO SCHOOL \$100

should know that one hundred dollars pays their entire expense of tuition, books, stationery, board, room rent, and travel in any of their preparations. These are the SOVEREIGN REMEDY FOR ALL DISORDERS OF THE STOMACH, LIVER AND BOWELS.
