FOR ATLANTA'S BIG FAIR.

DISPLAY BY THE UNITED STATE DEPARTMENT OF AGRICULTURE

It Will Be of Great Interest to Farmers and the General Public-Some of the Exhibits.

mers and the General Public—Some of the Exhibits.

HE United States Department of Agriculture at Washington is preparing a very complete and interesting exhibit for the big fair at Atlanta in the latter part of 1895. It will include a completely equipped weather bureau station in full operation; also a complete collection of climatic and meteorological charts, photographs of clouds and lightning, etc. Lithographic weather maps will be printed daily at the exposition for general distribution.

The division of ornithology and mammology will exhibit pretures illustrating the geographic distribution of mammals and birds in the United States, and the habits of the various species in their relation to agriculture. The habits in question will be further shown by groups of animals known to be beneficial or harmful, each species handsomely mounted. For example, there will be five groups of ground squirrels, each of half a dozen animals, which will be seen engaged in their natural pursuits, ravaging of the searching grasshop. gaged in their natural pursuits, ravag-ing grain fields, catching grasshop-pers, etc.

pers, etc.

There will be a number of groups of birds, each teaching important lessons in the economy of the species. One will show a number of cows in the cornfield, some pulling the new sprouted corn, others devouring grubs. There will be a small flock of cedar birds, feeding on the leaf beetles of the elm. They will form an attractive group and emphasize the usefulness of this bird.

The new division of agricultural soil

usefulness of this bird.

The new division of agricultural soil will show some of the most important types of soils from different parts of the country, such as the adobe, the mesa and the soil of the blue grass region of Kentucky. It will exhibit soils that are especially adapted to certain crops, such as the early truck soils of the Atlantic coast, the soils adapted to the different kinds of tobacco, to cotton, to wheat. The constituent parts of these soils will be displayed in separate jars.

to the different kinds of tobacco, to cotton, to wheat. The constituent parts of these soils will be displayed in separate jars.

The division of forestry will exhibit specimens illustrating the botany of Southern forests, including seeds, leaves, flowers, etc., showing the character of the flora of the southeastern section of the United States. A special display will be made of the pines of the South, from the botanneal as as well as from the commercial point of view; likewise of various methods of serpentine orcharding.

The division of botany will exhibit a reproduction of the new laboratory for testing seeds which has been established at the Department of Agriculture. There will be models of machinery for sowing, harvesting and and cleaning seeds, also a sample collection of commercial seeds, a collection of seeds used in medicine, the arts, for coils and for food; likewise a collection illustrating the various methods by which seeds are dispersed in nature. There will be a collection of the commercial seeds produced in the South, and twenty of the worst weeds of the South will be represented by mounted specimens and photographs showing their distribution.

The division of microscopy will exhibit a collection of models illustrating the structure of different kinds of cotton fibers.

The bureau of animals industry, will show models illustrating various diseased parts of animals, photographs of bacterial disease germs highly magnified. Other models will present a quarantine station, the method of tagging cattle for interstate and export trade, the stock yards at Kansas City, and methods for preventing the sproad of Texas fever. Models and natural history specimens will illustrate the development of the horse's foot and the disease to which it is subject.

prising models of cotton plants, illustrations of their diseases and representations of their diseases and representations. sentations of their diseases and re-sentations of their insect enen There will be a collection of 1500 samples of nearly every var of cotton grown in thirteen States Territories; also samples from all over the world.—Washington Star,

Mary Ann Dalton, of Ashland, N. H., is ninety-six years old, but is active enough to supply all her own wants. She spins, weaves and makes the cloth and clothes she wears, the rugs she walks on and the sheets and blankets she sleeps under, and mould the candles which she burns in her house.

house.

Some of the hats which are illustrated among the winter fashions for women are revivals of those worn by the cavaliers who followed Rupert against Cromwell, and it very often happens that garments worn by women were a part of the male costume at an earlier period of masculine development.

The Rise of the **Buckwheat Cake**

The leaven of yesterday ruins the cake of to-day. Don't spoil good buckwheat with dying raisingbatter—fresh cakes want Royal Baking Powder.

Grandma used to raise to-day's buckwheats with the souring left over of yesterday! Dear old lady, she was up to the good old times. But these are days of Royal Baking Powder-freshness into freshness raises freshness.

And this is the way the buckwheat cake of to-day is made: Two cups of Buckwheat, one cup of wheat flour, two tablespoons of Royal Baking Powder, one half teaspoonful of salt, all sifted well together. Mix with milk into a thin batter and bake at once on a hot griddle.

Do not forget that no baking powder can be substituted for the "Royal" in making pure, sweet, delicious, wholesome food.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK. DECEMBER OF THE PROPERTY OF THE PARTY OF THE

CHEMISTRY IN INDIA.

Some Carious Answers Given by Natives in a Written Examination. The uncivilized nations are like children in their simplicity and guilelessness. Every adult knows what odd questions a child will ask and what curious explanations they are in the habit of giving. Nothing could equal the childlike simplicity of the questions lately given in an examination in chemistry held in an Indian university. "Sulphur is a smellful gas. Nitrogen is a remarkably lazy gas and is good for nothing. Carbon always exists in a dark room. There is no living being in the whole world that does not contain carbon.

"Gas is made he all."

tain carbon.

"Gas is made by filling a poker with coal and heating it. Chlorine gives botheration to the throat. Hydroger is a colorless, invincible gas and burns 18 a colorless, invincible gas and burns itself without anybody's help. Nitrie acid is used in the preparation of cur-rant electricity. It is very bad for teachers to pour it on our hands. "Soda is formed by heating castor oil

and potash. Caustic soda is used in the manufacture of soda water, and thi is used in medicine for purgative pur poses. Caustic soda is used as a sum mer drink. Quicklime is made by pou ing water on slaked lime. We can eat this substance ((20); it has the power of digesting food. "Lime is used as a kind of gum for

builders to stick bricks together.

Electric Wires.

Some writer very aptly likens the nerves to electric wires, and the general working of their system to that of electric cars. A man who 'slips his trolley' like Mr. Jeremlah Ency, ISI2 W. Lombard St., Baltimore, Md., will need something better than even a galvanic battery to set him all right. Mr. Ency found that something in the following way found that something in the following way neuralgia in the head. I gave St. Jacobs Oil a fair trial and am entirely cured.' In this way the great remedy acts as a motorman terestore broken wires, and sets the system to perfect action.

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, disspelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you vill not accept any substitute if offered.
